THE MEN BEHIND THE YEAB BOOK

LOYOLA UNIVERSITY

MACFARLANE

Foreword

In the Scrap Book, we have made an effort to portray as clearly as possible the many activities of the medical department of Loyola University.

Ours is a college ever growing greater, and we offer this book as a part of our contribution to its forward movement.

If we have succeeded, we ask only that credit be given those who have co-operated with us, to make it what it is. If there is anything that pains anyone, or if anything has been omitted, it was not done intentionally and we regret it.

We are grateful to all those who have in any way helped to make this book possible; to the student body for their financial support; to our advertisers and to the faculty who have given us every assistance.

We shall be liberally repaid if this book in part represents the true Loyola Spirit.

In this work we have done our best. We now present it to you, for your approval.

THE EDITORS.

"VIEW OF LOYOLA UNIVERSITY CAMPUS"

Historical

St. Ignatius College was chartered by the Illinois State Legislature in 1870. In 1909 the college had developed to a point where the addition of new departments seemed advisable and LOYOLA UNIVERSITY was accordingly incorporated.

A large tract of ground was purchased at Loyola avenue and Lake Michigan and buildings erected for the School of Science and the Cudahy School of Engineering. Schools of Law, Sociology and Pharmacy were established in rapid succession while an affiliation was formed by which the Illinois Medical College became the Medical Department of Loyola University. In 1910 the Illinois, the Bennett and the Reliance Medical Colleges merged to form the Bennett Medical College, the affiliation continuing until 1915 when the Bennett Medical College passed under the complete control of the trustees and became the LOYOLA UNIVERSITY SCHOOL OF MEDICINE.

AN APPRECIATION

Our Teachers, God bless 'em
May they be as proud of us,
as we are of them.

Faculty

Rev. John Furay, S. J., President of Loyola University, was born in Omaha, Nebraska, and educated in Creighton University. He is related to Count John Creighton who founded the Creighton University. He taught literature at St. Ignatius College and was for four years president of the Jesuit College in Cleveland, Ohio, where, at the same time, he lectured on economics. He was made President of Loyola University in August, 1915. Address St. Ignatius College, 1076 W. 12th St.

Henry S. Spalding, S. J. Regent of the School of Medicine and President of Loyola Academy, was born in Kentucky in 1865. For one year he was Professor of History and Literature at the Creighton University, then he spent 7 years as Vice-president of Marquette University and labored with Father Burrowes in developing that institution. In Chicago he was again associated with Father Burrowes in the establishment and development of the School of Medicine at Loyola. In addition to his work as an educator he has a wide reputation as an author of books for boys. Several of these books have been translated into French and German after running through several American editions. Father Spalding lectures to the Senior class in both the Medical School and in the School of Sociology on Ethics and Jurisprudence. He is a member of the board of trustees of the University and of the Council of the Medical School.

Maximilian Joseph Herzog, M. D., was born in Frankfort-on-the-Main, in Germany. He was educated in the University of Giessen, Strassburg and Marburg, in Germany. He crossed the ocean in 1882, and engaged in newspaper work on the German Daily Press, in St. Louis, Missouri, and Cincinnati, Ohio, from 1882 to 1890. Later he studied medicine in the Medical College of Cincinnati, graduating with honor in 1890. Dr. Herzog returned to Germany for post-graduate work in the Universities of Wuerzburg, Munich, Leipzig, and Berlin. Returning to America he became a member of the Medical Staff of the German Hospital in Cincinnati. In 1894, he came to Chicago and from 1896 to 1903 was Pathologist and Bacteriologist to the Chicago Polyclinic; the German Hospital and the Maurice Porter Hospital for Children. From 1903 to 1906 he was Pathologist in the Bureau of Science, in Manila. After the Russo-Japanese war, he went to Japan to study Beri-Beri in Hiroshima and Tokio. From 1906 to 1909 was Pathologist at Michael Reese Hospital. Since 1909 he has been Pathologist in the German Hospital, Alexian Brothers' Hospital, North Chicago Hospital, and is Chief of Division of Pathology, Cook County Hospital. In 1912 he became Professor of Pathology and Head of the Department of Pathology, in Loyola University School of Medicine, and in the year 1913 he became dean.

Alfred de Roulet, B. Sc., Fairmount; **M. D.,** Beaumont Hospital Medical College, St. Louis, 1899; **M. S.,** Loyola University, 1911. Laboratory Assistant, St. Mary's Infirmary, 1898-99; House Surgeon, St. Mary's Infirmary, 1899-01; Assistant to Dr. A. C. Bernays, 1901-03. Demonstrator of Clinical Microscopy in Beaumont Hospital Medical College, 1899-01. Assistant Demonstrator of Anatomy, Marion-Sims-Beaumont Medical College, 1901-02. Professor Gynecology, Illinois Medical College, 1909. Clinical Professor of Gynecology, Loyola University, 1910. Curator of Medical Museum, 1913. Professor of Gynecology Loyola University, 1914. Lecturer on Psychopathology in Loyola School of Sociology, 1914. Secretary and Executive Officer, Loyola University School of Medicine, 1915. Attending Physician and Director of the Psychopathic Laboratory, House of the Good Shepherd.

Nathaniel Abraham Graves, A. M., M. D., was born in Illinois in 1864. Attended Sycamore High School and Evanston Academy, graduating from Evanston in 1884. He graduated from Bennett in 1890; immediately afterward entered the Cook County Hospital where he served an 18 months' internship. Later he was appointed a member of the attending staff and after 12 years' service became a member of the consulting staff.

In 1892 he became Professor of Chemistry at Bennett and in 1895 became Professor of Medicine. For 10 years he was secretary of the institution and for 1 year its president. He has a wide reputation as a teacher and therapist. He is a member of the attending staff of the Norwegian Deaconess Hospital and the Jefferson Park Hospital. He is a member of the Chicago, the State and the National Medical Associations and is also a member of the Delta Epsilon College Fraternity and the Phi Delta Epsilon Medical Fraternity.

Edgar Mead Reading, A. M., M. D., was born in Edwardsburg, Mich., Aug. 18, 1852, and graduated from Milwaukee Academy in 1870. In 1874 he obtained the degree of B. A. from Yale University and in 1877 graduated from Bennett with the degree of M. D. Northwestern University in 1880 conferred upon him the degree of A. M.

Elected to the professorship of Physiology, later to that of Diseases of the Chest, and ten years ago to that of Nervous Diseases, which he still holds. He was appointed in 1888 to the Attending Staff and in 1894 to the Consulting and Nominating Staff of Cook County Hospital which position he filled six years. In 1907 he was elected President of Bennett, but resigned at the end of a year.

He is a member of various Scientific Societies, author of several text books, and during his whole professional career has been closely associated with his "ALMA MATER."

Henry Foster Lewis, A. B., M. D. Born in Chicago. Harvard University, A. B., 1885; M. D., 1888; Externe Boston City Hospital, 1888; Interne Cook County Hospital, 1888-90; University of Chicago, 1899. Instructor of Physical Diagnosis, Post-Graduate Medical School, Chicago, 1891. Professor of same in College of Physicians and Surgeons, 1891-93; Assistant Instructor and Assistant Professor of Obstetrics and Gynecology in Rush Medical College, 1899-1905; Professor of Gynecology in Chicago Polyclinic, 1906-09; Professor of Obstetrics and Gynecology in Loyola University School of Medicine, 1909; Professor and Head of the Department of Obstetrics and Gynecology, 1911. Curator of Museum of Cook County Hospital, 1894. Attending Obstetrician, 1905-06. Attending Surgeon, 1907-12. Chief of Obstetrical Staff, Cook County Hospital, 1913. Member of Chicago Medical Society, Illinois State Medical Society, Chicago Gynecological Society.

Henry A. Norden, M. D. Junior Dean of Bennett Medical College, was born in New York in 1867. Graduated Rush Medical College 1889. Interne and Attending Physician at the Cook County Hospital for five years. Practiced in Sturgeon Bay, Wisconsin, for fifteen years. Health Commissioner of Sturgeon Bay for thirteen years. President of Board of Education for ten years. Twice appointed to the State Normal School Board. Superintendent of Chicago-Winfield Tuberculosis Sanitarium, 1913-14. Member of the attending staff of Jefferson Park Hospital, member of the Chicago Medical Society, the Illinois State Medical Society, American Medical Association and Phi Delta Fraternity. In 1913 he received the degree of Bachelor of Science from Loyola University.

John Dill Robertson, B. S., M. D. Born in 1871 in Pennsylvania. After working as a telegrapher for a number of years he read medicine for six months under Dr. C. M. Ewing, then came to Chicago and entered Bennett, graduating in 1896. He passed an examination for interne at Cook County Hospital. After completing his internship in 1897 he became professor of Chemistry at Bennett. He was appointed Attending Surgeon Cook County Hospital in 1898 and resigned in 1913. In 1900 he organized the American College of Medicine and Surgery. In 1905 he again became connected with Bennett as Professor of Surgery. In 1908 he was elected President of the Bennett Board of Trustees and resigned in 1914 to become Health Commissioner of Chicago.

Dr. Robertson is Vice-President of the State Board of Agriculture from the Sixth Congressional District. Member of the Chicago Medical Society. Member of the Phi Delta Epsilon Fraternity.

Charles A. Wade, M. D. Degree, Rush Medical College, 1891. Professor of Pediatrics, Bennett Medical College. Formerly Assistant City Physician, 1893-94. Inspector Department of Health, Chicago, from 1894 to 1900. Consulting Physician Chicago Municipal Tuberculosis Sanitarium, Consulting Physician to Contagious Hospital. Fellow American Medical Association, Chicago Medical Society, Illinois Medical Association. Member Phi Rho Sigma Fraternity of Rush Medical College.

Charles J. Whalen, M. D., was born at Fitchburg, Wisconsin, 1868. Received M. A. Degree from Watertown, and LL. B. of Lake Forest. He graduated from Rush Medical College with the class of 1891, and was a member of the Faculty of his Alma Mater until 1912. Dr. Whalen is President of the Illinois State Medical Society; member of American Medical Society, Chicago Medical Society, American Academy of Medicine, Chicago Laryngological and Rhinological Society, American Public Health Association, Physicians' Club of Chicago, 1st Lieutenant Medical Reserve Corps United States Army. Member of Advisory Board, Illinois Good Public Roads Association, Ex-Commissioner of Health, Chicago. Consulting Staff of Cook County and St. Joseph's Hospitals. Professor of Medicine, Medical Department of Loyola University.

William Rittenhouse, M. D. Instructor Public Schools, 1870-83. M. D., College of Physicians and Surgeons, Chicago, 1886. Former Obstetrician of Illinois Hospital. Consulting Obstetrician, Mary Thompson Hospital. Member of Chicago Geological Society and Therapeutic Club. Professor of Obstetrics, Loyola University, Medical Department. Member of Phi Delta Fraternity.

Jacob F. Burkholder, M. D. Western University, London, Canada, 1892. Professor Ophthalmology, Chicago Eye, Ear, Nose and Throat College. Professor Ophthalmology, Loyola University. Member of Chicago Medical Society, Illinois State Medical Society and Chicago Ophthalmological Society.

Hugh Neil Mackechnie, M. D. Born Paisley, Ontario. A. B., McMaster's University; M. D., C. M., Trinity University; F. T. M. C., Trinity Medical College. Former assistant to Alexander Hugh Ferguson, M. D., C. M. Former Professor Surgery, Dearborn Medical College. Former Instructor College Physicians and Surgeons. Professor Surgery, Bennett Medical College. Consulting Surgeon, Municipal Tuberculosis Sanitarium, Cook County Infirmary. Attending Surgeon Lakeside and Jefferson Park Hospital. Member of Chicago Medical Society, Illinois State Medical Society and American Medical Ass'n. Member Omega Epsilon Phi and Phi Delta Fraternities. Secretary of Chicago Alumni Association, Toronto University. Chairman of Membership Committee, Chicago Medical Society. Member Olympia Fields Country Club.

Ulysses Joshua Grim, M. D. Rush Medical College, 1891. Post-graduate work in Vienna, 1909. Head of Department and Professor of Rhino-oto-laryngology. Loyola University School of Medicine. Assistant Surgeon on the Hospital Staff of the Illinois Charitable Eye and Ear Infirmary. Attending Rhinologist and Laryngologist Jefferson Park Hospital. Member of the American Medical Association, Chicago Medical Society, Chicago Pathological Society, Chicago Ophthalmological and also the American Academy of Ophthalmology and Oto-Laryngology. Member of Phi Delta Epsilon Fraternity.

F. Kreissl, M. D. Born in Vienna, Austria, 1859. Went to public school, high school and medical college in Vienna. Graduated from there May, 1885. Assistant to the Clinics of Surgery, Obstetrics, Gynecology, Skin and Venereal Diseases in the Vienna General Hospital and Polyclinic, 1885-90. Came to America and settled in Chicago in 1892, and has practiced genito-urinary diseases and surgery ever since. Chairman of the Medical Board of the Chicago Civil Service Commission, 1898. Attending Surgeon, Cook County Hospital, 1902-04. Professor of Genito Urinary Surgery, Illinois Post-Graduate Medical School, 1898-1913, and in Loyola University since 1911. Attending Genito-Urinary Surgeon, Columbus Hospital since 1906. Member American Medical Association, Illinois State Medical Society, Chicago Medical Society, Chicago Physicians' Club, American Urological Society, Chicago Athletic Club, Chicago Yacht Club. Member of Phi Delta Fraternity. Author of the textbook "Urogenital Therapeutics."

Arthur Bennett Rankin, B. A., M. B. Born April 27th, 1884, Sterling, Ontario, Canada. Graduate Parkdale Collegiate Institute, Toronto, 1889. Entered Toronto University 1900, received B. A. degree 1904, and medical degree 1906. Interne Toronto Orthopedic Hospital and Toronto General Hospital. Post Graduate course in Massachusetts General Hospital, Boston, Mass. Came to Chicago in 1908 and appointed Professor of Orthopedic Surgery in Northwestern University that year. Attending Surgeon to Home for Destitute and Crippled Children, Chicago. Professor and Head of Department of Anatomy Loyola University School of Medicine. Professor of Surgery 1914. Superintendent of Clinics at Jefferson Park Hospital. Member of Council, A. K. K. and Phi Delta Fraternities.

O. C. Huber, B. S., M. D. Born Smith-ton, Pa., March 28, 1884. Taught School five years in Westmoreland County, Pa., two years Youngwood High School, and one year as Principal of same. B. S. from Valparaiso University, 1906. Spe-cialized in Chemistry. Taught experi-mental chemistry in Valparaiso Univers-ity, Summer of 1907. Head of Depart-ment of Analytical Chemistry, Valparaiso University, 1908-09. Came to Chicago 1910, taught analytical Chemistry, C. C. D. S., also Bacteriology and laboratory work to both C. C. M. & S., and C. C. D. S., M. D. from C. C. M. & S., 1912.

Head of Department of Chemistry, Medical Department Loyola University. President of Loyola University Research Society. Member Phi Chi Fraternity.

Frank Marion Horstman, B. S., Ph. G., M. D., was born in Norwalk, Wis., Feb. 17, 1878. After graduating from the Barron, Wis., High School he entered the Superior State Normal School from which place he graduated and pursued a special course in Biological Science and Phar-macy. Dr. Horstman is a graduate of the Pharmacy department of Valparaiso University and the Medical Department of the University of Illinois. The degree of B. Sc. was conferred on him by Loyola University. Dr. Horstman for 8 years was Instructor at Medical Department of Illinois University. He is head of De-partments of Physiology and Biology at Loyola University Medical School, Mem-ber of Illinois Medical Society, Chicago Medical Society, Mu Sigma Mu Medical Fraternity and Alpha Omega Alpha Scholarship, a scholarship fraternity of the University of Illinois

Wm. B. Marcusson, A. M., M. D. Born in Constantinople, Turkey, June 29, 1861. Son of a Presbyterian missionary. Graduate of Williams College, Massachusetts, in 1881, with the degree of B. A., Bachelor of Arts. Entered Rush Medical College in 1882 and took a three-year course. Was associated with Professors Moses Gunn and Charles C. Parkes as Assistant in the Surgical Clinic, and became Chief of Clinic under Prof. John B. Hamilton. Twelve years of service in the Surgical Atmosphere of Rush College and an internship in the Presbyterian Hospital, served as an apprenticeship for the position of Professor of Surgery in Medical Department of Loyola University, a post of honor which is highly appreciated by the subscriber. Loyola students and Alumni are always welcome at the Friday Surgical Clinics at the Jefferson Park Hospital. Member Phi Delta Epsilon Fraternity.

Benjamin Henry Breakstone, B. S., M. D. Born Suwalk, Poland Russia, March 27, 1877. Graduated from high school 1893. Graduated Rush Medical College, 1899. B. S. degree, Covington University, 1902. Cook County Hospital, 1897-99. Assistant Attending Neurologist Central Free Dispensary, 1899. Surgeon and House Physician, Central Free Dispensary, 1901. Surgeon Cook County Hospital, 1904. Head Department of Genito-Urinary Diseases, and Professor of Clinical Surgery, Bennett Medical College, 1913. Consulting Surgeon, Mary Thompson Hospital and Attending Surgeon Jefferson Park Hospital, 1913. Founder of the Maimonides Kosher Hospital and Surgeon-in-Chief.

Leslie F. MacDiarmid, M. D. Born Omaha, Nebraska, December 25, 1884. Graduated from Omaha High School, 1903. Attended Creighton University 1904. Graduated from Illinois University, 1909; Interned University Hospital, Chicago 1909-10. Professor and Head of Dept. of Therapeutics and Professor of Medicine, Loyola University. Member of Alpha Kappa Kappa, Phi Delta, Illinois Medical Society, Chicago Medical Society and the American Medical Association.

Kasimir A. Zurawski, A. B., M. D. Born in Poland. Graduate of St. Petersburg Philological College and the Medical Department of the University of Illinois. Professor of Dermatology and Venereal Diseases, Bennett Medical College. Member of Chicago Medical Society, Illinois State Medical Society, American Medical Association, Chicago Urological Society, American Urological Association. President Polish Medical Society. Member of Phi Delta Epsilon Fraternity. Professor and head of the Department of Dermatology, Loyola University.

Richard Jay Lambert, B. S., Ph. G., M. D. Junior Professor of Pharmacology and Materia Medica, Loyola University Medical School. Born on the Hawaiian Islands of American parents in 1874. Received his preliminary education in the schools of Salt Lake City, Utah. Practiced Pharmacy for fifteen years. Graduated from Bennett College in 1907. Actively engaged in a general practice in St. Charles, Illinois. Specializes on Internal Medicine with a special reference to the influence of the vegetable materia medica. Co-author of "Himself," one of the leading books on sex education. Member of the Fox River Valley Medical Society, Illinois State Medical Society, National Medical Society, Phi Delta Fraternity.

Cyrus B. McClurg, M. D. Born Athens, Ohio, May 31, 1885. Attended public and high school at Valley Falls, Kansas. Kansas Agricultural College, 1907-08. M. D. degree conferred by Washington University, 1912. House Physician Barnard Free Skin and Cancer Hospital, 1912-13. Professor of Anatomy, Medical Department of Loyola University. Member of Phi Delta Fraternity.

Benjamin E. Elliott, B. S., M. D. University of Chicago, 1908. Northwestern University Medical School, 1910. Instructor in Obstetrics and Demonstrator of Anatomy, Loyola University Medical School. Attending Obstetrician Jefferson Park Hospital.

Thomas A. Carter, B. Sc., Ph.G. M. D. Medical Department Loyola University; B. S., Loyola University; Ph. G. Central States College of Pharmacy; Instructor in Surgery, Medical Department, Loyola University; Member Chicago Medical Society, Illinois State Medical Society, American Medical Association and Tri-State Medical Society. Member of Phi Delta Epsilon Fraternity.

Attending Surgeon Chicago Union and Columbus Hospitals.

Has carried out extension researches in corrosive sublimate poisoning.

Thomas S. Hogan, A. M., LLB., Lecturer on Medical Jurisprudence.

Arthur Gammage, LLB., Lecturer on Medical Jurisprudence.

Both are distinguished members of the Chicago Bar and both decline to incriminate themselves by biographical sketches.

George L. Apfelbach, A. B., M. D., graduate of the Northwestern University Medical School, 1910. Interne Cook County Hospital 1910-12. Associate Professor of Medicine Loyola Medical School. Consulting Physician to the Illinois State Department of Factory Inspection on Occupational Diseases and Industrial Hygiene. Head of Department of Occupational Diseases Chicago Graduate School of Medicine. Attending Surgeon Sheridan Park Hospital.

Frank Byrnes, M. D. Professor Surgery, Medical Department Loyola University; Alumnus Rush Medical College. Ex-Instructor Anatomy, Rush Medical College. Interne St. Elizabeth's Hospital until 1895. Ex-Professor Surgery, Illinois Medical College. Surgeon Columbus Hospital. Consulting Staff, Cook County Hospital, 1902-1906. Member of American Medical Association and Chicago Medical Society.

A. T. H. Holmboe, M. D. Entered the University of Christiana in 1874, after having passed examen artium (corresponding to the degree of B. A.). Took examen philosophicum (corresponding to degree of M. A.) in 1875; P. & S., Chicago, 1886. Became Dr. Chr. Fenger's assistant, 1886 to 1889. Berlin University, 1890. Hospital appointments: Surgeon Out-Door Department Michael Reese Hospital; Attending Surgeon Passavant Memorial Hospital; Attending Surgeon Norwegian Tabitha Hospital and Norwegian Deaconess Hospital. Member American Medical Association, Illinois State Medical Society, Chicago Medical Society, Scandinavian Medical Society. Professor of Orthopedic Surgery, Medical Department Loyola University. Member Phi Delta Epsilon Fraternity.

Thomas H. Kelley, M. D. Earlier collegiate education obtained at University of Wisconsin, medical education obtained at Rush Medical College, Chicago. Interne in Bellevue and Allied Hospitals, N. Y., Lying-in Hospital, J. Hood Wright Memorial and Willard Parker Hospitals of New York City. Formerly Professor of Surgery, Illinois, and Reliance Medical Colleges, Chicago, now Professor of Clinical Surgery Loyola University School of Medicine. Attending Surgeon to Washington Park Hospital. Consulting Surgeon to Cook County Hospitals. Member of Chicago Medical, Chicago Surgical, Illinois State Medical Society, American Medical Association, Tri-State Medical Societies. Member of Phi Delta Fraternity.

Jesse Earl Gossard, M. Sc., M. D., was born in Harrod, Ohio, December 29, 1880. Graduated from Ohio Normal School in 1902, with degree Bachelor of Sciences and received Master's degree in Science from Ohio Northern University in 1904. Graduated from Northwestern University Medical School in 1907. Interne at Chicago Baptist Hospital (now Lakeside Hospital), 1907-1908. In 1908 received an appointment to the Mission Hospital, Yenping, China, where he remained four years—two years as Surgeon-in-charge. Professor in Foochow Union Medical College, 1912-1915. Assistant Professor of Bacteriology and Pathology at Loyola University Medical Department, 1915-16. Member of Omega Upsilon Phi Fraternity.

William Arthur Porter, M. D. High School, Melver, Kansas. Washburn College. Graduated Medical Department of Washburn College, 1897. Served one year as Interne in the General Hospital at Silver City, New Mexico, after which he engaged in general practice in Wichita, Kansas. Graduated Rush Medical College in 1901, since when he has enjoyed three post-graduate periods in New York City, as well as one each in London and Vienna. Professor of Otology and Laryngology, Medical Department Loyola University.

Arthur Edison Gammage, M. D. Born in Chatham, Ontario, Canada, October 18, 1881. Graduated Bennett Medical College, 1906-08. Attending Staff, Jefferson Park Hospital, Sheridan Park and Chicago Union Hospitals. Instructor Gynecology Bennett Medical College, three years. Junior Professor Clinical Surgery Bennett Medical College, two years. Member Chicago Medical Society, Illinois State Medical Society and American Medical Association. Commander Apollo Commandery No. 1, K. T. Member of Phi Delta Fraternity. Secretary of North Shore Branch of the Chicago Medical Society.

Jack J. Moses, A. B., M. D. Born Smyrna, 1886. Received an A. B. degree from International College at Smyrna in 1905 and M. D. degree from Beirut in 1909. Attending Staff at Jefferson Park Hospital. Associate Professor of Surgery at Medical Department of Loyola University.

Charles H. Solomon, M. D. Born in 1880 in the City of Chicago where he has always resided. He was educated in the public schools of Chicago and by his own industry and diligence he obtained his high school and university education.

Graduated from the Northwestern University Medical College in the year of 1908 and after serving his internship he began the practice of medicine in the Northwest section of the City.

In the years 1909 to 1911 he was associated with the College of Physicians and Surgeons and the Illinois Medical College in the capacity of Instructor in Medicine.

At present he is assistant professor of Genito Urinary Diseases at the Loyola University School of Medicine and attending Genito Urinary Surgeon to the Salvation Army.

William J. Anderson, M. D., graduated Rush 1903. Night Warden Cook County Hospital 1911 to 1914. Contributed, as a result of work in the hospital, articles on skull fractures, appendicitis, foreign bodies in the bladder, etc. Since returned to private practice and has devoted most of his time to G. U. Surgery. At present Genito Urinary surgeon at Scleth Hospital, House of Correction. Clinical Professor of Genito Urinary Surgery, Loyola University Medical College.

J. A. Suldane, M. D. Primary education public schools, entered St. Ignatius College in 1901 and graduated from the high school department in 1906. Graduated from the St. Louis University Medical School in 1910.

Special clinical course in pediatrics University of Illinois during the summer term of 1909.

Dr. Suldane is now Professor of Pediatrics, Loyola University Medical School.

Daniel E. Murphy, M. D. Born in Elwood, Ill. Received his preliminary education in public and high schools in Joliet. Graduated from the Northwestern University Medical School in 1901. Served an internship in the Alexian Bros. Hospital in 1901 and 1902. Is now attending surgeon Alexian Bros. Hospital and associate surgeon St. Joseph's Hospital. Clinical Professor of Surgery Loyola University School of Medicine.

Arthur E. Lehner, M. D. Graduated from the Illinois Medical College in 1906. For the past 6 years has been instructor in Clinical Medicine in Loyola University School of Medicine. Fellow American Medical Association. Member of the Chicago Medical Society and Illinois Medical Association.

H. D. Sheldon, M. D., graduated from the Bennett Medical College in 1910. Member and quizmaster of the Gynecological and Obstetrical Staff of the Loyola University School of Medicine.

Professor of Dermatology in Illinois Post-Graduate Medical School.

Eugene Laurence Hartigan, Ph. B., S. B., M. D. Born at Palos, Ill. Graduated from Hyde Park High School. Ph. B. from the University of Chicago, 1904; S. B. from the University of Chicago, 1907; M. D. from Northwestern University, 1909. Attending Surgeon at the Lake Shore Hospital. Interne at St. Elizabeth's Hospital. Interne at the Chicago lying-in Hospital and Dispensary. Member of the Chicago Medical Society. Member of the Phi Beta Pi Fraternity Phi Delta. Assistant Professor Surgery Loyola University B. Medical College.

William S. Bracken, M. D. Degree from Northwestern University, 1902. Ex-instructor Nose and Throat, Northwestern University. Instructor Laryngology, Otolology and Rhinology, Medical Department Loyola University. Member Phi Delta Fraternity.

Arthur H. Weis, M. D. Born in New Orleans, La., 1874. Preliminary and pre-medical education in Germany. M. D. degree, University of Berlin. Formerly assistant of Professor Von Lyden, at Charite Clinic, Berlin, Germany. Professor of Internal Medicine and Clinician, Loyola University Medical Department. Member of American Medical Association, Chicago Medical Society and Illinois Medical Society. Member of Zeta Mu Phi Fraternity.

William James Hurley, M. D., was born in Volga, Ia., in 1882 and received his preliminary education in the Volga (Iowa) High School and Valders College. Attended the University of Iowa Medical College for two years and graduated from the Chicago College of Medicine and Surgery. Served an internship at the Deaconess Hospital and later at St. Bernard's.

He is now attending Surgeon to St. Bernard's Hospital and visiting Surgeon to the Mercy, St. Anthony's, Wesley and St. Joseph's Hospitals. For the past three years has been professor of Clinical Surgery in Loyola University School of Medicine.

Jack R. Lavieri, M. B. Born in Southern Italy in 1889. Came to America 10 years later. Educated in Chicago, graduating from the Tuley High School in 1908 and from the Medical Department of the University of Illinois in 1912. Passed Cook County Hospital Examination and served as interne from Dec. 1, 1912, to Sept. 1, 1914. Then became Instructor in Obstetrics in Loyola University Medical School.

Fred Thornton Barrett, M. D. Graduated from the Medical Department of the University of Illinois and served one year as interne in the Chicago Post Graduate Hospital. After this he devoted himself entirely to private practice in Obstetrics until the fall of 1916 when he became instructor in Obstetrics in Loyola University Medical School.

Meyer D. Moledezky, B. Sc., M. D. Born on Nov. 24, 1886. Both degrees 1912 Loyola University. Subsequently went abroad where he spent two years of study in the University of Berlin, the Robert Koch Institute of Berlin, the University of Vienna Austria and the affiliated schools of the University of London.

His studies and affiliations with such men as Wassermann, Neufeldt, Hartman, Lanke, Koch, Schlesinger, Sir Almoth Wright and others, and with Dean Herzog since his return to Chicago has prepared him in an enviable manner for his life's work.

Full charge department of Immunology as well as Sanitation and Hygiene in Department Pathology and Bacteriology Loyola University, Member Teaching Faculty Graduate School of Medicine, Chicago, in Department Clinical Pathology and Chemistry, Pathologist to Englewood Hospital, Rhodes Avenue (Douglas) Hospital and Robert Burns Hospital. Member Phi Delta Epsilon.

Stuart Johnstone, M. D. Alumnus College of Physicians and Surgeons, Chicago. Member of Staff Cook County Hospital, Lakeside and Post-Graduate Hospitals. Professor of Diseases of the Rectum in Post-Graduate Medical School. Member of the American Medical Association, Chicago Medical Society, State Medical Society, Chicago Electro-Therapeutic Society, Chicago Society for Prevention of Tuberculosis.

A. Cosmos Garvey, A. B., M. D., born in Chicago, Illinois, September 27, 1878. Earlier collegiate education at St. Ignatius College (Jesuit), subsequently attaining the degree of Bachelor of Arts at St. Mary's College, St. Mary's, Kansas. Entered Rush Medical College in 1897, graduating in 1901, whence he entered service at St. Joseph's Hospital of this City. In the organization of the Columbus Hospital in 1905 Dr. Garvey was appointed pathologist, at present lecturing Obstetrics at this institution. Instructor in Surgery, Loyola University School of Medicine. Member of Chicago and the American and Illinois State Medical Associations.

Herbert W. Gray, M. D., was born April 20, 1887, at Chicago, Ill. Dr. Gray graduated from the Medical Department of Northwestern University with the class of 1913 after which he served an internship at the Cook County Hospital. At present Dr. Gray is an Instructor of Surgery at the Chicago Polyclinic and attending Obstetrician at Jefferson Park Hospital. He is also Instructor of Gynecology and obstetrics at Loyola University School of Medicine. Member of the Chicago Medical Society and Illinois State Medical Society.

Thomas Downes Laftry, M. D. Born Belleville, Ont. M. D., College of Physicians and Surgeons, Medical Department University of Illinois. Member of the Chicago Medical Society, Illinois State Medical and the American Medical Association. Ex-Professor of Surgery, Illinois Medical College. Junior Professor of Surgery, Bennett Medical College. Attending Surgeon, Jefferson Park Hospital and Garfield Park Hospital. Clinical Professor of Surgery. Member of Phi Delta Fraternity.

Edward Augustine Corcoran, M. D. Born at Pottsville, Iowa, May 21, 1874. Graduated from Pottsville, Iowa, High School. He also graduated from the Decorah Institute in 1898 and graduated in 1902 from the Medical Department of University of Illinois.

Instructor in Medicine, College of Medicine, University of Illinois, 1908 to 1915. Instructor in Clinical Surgery at the Illinois Post Graduate Medical School from 1906 to 1916. Clinical Professor of Surgery, Loyola University School of Medicine, member of the Chicago Medical Society, Illinois State Medical Society American Medical Association. He is also a member of the Firo Sigma Medical Fraternity.

Richard John O'Connell, M. D. Born in Kilkenny, Ireland, October 17, 1868. Attended the Christian Brothers School, the Notre Dame University; graduated from Rush Medical College with the class of 1899. Member American Medical Association, Chicago Medical Society and Illinois State Medical Society. Attending physician to West Side Hospital and Ephpheta School and Professor of Clinical Medicine, Loyola University Medical School.

Elmer Holmes Finn, Ph. G., Sc. B., M. D. Graduated from Bennett Medical College, 1905; from Central States College of Pharmacy, 1910. Member of Phi Delta Fraternity.

Frances Helen Cook, M. D., graduated from the Bennett Medical College in 1911. Interne at the Cook County Hospital, 1911-12. Instructor in Pediatrics in Loyola University School of Medicine. Member Chicago Medical Society, and Illinois Medical Association.

Charles N. Gartin, M. D. Born in Hartford City, Indiana. Graduated from Bennett in 1912. Past Interne at Jefferson Park Hospital. Chief Surgeon to S. & S. Co., Stock Yards. On staff of Jefferson Park Hospital, Clinical Assistant to Dr. John Dill Robertson and Dr. Arthur B. Rankin. Member of Phi Delta Fraternity, Chicago Medical Society, American Medical Association and Illinois State Medical Society and Bennett Alumni Association.

James F. Forbes, M. D. Clinical Assistant Ophthalmology. Born Bowmanville, Ontario, Canada. Preliminary education received in Canada. First introduction to Medicine when a youth in the office of an old English Chemist. For some years followed Railroad life, becoming through promotion a transportation official, later returning to his first love. He is a graduate of Loyola Department of Medicine and one of its loyal adherents.

George Marchmont Robinson was born in Everton, Liverpool, England, Aug. 16, 1884, and attended the William Henry School and graduating from the Heyworth High School, then going to the University of Liverpool and taking a course in Biological Sciences. Instructor in Laboratory Physiology and Biology Loyola University Medical School. Secretary of Loyola University Scientific Research Society.

Benjamin H. Rouse, Ph. B., was born in Glen Elder, Kans., where he attended the public schools later graduating from the high schools of Beloit, Kans. Dr. Rouse then entered the Kansas Wesleyan College where the degree of Ph. B. was conferred upon him. Wishing to further his education he then enrolled at the State Agricultural College at Manhattan, Kans., and pursued a special course in Biological Sciences after which he took up the work of teaching. In a short time we find Dr. Rouse principal of the County High Schools of Atwood and Stockton later being honored with the following positions: Member of the State High School examining Board of Kansas in 1912, and instructor and Supervisor of the County Normal Institutions of Kansas, the latter being the pinnacle of the teaching profession in that State. He held this position during the years 1911 to 1916 at which time he was appointed Instructor of Biology at Loyola University School of Medicine.

Trustees of same, a member of the Illinois State Society, and at present President of the Bennett Medical Alumni Association.

Walter Franz Von Zelinski, M. D., Ph. G., B. S. Born July 16, 1882, in Marienwerdn, West Prussia, Germany. Educated at St. Mary's School, Germany; Saints Peter & Paul High School, St. Louis, Mo.; attended Northwestern School of Pharmacy, and Ph. G. Central States College of Pharmacy and B. S. St. Ignatius College and M. D. at Bennett Medical College in '08. Lectures on materia medica at the Central States College. Demonstrator of anatomy at Medical Department Loyola University. Attending surgeon at the Swedish Covenant Hospital, 1st Lieutenant in the Medical Reserve Corps, U. S. Army, member Chicago Medical, The Illinois State Medical, German Medical Society and Fellow American Medical Association. Consulting Physician to Municipal Tuberculosis Sanitarium. Secretary, the Alumni Association, B. M. C.

Hugo Edward Betz, M. D., was born at Davenport, Ia., Dec. 15, 1861. Attended public schools at same place, then took up commercial and business course, arriving in Chicago in 1878, following the same course in 1893, took up a course of medicine at the Bennett Medical College, graduated with the class of 1896, served an internship at Cook County Hospital in 1896-97. Was appointed on the Cook County Hospital Staff as Attendant Surgeon, served for ten years on Department of Contagious Diseases, also Skin and Venereal; was on the faculty of the American College of Medicine. Professor of Genito Urinary, also on the faculty of Bennett Medical as Professor of Genito Urinary and Skin and Venereal for several years, was appointed on the Attending Staff of the Baptist Hospital; in the medical service is also connected with several other hospitals; is now Superintendent of the Iroquois Memorial Emergency Hospital, is a member of the Chicago Medical Society and is one of the

Eleanor E. Fish, M. D., born in Chicago, 1866. Commenced her education in the public school. Graduated from St. Patrick's School of this City. Had a course in the State Normal School. Entered business life acting in several capacities until assistant manager was attained, which position was resigned for the study of Medicine at Bennett Medical College in 1910. She has always been interested in affairs of public policy and has been connected with several philanthropic and welfare organizations. Librarian of Visitation and Aid Association for ten years. Ex-Secretary of Queen Isabella Mutual Benefit Association. Recent Secretary of Civics Department of League of Cook County Clubs of Chicago. Elected Secretary-Treasurer of Alumni Association of Bennett Medical College in June, 1912, succeeding herself the following year. Re-elected to the office of treasurer in 1914 and 1915.

The Alumni Association

The graduates of a school enjoy the great privilege of membership in the Alumni Association, with its splendid opportunities not only for perpetuating old ties and friendships, but of forming new ones. At every Alumni meeting opportunities are given not only to meet again your own classmates, but to become acquainted with the old-timers of the Association who graduated way back in the years "before the fire" as well as the young fledglings "just out."

The Alumni Association should feel morally bound to do all in their power to support their Alma Mater. To her they should send worthy young men and women desiring to study medicine. As they become rich and prosperous they should not forget the old school, but should contribute to the building up of the different departments. The library can always use current text books and good journals. The Museum has an unlimited appetite for specimens. The laboratories can always use apparatus. A sterilizer in the Bacteriology Laboratory, erected to the memory of a friend, is a far better memorial than a brass tablet in a town hall, and what greater monument can a philanthropist erect than a laboratory building for a good medical school?

At the Alumni Ball each June it is the duty as well as the pleasure of the members to attend and help to welcome the new members while renewing friendships with the old.

Carl E. Boyer. Born in DuBois, Pa. Early education DuBois, Pa. Finished Preparatory studies Y. M. C. A. Preparatory School, Chicago, Ill. Took special courses in Physical Education Lake George, N. Y., Lake Geneva, Wis., and Battle Creek, Mich., and taught this subject 2 years in Chicago. Entered Bennett in 1912.

As president of the Senior class Dr. Boyer has exhibited a most laudable altruism which characterizes his attitude toward both classmate and friend.

Member of Phi Delta Fraternity.

"Life to be complete, ideal,

Must not be lived alone."

Maurice William K. Byrne, B. Sc., first saw light on April 10, 1891. He received his early education at the grammar schools of Chicago and later attended the Y. M. C. A. high school, furthering his knowledge at St. Cyril's College, he later obtained a B. S. C. degree from Loyola University. Seeking a professional career, we find him entering Loyola with the class of 1916. Dr. Byrne by his studious habits and dignified manners has acquired him great popularity. He was elected Editor in chief Freshman class. Business Manager of the EM DEE, 1st vice-president of the Senior class and Senior Member of the Student Council. His splendid attainments and constancy of friendship will beget for him a brilliant and successful career. Dr. Byrne is an active member of the Phi Delta Epsilon Fraternity. Historian and Fellow of the L. S. R. S. and also a member of the Knights of Columbus.

"The world turns aside to let any man pass who knows where he is going."

Alexander W. Burke was born in Chicago on Aug. 21, 1886. He received his early education at the Parochial schools of Chicago. Later he attended St. Viator's College, gaining much fame on the College baseball team. Desirous of a professional career, we find him entering Loyola in 1913, since when he has been active in class affairs, being elected Sergeant-at-Arms for Freshman year, Junior class President, and Valedictorian of the Senior class, which is conclusive evidence of his popularity.

Active member of the Phi Delta Epsilon, Catholic Order of Foresters, Knights of Columbus and Fellow L. S. R. S.

"When in doubt, play politics."

Allen P. Milliken, the Wanderer from the Quaker State, was the cause of an exciting time in Holbrook, Pa., on a bright and sunny morning, May 31, 1891. He graduated from the public school in 1907, attended Waynesburg High School, and spent three years in the Ministerial School at Bethany College, Bethany, W. Va. He began his medical career in the College of Physicians and Surgeons at St. Louis and after a three months' sojourn came to Bennett. An active member of the Phi Delta Medical Fraternity of B. D. C.; W. O. W., and President of the St. Louis Club.

Chairman autobiograph committee Junior year, assistant editorial staff Senior year; 2nd vice-president Senior class.

"Mighty oaks from little acorns grow."

Frank Heda was born in Hungary, July 8th, 1891. He received his early education in the public schools, and later entered the gymnasium, graduating in 1908, in which year he came to Chicago and later entered the profession of Pharmacy, passing the State Board in 1913. After several years of successful practice of pharmacy, we find him enrolling with the class of 1916. Dr. Heda has been an active member of the class, serving on the Advertising Committee of the Em Dec Board, and later elected Recording Secretary of the Senior class. Dr. Heda is a member of the Deta and Grand Chapters of Zeta Mu Phi and Alph Yodh He fraternities and Fellow of L. S. R. S.

"Always change the color of the medicine."

John Monroe McSparin, born Aug. 2, 1888, at Carrie Mills, Ill. He received his early education at that place. He later attended Valparaiso University from which he graduated in 1909. Desirous of being a follower of Hippocrates, we find him entering Loyola in 1912, and has been with since. Dr. McSparin, by his quiet, dignified mannerisms, and studious habits, has won him a vast number of friends who wish him an assured success. He was elected Treasurer of the Junior class, which place he filled with much credit. Active member of Phi Delta Epsilon, Fellow of L. S. R. S.

"Tender for another's pain, unfeeling for his own."

Louis Joseph Kan, born on May 5th, 1893, in Kiev, Russia, where he obtained his preliminary education. Came to Chicago in 1908. Attended the University of Illinois School of Pharmacy and became registered pharmacist in 1912. Entered Loyola University Medical Department in fall of 1912, and has been with the class of '16 since. Member of Loyola Scientific Research Society, Zeta Mu Phi Fraternity and Financial Secretary of Class 1916.

"Thy modesty is a candle to thy merits."

J. Arthur Keho. Born June 19th, 1885, Tacoma, Wash. Attended the Tacoma High School. Later attended the University of Puget Sound for two years. Studied pharmacy and devoted much time to chemistry and physics. Practiced pharmacy for several years. Entered Medical Department of Creighton University, Omaha, Neb., Sept. 1, 1912. Completed the Freshman and Sophomore years there. Entered the Medical Department of Loyola University October 1st, 1914. Member of Phi Delta medical fraternity and Corresponding Secretary of Senior Class.

"Necessity is the mother of invention."

Noreen Marie Sullivan was born in Chicago, May 10, 1893. She received her early education at St. Mels Grammar School. Being desirous of further knowledge, and of quiet, holy life for which she is inclined, we find her at the St. Mary's Convent in Limerick, Ireland, remaining there but two years, returning to finish her course at the John Marshall High School, graduating with class of 1912. At a very early age she was attracted to the study of medicine, and we find her entering the Illinois University School of Medicine, coming to Loyola as a Junior. By her winning ways and charming manners, she has won a host of friends who in turn wish and assure her of success.

Dr. Sullivan is a member of the Alpha Chapter of the Mu Sigma Phi, Catholic Order of Forester's and Assistant Corresponding Secretary of the class of 1916.

"Charms strike the sight, merit wins the soul."

Marcellin J. Chiasson was born at St. Joseph, Nova Scotia, Canada, Oct. 22, 1883. Graduated from the high school at Bangor, Me., coming to Loyola in 1912.

Dr. Chiasson is a member of the Phi Delta Epsilon Medical Fraternity.

"Whose earnest purpose never swerves."

Clifford Evan Van Slyke was born at Sinclairville, N. Y., on July, 4, 1886. After securing his early education at Sinclairville High School, he took a course in Physical Training at Battle Creek, Michigan, and finally at Chicago, Ill., where he was a Physical Director for two years. It was while thus engaged that our fellow classmate realized that his former vocations were merely stepping stones to the real ideal of his dreams, and that medicine was the final goal. Consequently he entered Medical College in 1911, and two years later matriculated at Bennett Medical College.

Dr. Van Slyke was Assistant Editor of our yearly publication, "The Em Dee" in his Junior year, and Sergeant-at-arms in his Senior year. He is a member of the Phi Delta Fraternity.

"I'm but a stranger here."

N. H. Nicholson was born in Sweden Dec. 20, 1885, coming to this country at 3 years of age. He received his early education in the public schools of Proctor, Vermont, later studying structural engineering in Pittsfield, Mass. Being both big of mind and body, Dr. Nicholson could not stand the said study of moving wheels and we later find him a graduate of the American College of Physical Education, Chicago, Ill. A desire for greater knowledge of the human organism possessed him and he entered Loyola as a member of the class of 1916. Dr. Nicholson's big heart and pleasant smile has won him hosts of friends who all join in assuring him of a hard earned success. Member of Phi Delta Epsilon Fraternity.

"He was in logic a great critic; profoundly skilled in analytic."

Frank X. Mock was born in Joliet. He received his early education at the Joliet Grammar School. He later attended the Lewis Institute from which he graduated in 1910. Desirous of becoming a follower of Hippocrates, he joined the class of 1916. Frank, by his wit, and good humor, has won great popularity in the class. As a cartoonist he won much fame, serving in that capacity on the Em Dee Board in 1915. In an appreciation for his success last year, Mr. Mock was elected Class Poet for 1916, and his vast number of friends join in wishing him success in his chosen profession.

"Why, then, the world's my oyster."

Chester W. Trowbridge was born March 30, 1893, at Findlay, Ohio. He received his early education at McComb, Ohio, also at Bartlesville, Okla. The profession of Medicine was too alluring for him to cease his student life so he entered the St. Louis College of Physicians and Surgeons but the call of Loyola brought him to Chicago and he entered the class of 1916 as a Freshman. Although Dr. Trowbridge has efficiently applied himself to the study of medicine he has lost no time in the study of music, at which he has made a grand success. He is a member of the Phi Delta Medical fraternity, the St. Louis Club and was elected "Class Will" of the class '16.

"My joy lies onward, my grief behind."

Robert Ross Kirkpatrick was born Nov. 2, 1888, at La Crosse, Kansas.

He received his early education in the common schools of his birthplace. He later attended Seymour High School of Missouri, from which he graduated. We later find him at the Springfield State Normal, completing two years' college work there. Planning a professional future, he entered Loyola in January, 1912. He received degree B. S. in 1915 from the University.

Dr. Kirkpatrick, large of mind and body, won many friends. He has been active in class affairs, being elected Secretary of the Junior class and Salutatorian of Senior class. He is an instructor in mathematics at the University proper, and instructor of embryology in the Medical Department.

Active member Phi Delta Epsilon and Fellow of L. S. R. S.

"He could distinguish and divide a hair 'twixt south and southwest side."

Irl S. Haney was born at Edwardsburg, Mich., Oct. 29, 1887. After finishing his grammar school education at Edwardsburg, Irl entered the Benton Harbor High School from which institution he was graduated. He then enrolled as a student at the Michigan State Agricultural College at Lansing, Mich., where he first conceived the idea of studying medicine. The year of 1912 found Irl a member of the Freshman Class and being of jolly and good humored nature the class elected him Historian in his Sophomore Year. In the fall of the Junior Year he was elected Vice-President of the Class and at present is Class Historian of the Senior Class. Dr. Haney is a member of the Phi Delta Medical Fraternity and has been appointed interne at Columbus Hospital.

Christ M. Stoycoff was born in Bulgaria, 1883. Received his early education in the public schools and gymnasia of the old country. Completed a four-year course of study in a military school for medical assistants serving afterwards in the Bulgarian Army Medical Corps for 3 years.

Came to U. S. in 1907. After an extensive travel throughout the states and N. W. Canada, working at all sorts of jobs, he took a course in half-tone etching at the Bissel College of Photo-Engraving, Effingham, Ill., working at this trade for a number of years afterwards.

In 1912, after completing his freshman studies in medical college, he went back to Bulgaria on a short visit, but war broke out before he could escape and had to take part in the victorious campaign of the Balkan Allies against Turkey, serving in the capacity of an army surgeon to a regiment of mountain artillery for 10 months. The war over he returned to Chicago with a silver medal on his right chest and pleurisy in the left and resumed his medical studies, choosing Loyola for his Alma Mater.

Dr. Stoycoff served on the editorial

Committee of the "Em Dee" and was elected editor-in-chief of the Senior Class. Received the degree of B. Sc. from the Sociological Department of Loyola University. Member of the Research Society and the Phi Delta Medical Fraternity. Served 8 months in the St. Francis Hospital, Evanston, Ill., and 2 months on Surgery and Obstetrics in the German Ev. Deaconess Hospital, Chicago, Ill.

"Procrastination is the thief of time."

Harvey Thomas Little was born Aug. 3, 1893. Graduated from St. Patrick's Academy and the Crane High School in 1910. He does not possess great physical strength and giant like stature, but he makes up for these characteristics in his intellectual ability, and is well known among the students by his sunny nature and jovial, good-humored disposition. Dr. Little is a member of the Catholic Order of Foresters, the Phi Delta Epsilon, the Scientific Research Society and Chairman of the Junior Prom Committee.

"To do a great right do a Little wrong."

William Wilson, alias Woodrow, was born in Chicago, 1890. He is a graduate of High School and has had special work in Hamilton University. Dr. Wilson is now standing at the portal of the future with an ancestry complimentary to a king and talents for all vocations of life. He is ready to enter the unexplored fields. Let us hope that he shall travel where no foot has trod and pave the way to peace and happiness for millions yet unborn. May he be the man with a scheme in mind pertaining to the complexities of life, which, when once made known to the world, will revolutionize thought, transform the modern life, and give a new incentive to the inquiring mind for truth.

Raymond M. Kelly, born at Sullivan, Wisconsin, February 6, 1891; graduated from Kendall, Wisconsin High School with class of 1909. After teaching school three years, he enrolled at Bennett in 1912. Served as Secretary of class in Freshman year, on Editorial and Social Committees in Sophomore year, as Associate Editor of Em Dee in Junior year, and this year as General Committeeman.

Will serve an internship at St. Anne's Hospital, commencing June 1.

He is a loyal supporter of all our class affairs and functions and the class extend their best wishes for a successful career.

Dr. Kelly is an active member of the Phi Delta Fraternity.

"Anybody here seen Kelly?"

David Vermont Omens, born June 20, 1887, in Baltimore, Md. After receiving his early education here he attended the German Classical of Baltimore for two years. He then came to Chicago and graduated from the Jewish manual training school, later attending Medill High School.

After taking a course in Mercantile enterprises he decided to study medicine and entered Loyola in 1912. He is a member of the Aleph Yodh He Medical Fraternity and also of the Loyola Scientific Research Society.

"Who pants for glory finds but scant repose."

Joseph R. Betthausen first caught a glimpse of daylight at Oakdale, Wis., April 28, 1889. He graduated from the Kendall High School in 1910 and taught in the Public Schools prior to taking up the study of Medicine in 1911, at which time he realized the materialization of his boyhood dreams. Since that time he has made good not only in the field of Medicine but also in the field of Matrimony. Dr. Betthausen was class historian in our Junior year and is a member of the present Executive Committee. Member of the Jefferson Lyceum Club.

"Speech is great but silence is greater."

Raymond Horace George was born at Leland, Ill., where he received his preliminary and high school education. This was rounded out by a more advanced course in the Armour Institute of Technology. Ray is the bulwark of the class—a veteran of the class, and ardent agitator of the Socialist party holding this as his axiom, "Failures are stepping stones to success." As president of the Sophomore class he proved his ability to defend the rights of others and won for himself a place of honor. He has a worthy ambition to scale the highest mount, and we wish him all the crowns that bedeck a victor's head and shall ever be proud that he was a classmate of ours. Dr. George was a member of the Editorial Staff Freshman year, President of the Sophomore Class, member of the Year-Book Committee Junior Year, member of the Scientific Research Society, member of the Executive Committee Senior Year, member of the Phi Delta Medical Fraternity and of the A. F. & A. M.

"He is a soldier fit to stand by Caesar and give direction."

Walter Dawson Hall was born in 1879 at Olney, Ill. Graduated from the Olney High School. Taught school in younger days. Served in Tanner's Favorite Regiment in the Spanish-American War and was sent to Colorado. Later engaged in various business enterprises and at a matured age took up the study of Medicine at Loyola University.

"Means well and is harmless."

Anthony J. Karal (Karalius) was born on Sept. 14, 1889, at Briedziai, Lithuania. He attended the public school at Lukshiai and normal school at Mariampole and Suvalki until 1904 when his Fatherland's call for freedom threw him into the ranks of the revolutionists. Later he was compelled to leave his beloved Lithuania and in 1909 came to this country.

He entered Loyola as a freshman and began to study medicine with all his inherited zeal.

Dr. Karal is widely known among Lithuanians as a writer and social worker of great talent. He is a member of many Lithuanian progressive and educational societies and is very popular among his countrymen.

"I would rather be a lamp post in Chicago than Mayor of Briedziad."

George A. Klein, born in New York City, N. Y., where he received his preliminary education, attending the Holy Innocent Academy. Came to Chicago in 1910, and attended St. Ignatius Academy. Entered Loyola University Medical Department in fall of 1912, and has been with the class since. Member of Executive Committee and Treasurer of Alpha Phi Chapter Phi Delta Fraternity.

A. Caskie Pruner was born at Kennard, Nebraska, Jan. 3, 1892. Received his early education at public school of Kennard, Nebr., of same county in which born; following the footsteps of his father and brother, he decided to study medicine, entering the Ensworth Medical College of St. Louis, Mo., in 1911. He entered Loyola in fall of 1912 a Sophomore.

"Young Lochinvar came out of the West."

Joseph L. Soldinger first saw the light of day in Chicago Sept. 27, 1893. After finishing public and high school, he entered Loyola in the fall of 1912 where he has been a daily visitor ever since. Above all things he is perfectly square. Dr. Soldinger is a member of the Delta chapter of the Aleph Yodh He Fraternity.

"Wissenschaft ist die beste Kraft."

Grover Cleveland Goodwin was born in Rockport, Pike County, Ill., on November 11th, 1892. He received his early education in the common and high school of Rockport, and in 1911 entered Illinois College at Jacksonville, Ill., where he won the Varsity "I" in baseball and was awarded an athletic scholarship for his prowess on the athletic field.

Grover entered the Medical Department of Loyola University and became a member of football squad of 1913 where he labored persistently until football was abolished by the faculty.

He has been a member of the L. U. baseball team since his arrival and was instrumental in defeating Northwestern U. in May, 1915, and in October he assisted Beaconsfield team of the K. of P. League win the city championship, also the championship of Indiana from the East Chicago team.

Grover is an active member of the Phi Delta Fraternity and Treasurer of the St. Louis Club.

"A brave soul is a thing which all things serve."

James V. Anderson was born in Dec. 14, 1891, at Burnsville, Miss. He received his preliminary education from the public and high schools of Crawford, Tex. Was manager of the base ball team for two years. His first ambition was to become a big leaguer. Played with the Ft. Worth Tigers of State League, pitching the one season. Later he decided to take up the profession of Medicine, taking his first year in St. Louis. Entering Loyola University in 1913. Athletic Director of Loyola University.

"Take your base."

Walter Lee Brandon was born at Carbondale, Jackson county, Ill., May 20, 1894.

In his boyhood, his parents moved to Essex, Mo., which is his present home. He received his early education at the Southern Illinois State Normal University at Carbondale, and by his association with his brother, Dr. J. P. Brandon, Walter decided to study medicine and in the year 1912 he entered the Medical Department of National University of Arts of Sciences of St. Louis, Mo. Later coming to Loyola, to finish his work, he entered the class of 1916.

He is a member of the Art, Wit and Humor Committee of this class and also a Sergeant-at-arms of the St. Louis club, and a member of the A. F. & A. M. Essex, No. 278.

"Things out of hope are composed oft with venturing."

George Penn Dillard first hit the trail of the Lonesome Pine in the Blue Ridge mountains at the little town of Figsboro, Oct. 7, 1892, at which time he was immediately labeled the future doctor of the family. Nor has he caused anyone to feel disappointed, for he went straight ahead to make good and has done so. His preliminary education was completed in the Martinsville High School. While there he decided to become a disciple of Esculapius and entered the Maryland Medical College at Baltimore, Sept., 1912, being chosen president of his class. Dr. Dillard is a member of the Phi Delta Medical Fraternity.

"Not what we think or say; but what we do will have its effect on the world."

Charles W. Glover, born in Scottdale, Pa., Jan. 17, 1887. Early education gained at this place, he also received some of his education in Charleroi and Wheatland, Pa., and also in Europe. He took a special course in business in Cleveland, Ohio.

He is a member of the Masonic Order of Cleveland, and a member of the W. O. W. of Chicago, Ill.

He will receive his degree of medicine with the class of 1916.

"Who can foretell for what high cause this darling of the gods was born."

George E. Herschel, born in Bath, S. D., July 19th, 1889. Received his early education in Marshalltown Public School, graduating from Marshalltown High School in 1910. He was prominent in Iowa High School athletics, playing on all-Iowa football and basket ball teams in 1909-1910. Attended Coe College, Cedar Rapids. Entered Bennett fall of 1912. Organized the present Senior class and taking them through the class rush. Then he played in all the games of the famous Loyola football team of 1912 and 1913. He then was the man who pulled the largest social function in history of school, our Freshman dance. He has been with the class all four years and will return to his native state.

"Some are born great. Some acquire greatness. Some have greatness thrust upon them."

Raymond Bartholomew Thomas Sweany was born February 14, 1889, at Canton, Ohio.

His early education was attained at the public schools of this city. He graduated from the Canton High School, with the class of 1908. Following this he entered the University of Cleveland, attending that institution for a period of two years, and then became interested in the medical field, entered Tri-State College, Angola, Indiana, for a special course in chemistry. After remaining there one year, came to Chicago and matriculated at Loyola University with the class of 1916. Here Raymond has attained himself many warm friends and is noted for his wit and humor.

Dr. Sweany is a member of the Crescent Society of the Tri-State College of Angola, Indiana, and also an active member and Vice-President of the Phi Delta Medical Fraternity.

"Us Irish must together sticken, yes."

Nathaniel Van Voorhis Graves was born in Chicago on the 22nd day of September, 1889. Graduated from the Wells Public School and the Evanston Academy, in 1910. Having put two years in Liberal Arts at the Northwestern University, Evanston, he decided to venture into the profession of his distinguished father, and matriculated with Bennett in the fall of 1912. Besides intellectual ability Nath's characteristics are nobleness in every thought and willingness to serve—a worthy son of a worthy father.

Dr. Graves was our Treasurer during the first year; Sophomore Class Editor; Editor-in-Chief of the "Em Dee"; on the Picture Committee, Senior year. He is a member of the Phi Delta Medical Fraternity.

"Can't go to clinic today. My wife's going to help me select a necktie."

Frank Roy Maurer. Born Nov. 14, 1887. This young man was very appropriately named, for if there is one all-dominant factor in his personality, it is frankness. It is characteristic of him that whatever he enters into, whether it be study, athletics, or fun, he does so with all his might. Frank received his preliminary education in the town of his native birth, Stanford, Ill. But not being contented with the quiet life of the small town, he turned his footsteps toward Chicago where great opportunities in the field of Medicine awaited his coming and if his future is to be judged by the past, it speaks for itself. Dr. Maurer is a member of the Phi Delta Medical Fraternity.

"They can who think they can."

Clarence P. Harris was born July 14th, 1894, at Oakridge, Mo. He received his early education in the public schools and Missouri State Normal School at Cape Girardeau, Mo., from which he graduated. Desirous of being a follower of Hippocrates, we later find him entering the College of Physicians and Surgeons at St. Louis in 1912, coming to Loyola in January of 1913. Dr. Harris since his arrival has been an active member of the class, being elected Chairman of the Photographic Committee for the Em Dee, and Chairman of the Entertainment Committee, Senior class.

Dr. Harris is an active member of the Phi Delta Fraternity and Vice-President of the St. Louis Club.

"Ring out old shapes of foul disease."

Fredrick Joseph Cicotte, born in Detroit, Mich., Aug. 8, 1880.

† Attended Ecorse High School and later Detroit College. Entered Loyola University Medical School in 1912. Member Phi Delta Fraternity, Macatawa Boat Club Entertainment Committee. Has been a very active member of the class in social reform movements.

"Pull together, fellows! I'll boss!"

Ivan Lewis Finkelberg was born in Chicago on the 18th day of November, 1891, and received his education in the Chicago Public Schools. After spending three years in high school he concluded his course in the Central Y. M. C. A. Throughout his entire career in the class room he has been an ardent admirer of athletics, and has starred in every stage of games entered into. Likewise he has made good in other lines. Dr. Finkelberg is a member of the Scientific Research Society, the Knights of Pythias, the Entertainment Committee Senior Year and the Zeta Mu Phi Fraternity.

"I feel that I am happier than I know."

Henry Kruse was born Aug. 1886 in New York City, N. Y. Received his early education in this city, Hyde Park High and L. U., entering Loyola with the class of 1916.

Born in a big city, receiving his education in a big city, and being a big fellow, we expect big things from him.

Is a member of the Phi Delta Fraternity, C. M. Club, N. A. U. and A. F. of M.

"Long, lank and lean, just right for flying."

Walter Carl Mohr. Born in Denver, Colo., Oct. 12, 1893. That beautiful city of the golden west had no charms for our worthy friend. He soon came to Chicago where he obtained his early education. Having finished the Carl Schurz High School, he decided to venture into the medical profession. With a smile always on his cheery countenance, we have learned to like him and are happy to have him one of us. Dr. Mohr is a member of the Phi Delta Medical Fraternity.

"The beautiful are never desolate."

Irene Helen Showalter was born in Chicago, Ill., on July 31st, 1891. She received her early education at the LaSalle Grammar School of Chicago, and later attended the Robert Waller High School. Deciding that medicine was her calling, she entered Loyola, where by her pleasant manner and studious habits, she has won the respect and good will of the class.

"I will believe thou hast a mind that suits with this thy fair and outward character."

G. Franklin Anderson was born Dec. 30, 1886, at London, Ontario. His early education was received at this place and he attended high school at Hamilton, Ontario.

He is a member of the Chicago Chapter A. M. Fraternity. He also is a member of the C. A. M. C., Hamilton, Ontario, Canada.

Frank started to study medicine in the fall of 1911 and came to Loyola a junior and will start his chosen profession with the class of 1916.

"Sure, I can cure 'em."

Benjamin Augustus was born in 1884. After learning the three "R's" in the Public Schools of Chicago, and graduating from the Joseph Medill High School, he went out into the world, soon to discover that medicine was his calling. He is a graduate of the class of 1915 and, since graduation, has had considerable experience in general hospital work, serving creditably internships at St. Francis Hospital, Evanston, Ill., and at St. Anne's Hospital, Chicago.

If adequate preparation is the keynote of success, in any endeavor, then we feel assured that Dr. Benjamin Augustus will be successful in his chosen profession.

"The satisfied man makes little progress."

Bernard Benkendorf was born in Chicago, Dec. 26, 1892. Received his early education at St. Aloysius grammar and commercial school. He graduated from the St. Ignatius Academy.

Bernard has been with Loyola's class of 1916 since the beginning and played in the football team of the 1912 season.

Dr. Benkendorf will serve his internship at St. Elizabeth's Hospital.

"Improvement, like charity, begins at home."

S. L. Bossard was born at R. S. Junction, Pa., in 1886. Attended the public school and graduated from the Blooming Valley High School in 1903 and from the State Normal School of Edinboro, Pa., in 1907.

He was principal of the East Mead High School in 1909-10. Supervising Principal of Lumber City, Pa., High School in 1910-12.

Dr. Bossard matriculated at Loyola in 1912 and has been in attendance at regular annual sessions since. His home is in Saegerstown, Pa., and he is a member of the Lumber City Lodge, I. O. O. F. No. 871.

"May we meet upon the level and part upon the square."

Jose T. Bengoa was born in Coamo, Porto Rico, in May 11, 1886. Attended the private school "Escuela Particular de Ninos" in his home town, where he got his elementary education. Later he entered the college "Seminario Conciliar" in San Juan, P. R., completing high school and took two years of college. In 1904 he obtained by competitive examination from the government of Porto Rico a license to teach in the public schools and taught for seven years, being Principal of the School "Escuela Colon" in Ponce, Porto Rico, then he gave up teaching school and came to the United States to study medicine, entering Loyola as a Freshman in 1912.

Member of the Phi Chi Delta Fraternity. Grand Master of Omicrom Chapter, Chief Editor of "Mundo Latino" Fraternity magazine published in Chicago by the Phi Chi Delta.

"Worth, courage, honor, these indeed your substance and birthright are."

Everett Rhea Brown was born at Ken-see, Kentucky, Dec. 23, 1891. He received his early training at the Render, Kentucky, Public Schools, the Central City, Kentucky, High School and Bethel College at Russellville, Kentucky, where he played on the Bethel College baseball and basketball teams, which took the championship of that part of the State. He then took a complete business course at the Bryant & Stratton Business College at Louisville, Kentucky, from which he graduated in 1909, after which he went to St. Louis, Mo., and entered the employ of a large medical house, at the same time studying medicine for two years under Dr. Burnett, thus obtaining a good foundation for the study of medicine before entering Loyola University.

Dr. Brown is a member of the St. Louis Club and a member of the Alpha Phi Mu, Phi Delta Chi and Phi Delta fraternities.

"All our knowledge is ourselves to know."

James Blaine Brown was born in Chicago, Illinois, on February 3rd, 1884. He received his early education at the Public Schools of Toronto, Ont., and Chicago, Ill. Being conversant with history and especially that of Galen and Hippocrates, we find him following their teachings. He entered Loyola with the class of 1916, and has proved an excellent addition to the class. Quiet and dignified of nature, with studious habits, he has gained a vast number of friends who in turn join and wish him an assured success.

Dr. Brown is an active member of the Phi Delta Fraternity.

"He done his durndest, Angels could do no more."

Anna Buehler first saw light in Chicago March 26, 1888. She received her early education at the public schools of her birthplace, and later graduated from the Wendell Phillips High School. Seeing the advantage for women in the professional world, she entered Loyola in the fall of 1912. Dr. Buehler, by her studious habits and pleasant manners, has won her a vast number of friends who all in turn wish and assure her of success.

"Not a day without something done."

Nathan Bronfeld was born in Russia, April 15, 1886. He received his preliminary education in New York City. Commencing the study of medicine in 1910 he entered Loyola and is on the roll with the class of 1916.

Dr. Bronfeld is a member of the Aleph—Yodh He Medical Fraternity. The class all wish Dr. Bronfeld a great success in his medical work.

"He draweth out the thread of his verbosity finer than the staple of his argument."

Joseph P. Chiasson was born May 24, 1880, at St. Joseph, Cape Breton, Province of Nova Scotia. He received his early education at that place, and graduated from Loyola in 1911. Dr. Chiasson decided to study medicine, and we find him matriculating at Loyola in 1912. Dr. Chiasson having a quiet, unassuming disposition, has won him a vast number of friends, who all in turn wish him a hard earned success. Active member of Phi Delta Epsilon.

"We are but warriors for the working day."

Timothy Chiasson hails from Eastern Harbor, Province of Nova Scotia, Canada. He was born February 16, 1889. He received his early education in the public school of his native country, and later entering the high school from which he graduated in 1908. Not satisfied with his educational qualification, we later find him on roll call of the class of 1916.

"Boldly, successfully, faithfully."

Finis F. Davidson took his first breath and announced his arrival into this world on Sept. 3, 1884, in Eddyville, Pope Co., Ill. After completing the common school course, he attended high school at Golconda, Ill.

Having made his mind up to enter upon the study of medicine, Davidson matriculated at Loyola in 1912. In him we found a loyal classmate and an industrious student.

Dr. Davidson is a Master Mason since 1907, and a member of the Phi Delta Epsilon Fraternity.

"Beyond the poet's sweet dream lives
The eternal epic of the man."

Leon J. Perez de Alarid, B. Sc., born in Mexico City, Mexico. Graduated with highest honors from high school in 1898, receiving Silver Medal from former President Porfirio Diaz. Later pursued course in Electrical Engineering in the Mexican Government Schools, at the City of Mexico, graduating in 1902. B. Sc. conferred by Loyola University, Class 1916. Matriculated Loyola Medical School 1911.

"Man can achieve what man can conceive."

Willis T. Dixon started his early travels at Ford County, Kans., June 7, 1890. He received his early education in the public schools of Benton Harbor, Michigan, graduated from high school in 1909, and became a registered pharmacist in 1910.

Then the desire of new fields seized him, resulting in a matriculation at Loyola with the class of 1916.

"One never loses by doing a good turn."

Thomas Dobbins breathed the first fresh air of Mother Nature in the Windy City in 1886, but was destined to spend only a short time here. He soon moved to the Sunny South where he spent his boyhood days. The State Normal at Chillicothe, Mo., had no charms for him so he entered the U. S. Navy Hospital Corps and graduated from the Naval Hospital School, Norfolk, Va., with the class of 1905. After his graduation he made many interesting cruises and spent considerable time in the Canal Zone. Later he entered the U. S. Army Hospital Corps serving at many of the large army posts and island possessions. It was at the expiration of this term of service with the army on the Mexican border that he decided to return to a more simple life, so came to Chicago in 1911 to enter the study of Medicine. Since his arrival we have come to consider him the kind of a man who will in later life spell success with capital letters.

"Deserve success and you shall command it."

Francis A. Dulak, Ph. G., born Nov. 20, 1890, at Milwaukee, Wis. His preliminary education was received at public schools of this place, and at Marquette Academy University.

A graduate in pharmacy in 1912. He studied medicine at the Chicago College of Medicine and Surgery and later came to Loyola and will graduate with the class of 1916. He was a pharmacist and anaesthetist at Trinity Hospital in Milwaukee for two and one-half years.

"The man that made Milwaukee famous."

Royal Wade Dunham was born June 30, 1890, at Angola, Ind.

He attended the public schools of Angola. He later took one year of commercial training at the South Bend Business College, South Bend, Ind., from which he graduated in 1910, receiving further preliminary training at the University of Chicago.

Dr. Dunham matriculated at the Loyola in September, 1912, where he has remained for the past four years.

He is an active member of the Alpha Pi Chapter of the Phi Delta Medical Fraternity.

"A clear conscience and a good digestion can't be beat."

James V. Eterno, born April 26, 1895, at Biscari, Italy. His early education was received in Italy. He came to United States in 1905, and finishing his high school work at Valparaiso, he studied music at the Valparaiso University in 1912.

As medicine seemed to be his calling he matriculated with the class of 1916 at Loyola.

Promise little and do good.

Jose B. Gotay. Was born at Penuelas, Porto Rico, in May 10, 1894, where he completed his earlier education. Began my high school at Ponce and finished it at Milton College, Baltimore, Md.

Entered the Maryland Medical College in 1912 where I studied my freshman year. In 1913 moved to Chicago where I became a member of the 1916 class at the Bennett Medical College.

Milton Don Flanary gladdened the hearts of his parents, at Mouth Card, Pike Co., Kentucky. He received his early schooling at Mouth Card and further preliminary training at the Kentucky Normal College, Louisa, Kentucky.

Preferring medicine above all other professions, Dr. Flanary started the study of medicine at Knoxville, Tenn., Sept., 1912, where he remained until 1915. Later realizing the advantages for the study of medicine in Chicago, he matriculated at Loyola.

Dr. Flanary is an active member of the Lambda Chapter of Chi Zeta Chi Medical Fraternity.

"Great things thro' great hazards are achieved."

Oscar J. Fuentes, BSC., AB., was born at Heredia, Costa Rica, on Dec. 25, 1891. Receiving his grammar school education at the Escuela Publica de Heredia, entered the Liceo de Heredia and Augustin College in 1904 and graduated in 1911. Oscar was a great foot ball player in his college life.

He matriculated as a medical student at Philadelphia in the fall of 1912 and came to Loyola a sophomore in 1913. He is a member of the Loyola Research Society and also the Phi Chi Delta Fraternity and an interne at the Douglas Hospital of Chicago.

Dr. Fuentes certainly deserves much credit for his accomplishments and will doubtless reap a harvest in proportion to each effort spent. In addition to his medical training Dr. Fuentes has the gift of speaking three different languages.

"The world turns aside to let any man pass who knows where he is going."

Francis H. Gburczyk was born Jan. 19, 1894, at Joliet, Ill. He received his early education at the Holy Cross School, Joliet Ill., later entering St. Stanislaw College, Chicago, Ill., graduating in 1912. With medicine as his life's work, Francis entered Loyola Medical College in 1912. By his good nature he has gained the friendship of all his classmates who join in wishing him a hard-earned success.

Captain of the baseball team, 1914-15.
 "The pen is mightier than the sword."

Charles F. Glasener gladdened the hearts of his parents at Rose Hill, Ill., Aug. 21, 1882, and here he spent his early years and where he received his preliminary education. Chicago, however, soon attracted him and we find him at Loyola with the class of 1916. In medical college he has demonstrated his ability as a student and his skill with the knife. Dr. Glasener is a member of the I. O. O. F. and the M. W. A.

"Cordial and courteous—a gentleman in and out."

Harry Gomberg was born Jan. 8, 1887, in Kieff, Russia, and received his early education there but the Stars and Stripes soon tempted him to the Land of the Free, where he at once took advantage of the opportunity to finish his preliminary education at Valparaiso University and Marion Normal College. His thirst for knowledge, however, was not yet gratified so he matriculated with Loyola to obtain a medical education, the great ambition of his life. He is well liked by his associates. Dr. Gomberg is a member of the Aleph Yodh He fraternity and of the Hebria.

"Brevity is the soul of wit."

Luis M. Graulau, born in Quebradillas, Porto Rico, March 14, 1893. He received his early education in this place and was honorary member of the Minerva Literary Society at Bayamon, Porto Rico, later, coming to the United States he entered the university in Valparaiso, Ind.

Being enthusiastic in his thirst for knowledge Luis decided to study medicine and came to Loyola in 1912. The class of 1916 all wish Dr. Graulau a very successful career.

Mark Dunne Gundrum was born at Angola, Ind., March 26, 1889.

He received his preliminary training at the public schools and Tri State College at Angola. He received further preliminary training at the Physical Culture Training School of Chicago.

Dr. Gundrum entered Loyola September, 1912, where he has remained for his four years of medical training.

Member and recording secretary of the Alpha Pi Chapter of the Phi Delta Medical Fraternity.

"A happy heart makes a blooming visage."

Perry Vernon Hartman, born March 18, 1879, at Boone, Iowa. Graduated from Boone Public Schools in 1892. Graduated Drake University Pharmacy School, Des Moines, Iowa, Jan. 1, 1900. Owned and operated 3 drug stores of his own until the fall of 1910.

Entered Medical College September, 1, 1910, and graduated June 1, 1915. Passed Illinois State Board Examination June 15, 1915. Then entered Loyola University same month and is still with us.

Health Officer, City of Chicago, for nearly 4 years. He wishes to make this statement to prospective medical students: If you think it is a hard row to hoe alone to obtain a medical education, what would it be with 5 children and one wife? Yet I have done it, and know any man of ordinary gray material and energy can attain what I consider the highest of professions—a medical one.

"In union there is strength."

George C. Haughey was born Oct. 24, 1891, in Pittsburg, Pa. He received his early education at the Indianapolis Parochial School and later attended the Indianapolis high school from which he graduated with high honors. Desirous of being a follower of Hippocrates we find him entering Loyola University Medical School.

Dr. Haughey is a member of the Phi Delta Epsilon and Alpha Phi Mu.

"Who does the best his circumstance allows does well, acts nobly; angels could do no more."

John Ernest Heiss was born May 20, 1886, at Morrison, Ill. He attended the public and high school of this place. Later we find him a student at the Dubuque College in Dubuque, Ia. A graduated Osteopath in 1911.

Deciding to study medicine John chose Loyola as his Alma Mater and has been with us the entire four years.

Dr. Heiss leaves us highly esteemed and we all join in wishing him a great success in his chosen profession.

"Nothing ventured, nothing won."

Russell Arthur Hennessey was born March 28, 1894 in Chicago, Ill. Attended public schools in Guthrie, Okla., Salt Lake City, Utah, and Delavan, Wis. Attended Delavan High until 1911. Entered Loyola 1912.

"Hello Rusty."

Karl J. Henricksen was born in Denmark in the year 1879, received his early education in his native country and came to United States at the age of 22. Entered Loyola University in 1911.

Dr. Henricksen although quiet by nature has won for himself numerous friends who join in wishing him an assured success. Member Phi Delta Epsilon Frat and member of the Masonic order.

"That spirit of his in aspiration lifts men from the earth."

Charles O. Highsmith first saw the light of day on July 28, 1885, at Flat Rock, Illinois. He received his early education in his home town, graduating from the Hoopstown High School, and later attending the Central Normal College of Danville, Ind. Having medicine as his goal Charles entered Loyola University Medical College with the class of 1912. Charles by his good nature and genial manner has won a host of friends who join in wishing him an assured success.

Treasurer of Sophomore Class.

Active member of Phi Delta Epsilon Fraternity.

Fellow of the L. R. S.

"Responsibilities gravitate to the man who can shoulder them and power to him who does."

Luther Byre Highsmith, born Nov. 2, 1887, at Flat Rock, Ill. He received his early education at the public schools of Crawford and Iroquois counties. He later attended Grier College at Hoopston, Ill., graduating in 1906, attended Central Normal at Danville, Ind., 1908-9. Taught in graded schools of Crawford for a number of years.

Dr. Highsmith, planning a professional career, entered Loyola in 1912, where we have found qualities of a genuine chap. He has won a vast number of friends who assure him of the greatest success.

Active member of Phi Delta Epsilon, Fellow L. S. R. S.

"Who shall decide when doctors disagree?"

Siegmund Hirschfeld was born in Germany on Aug. 24, 1869. His early education was obtained in schools of his native country, and later attended a preparatory high school at the Koenigliches Gymnasium. He came to Chicago in 1900, and desirous of further knowledge we find him entering the Harvey Medical College, remaining there three years, coming to Loyola as a senior. Dr. Hirschfeld's studious habits, and hard work has won for him a host of friends who all wish him success.

Dr. Hirschfeld is a member of the Field Hospital Co. No. 1 Illinois National Guards, in which corps he holds the rank of Sergeant.

"He was the mildest manner'd man that ever scuttled ship, or did a tracheotomy."

Charles Hradniansky was born in Hungary, Jan. 17, 1889. Seeking knowledge he came to United States in 1909. He graduated from St. Procopius College at Lisle, Ill.

Charles entered Loyola and will graduate with the class of 1916.

"His valor and his generous mind—
Prove him superior of his kind."

Samuel Meyers Hubbard, born Sept. 8, 1889, at Knightstown, Ind. He later moved to Benton Harbor, Mich., where he received his early education. He attended the high schools there, graduating in 1909, and Benton Harbor College in 1912. Registered Pharmacist in Michigan same year. Dr. Hubbard, though quiet and dignified has won him a vast number of friends, who wish him future success.

Dr. Hubbard is Chief Hospital Stewart, Great Lakes Squadron, U. S. S. "Don Jaun de Austria," United States Naval Reserve. Active member of Loyola Research Society.

"My country, right or wrong."

Edward T. Hurley was born Jan. 29, 1881, at Oil City, Pa. He received his early education in the town of his birth, and later moved to Conneaut, Ohio, where he entered the high school, graduating in 1899 with high honors. Being conversant with history and especially that of Galen and Hippocrates, he decided to follow the teachings laid down by them. We find him entering the Loyola University Medical School. Dr. Hurley, by his dignified, quiet and studious habits, has won him a vast number of friends, who in turn assure and wish him the greatest of success.

Dr. Hurley is a member of the Phi Delta Fraternity and Knights of Columbus.

"Not to know me argues yourself unknown."

Lewis L. Jackson was born July 2, 1883, in Saline County, Ill. He received his early education in the common schools of Saline County, Craborchard academy, and Stonefort high school. After completing his early education he engaged in farming, later taught school, and finally engaged in the mining industry. Not being satisfied with any of these he enrolled at Bennett with the great class of 1916. He is a member of the I. O. O. F. No. 874 Carrier Mills, Ill.

"Old Hickory."

J. Jonikys was born in Lithuania, Russia. He received his early education at his birthplace. He crossed the waters in 1907. Being conversant with history, especially that on Hippocrates, we find him entering Loyola, with the class of 1916. He is a loyal worker, and has gained many friends who in turn assure him a well deserved success.

"Worth makes the man."

Frank Kadlitz was born on November 21, 1889, at Chicago, Ill.

He received his early education at the public schools of Chicago, and later received private instructions at the Johnstone school. He was one of the successful students in passing the Superintendent of Public Instruction examination (State of Illinois).

Dr. Kadlitz being desirous to follow the line laid down by Hippocrates, we find him entering medical college in 1912 and coming to Loyola as a junior. Dr. Kadlitz, although quiet by nature, has won for himself numerous friends, who join in wishing him an assured success. Dr. Kadlitz is active member of the Alpha Phi Mu.

"He that climbs the tall tree has won right to the fruit."

Wladyslaw F. Kalisz was born August 30, 1890, in Luzna County, Galicia, Austria. Receiving his early education at Gorlice and attending the K. K. Gymnasium at Nowy Sacz came to United States in December, 1909, and was engaged in the drug business until 1912, when deciding to study medicine matriculated at Loyola and will graduate with the class of 1916.

President Polish University Society.

"Who shall decide when doctors disagree?"

Arnold H. Kegel, B. S. Was born Feb. 21, 1894, at Sioux Falls, S. Dak., where he spent his early childhood. Soon he moved to Lansing, Ia., and there received his grammar and high school education. He later attended the Classical Course at the Presbyterian Theological School of the Northwest at Dubuque, Ia. Having given theology a two years' trial, Dr. Kegel's preference directed him toward medicine. Thus we find him with the class of 1916, having taken his B. S. degree in the Loyola University School of Arts and Science. Dr. Kegel is a member of the Phi Delta Medical Fraternity.

"In the lexicon of youth which fate reserves for a bright manhood, there is no such word as failure."

Sarkis K. Keshishian was born March 12, 1886, at Marash, Armenia, where he received his early education. Later he attended one of the American Missionary Colleges, Central Turkey College at Aintab, where he graduated with an A. B. degree in 1908. After teaching two years in high school, he crossed the Atlantic and once here he lost no time in announcing his presence. His first two years were spent in the Albany Medical College, Albany, N. Y., coming to Loyola to continue his course with the Class '16. Dr. Keshishian is like the peaceful brook that flows along the roadside, still, quiet and harmless, yet doing his duty.

"Ambition is the spur which makes men struggle with destiny."

John Anton Kollar made his debut into the world in which he is destined to make his mark, at Pana, Ill., on January 8, 1892. He received his preliminary education in the Sacred Heart school and the Pana Township High School, graduating from the latter in 1907. In athletics John has played an active part and since his arrival at Loyola he has been prominently connected with class affairs. He is a good natured chap and has earned the friendship of his fellow classmates. Dr. Kollar is a member of the Knights of Columbus, the B. P. O. E. and the Phi Beta Pi Fraternity.

"The optimist sees the doughnut; the pessimist only the hole."

Fay E. Kunce was the cause of an excitement of Minier, Ill., on Dec. 23, 1880, later moving to Hopedale, Ill. He received his early education in his home town, graduating from the Hopedale High School in 1898. For years he worked in department stores, served as Postmaster of Hopedale before making up his mind to venture into the medical profession.

Dr. Kunce is a member of the Knights of Columbus, the Alpha Phi Mu and Phi Delta Medical Fraternities, and the Hospital Corps of the Illinois National Guard. Esteemed of all who know him.

"He serves all who dares be true."

J. H. Leguen, born on Dec. 19, 1891, at Guantanamo, Cuba. Received his early education at the public schools of this place. In 1907 he matriculated at the Provincial de Oriente, Santiago de Cuba where he studied three years at school. In 1910 came to United States and entered the E. P. S. and the Manhattan Collegiate of New York, graduating with the class of 1912.

Commenced his medical training at the Temple University of Philadelphia, coming to Loyola a Sophomore.

"Act well your part, there all the honor lies."

Earl Kemmer Langford was born at Cambridge City, Ind., April 12, 1891, moving to Omaha, Nebr., in 1902. After graduating from the Omaha Grade School and the Omaha High School, he attended the University of Nebraska.

Dr. Langford is the Resident Pathologist at Mercy Hospital, member of the Loyola Research Society and the Phi Delta Epsilon Medical Fraternity.

"I teach that differently at the Northwestern, Doctor."

Henning O. Lindholm was born on June 4, 1891, in Landskrona, Sweden, but spent only a few years in the land of the midnight sun, removing to Chicago where he received his early education in the public and high schools. After graduation he was associated with several western railroads as accountant but finally conceded that his vocation was medicine, so he dropped all his undertakings and entered the medical department of Loyola University with the class of 1916 having been with us the entire four years.

Dr. Lindholm is a charter member of the Xi chapter Phi Delta Epsilon Fraternity, also the Loyola Research Society.

"I'll make assurance doubly sure and take a bond of fate."

F. V. Malloy, born Feb. 16, 1891, and received his early education at St. Ignatius High School, graduating in 1911. The study of medicine being Dr. Malloy's highest ambition, he entered Loyola University Medical College in 1911. Doctor Malloy by his quiet manner has commanded the respect of all who knew him, and all join in wishing him an assured success.

"To do your best is all any man can do."

Bernardo Manduley was born at Holguin, Cuba, on April 8, 1887. Received his early education at the "El Divino Maestro," graduating from the "Instituto 2d Euseanza," Santiago, Cuba, in 1906. Later he came to the United States and having chosen Medicine for his profession he matriculated at Chicago College of Medicine and Surgery. The following year he was appointed Secretary to the Cuban Counsel in Chicago and left school.

Dr. Manduley joined the class of 1916 at Bennett, where he completed his studies. We wish him the best of success.

"He who won't be advised can't be helped."

Van Buren Mauriceau. Born Syracuse, N. Y., 1886.

"Nothing else, please."

E. V. Mayer hails from Chicago, Ill. He first saw light May 27, 1886. His early education was obtained at the schools of Chicago, from which he graduated. Desirous of furthering his knowledge, with instinct for the subject of medicine, we find him entering Loyola in the fall of 1912. Dr. Mayer, though quiet and dignified, has many excellent qualities and has the wishes of all for a future success.

Dr. Mayer is an active member of the Catholic Order of Foresters and Knights of Columbus.

"In self-control is the secret of power."

James Thomas McFaddin was born at Mendota, Va., Jan. 16, 1893.

He attended the public schools of Mendota, and received further preliminary training at the Hamilton High School of Mendota.

Preferring medicine above all other professions, Dr. McFaddin began the study of medicine at Knoxville, Tenn., in September, 1912, where he remained until 1915, and later recognizing the advantages for the study of medicine in Chicago, matriculated at the Loyola University in September, 1915.

Dr. McFaddin is an active member of the Alpha Beta Chapter of the Phi Chi Medical Fraternity.

"Every inch an honest man."

Ralph Dean McGuire was born on October 6, 1886, at Canton, Ill., moving later to Elmwood, Ill. He received his early education in the public schools of Elmwood and Peoria, Ill. Attended Brown's College, Peoria, coming later to Chicago and completing his preliminary studies at the Association Institute of the Central Y. M. C. A. He studied Optometry and worked as a refractionist for a number of years before deciding upon taking up Medicine.

Being a man of kind disposition and obliging personality Dr. McGuire is the beloved friend of all who know him. He will practice in Chicago, having chosen the Eye, Ear, Nose and Throat for his specialty. Member of the Phi Delta Medical Fraternity.

"Still waters run deep."

James Lyons Miller was delivered by our old friend Mr. Stork to his parents in LaCrosse, Wis., an indefinite number of years ago, and great was the rejoicing thereof. Since that time he has wandered greatly though not aimlessly. His early education he received in the public schools of Fargo, N. Dak., but for his high school diploma he navigated to Moorhead, Minn. Being discontented so far inland, he enlisted in the Spanish American War, spent two years in the Philippine Islands and took an active part in the battle of Manila Bay. Before his return to the United States this soldier of fortune visited Japan, the Hawaiian Islands, and numerous other points of equal importance. As a cartoonist, he is a man of no mean ability. Dr. Miller is a member of the Phi Delta Medical Fraternity, the Alpha Mu Fraternity and the A. F. & A. M.

"If the mountains will not come to Mahomet, Mahomet must go to the mountains."

Israel Nathanson, born in Russia, October 23, 1882. He received his preliminary education in the gymnasium Volin. Then entering the school of pharmacy. He came to United States in 1904 and was employed as druggist since.

Israel entered his medical studies in the Chicago Hospital, College of Medicine in 1912. He entered Loyola in 1913 and has been with us ever since, and will graduate with the class of 1916.

"He was a scholar and a ripe and good one."

Carl Martin Nielsen started his earthly travels at Copenhagen, Denmark, Aug. 23, 1882, but did not leave his native town until he graduated from High School and received his degree from the University of Copenhagen. He then took up the study of law but found the subject too dry and decided to take up Medicine and with Medicine as his goal he pushed forward with a determined will which has made him one of the most industrious men in the class. That his future will be successful is the belief shared by all.

"'Tis no sin for a man to labor in his vocation."

Martin N. Niggeling was born on Oct. 27, 1885, at Rensen, Ia. After the usual course at the public schools of Rensen he entered the St. Mary's High School of that town from which institution he was graduated. At the age of 15 he became a druggist's apprentice, later entering the Chicago College of Pharmacy. In the year of 1906 Martin became a registered pharmacist and began, what he thought his life's work, in earnest. It was while pursuing the gentle art of rolling pills and mixing emulsions that the Medical Profession appealed to him and he entered Loyola with the class of '16.

P. O'Farrel was born in Rock Island, Ill., Feb., 1887, receiving his preliminary education in his home town. Later came to Chicago and entered upon the roll at Loyola in 1912.

"One hour of glorious life is worth an age without a name."

A. N. Osborne made his first stop at Dungannon, Va., Jan. 29, 1887, and immediately made himself the most popular member of the family. His preliminary education in the schools of Virginia was not sufficient to satisfy his ambitious mind so his second stop was with the Maryland Medical College at Baltimore, Maryland. Having spent a year there he decided to pursue a greater and better field, matriculating with Bennett in the fall of 1913. Dr. Osborne has been a zealous worker since the day of his arrival and may this same earnestness and resoluteness of purpose always dominate his life.

"Earnestness alone makes life eternity."

Frank Passarella, Jr., was born in Chicago, Dec. 12, 1892. His early education was received in St. Catherens Academy and in the McKinley High School.

Having a great desire for knowledge, he matriculated at Loyola with the class of 1916.

"The man who wins is the man who tries."

John Pellettieri, R. Ph., was born March 23, 1889, at Laurenzana, Italy. He received his preliminary education at Chicago, Ill. Entered the pharmacy department of the University of Illinois, Sept., 1907, and graduated and was a graduate pharmacist in 1909. John received his license from the State Board of Pharmacy July 25, 1910.

His extensive understanding of compounding drugs was, however, exceeded by a greater desire to learn their various therapeutic actions. Thus it was that John matriculated with the class of 1916 and has been on the roll at Loyola ever since.

"Labor is the price of eminence."

William J. Pickett was born in Chicago, Aug. 29, 1893. After completing his early studies in the grammar schools, and graduating from the St. Ignatius Academy in 1911, he completed his freshman year at the Department of Arts and Sciences, Loyola University. In the fall of 1912, William entered the University of Chicago, returning to Loyola the following year. Since then he has been an active member of our class, an ardent admirer of athletics and a popular, good-humored classmate.

Dr. Pickett is the editor of the Medical Department, Loyola University Magazine.

"His flaming sheen like a beacon's light."

Thomas W. Plant tells us that he was born at St. Peter, Minn., on Oct. 8, 1883. Came to the land of the living—Chicago—where he received his early learning. Graduated from the Metropolitan Business College and McKillips Veterinary College but soon found he was pasturing in un-staple fields so at once decided to take up Medicine in the true sense of the word, coming to us at Loyola, where he has won the friendship and good will of all. Dr. Plant is a man of seriousness and dignity—serious, because life is serious—dignified, because the profession demands it.

"What shall move a firm and dauntless mind?"

Owen Poling was born June 22, 1885, in Kentucky, W. Va. Attended the county schools of Kentucky and later attended the Ripley Normal School for teachers. Later teaching for nine years on a state certificate.

Not being satisfied to remain a teacher he prepared himself for the study of medicine in the Deichmann Preparatory College of Baltimore.

He entered the Maryland Medical College in 1912 and coming to Loyola a Sophomore has been with us ever since.

"No great deed is done by falterers who ask for certainty."

Arthur Porter started his early travels at Martin Co., Indiana., June 29, 1879, near the home of the famous Pestalozzi. His early education was received in the district school, graduating at the age of 16. He took a teachers course at the Southern Indiana Normal College and later a teaching course which he followed for nine years, filling positions of honor and trust in his said calling.

Having been preceded in the profession by two brothers, Arthur decided medicine was his right calling and after receiving a Bachelors Degree of Science he took up the study of medicine at the Barnes School of Arts and Sciences at St. Louis in the fall of 1912, and entering Loyola a sophomore in 1913.

"Those who know thee know all words are faint."

Benj. W. Provost was born June 12, 1888, at Peru, N. Y. He received his early education at the grammar schools of Peru and is a graduate of the Peru high school. Dr. Provost was attracted by the study of Physical Perfectness and we find him graduating from the American College of Physical Education, being a born student he entered Loyola with the class of 1916 to further his knowledge of the human anatomy. Dr. Provost's good nature and studious habits have won for him the good will and wishes of all his comrades and we all join in wishing him future success. Member Phi Delta Epsilon Fraternity.

"All are men,

Condemned alike to groan;

The tender for another's pain,

The unfeeling for his own."

Alfred G. Rasck was born at Des Moines Ia., on Feb. 13, 1882. Graduate of the public schools of this city.

Having decided upon medicine to be his goal, he matriculated at Loyola.

Dr. Rasck has won the friendship of many friends, all of whom predict a successful career. He is a member of the Alpha Phi Mu, and the Phi Delta Fraternity.

"It's a wise man who can hold his tongue."

William Roscoe Read first saw the light of day Dec. 4, 1893, at Waseca, Minn. He migrated to Chicago and graduated with honors from the grammar schools and later Crane High School of this city. Making a professional career his aim in life Dr. Read entered Loyola with the class of 1916. Member Phi Delta Epsilon.

"Errors like straws upon the surface flow.

He who would search for pearls must dive below."

H. K. Rey, born in Korea, July 14, 1890, where he received a part of his early education. In 1905 he came to United States and entered Delaware Public School in Ohio. Later we find him attending Wesleyan University, in the year 1906, pursuing a course in medicine. He left the University of Wesleyan and matriculated at University of Illinois in 1911, but later came to Loyola University, selecting her as his Alma Mater.

Dr. Rey is a member of Medical Science Society of America, also President of Korean Student's Association in America during year 1912-1913.

"Equal to every trial, every fate, he stands."

Samuel Junius Rogers, A. B. was born February 3rd, 1879, at Marion, South Carolina. After graduating from the common schools he prepared for college at Wofford Fitting School, Spartanburg, South Carolina, graduating from same in June, 1906. He was on football team there. Afterwards he taught school for four years. Deciding medicine was his calling, he entered the Medical College of the State of South Carolina in October, 1912, where he completed the first two years of his studies. In October, 1914, he matriculated with the University of Maryland, coming to Loyola as a Senior in February, 1916.

"Well, you know, some Eastern schools ain't so much better'n this."

Rollo Bielhy Sarginson was born July 22, 1888, at Chesterfield, Ill. He received his early education in the town of his birth and later entered the Litchfield High School from which he graduated in 1907. We later find him a student of Pharmacy at the University of Illinois, graduating in 1911. After several years of successful career in the drug business we find him entering Loyola with the class of 1916. Dr. Sarginson is an active member of the Phi Delta Epsilon and Kappa Psi fraternities.

"I do all that may become a man."

Isadore Schwager was born December, 1889, in Kiev, Russia. He attended the gymnasium in that place in 1901, went to Winnipeg, Canada, and completed his college education at the Manitoba College. Leaving Winnipeg he went to New York in the employ of the New York Railroad Company. Later he selected Medicine as his chosen field. Spending his freshman year with the Chicago College of Medicine and Surgery he came among us as a Sophomore.

"Those who know thee, know all words are faint."

Norbert I. F. Szubczynski saw the light of day first in Manistee, Mich, and at the age of two migrated with his folks to Chicago. He received his early education at Holy Trinity Parochial School with honors and entered St. Francis College at St. Francis, Wis., remaining there for two years, later finishing his academic work at St. Ignatius College. Norbert's greatest ambition in life was to be a doctor, we find him entering Loyola University Medical College with the class of 1912. By his genial manner and good nature he has made a host of friends who join in wishing him success. Member football team, 1912; baseball team, 1913.

"Success comes only to those who work."

Anthony Sodaro born in Vallelungo, Italy, on March 18, 1884. Received his preliminary education there until nine years old. He then came to United States and entered a grammar school in Chicago and after graduating went to Appleton, Wis., and graduated from high school. In 1913 we find him entered on the roll at Loyola hoping to become a successful M. D.

"Cares are employments and without employ the soul is on a rack."

Helen F. Stefanski gladdened the hearts of her parents on the 28th of January, 1893. She received her early education at Wm. K. Sullivan and St. Michael's Parochial Schools, completing her high school work at Loyola University. Later she attended the Illinois Post Graduate and Training School for Nurses, and served at the Homeopathic Hospital. Preferring Medicine above all other professions she matriculated at Loyola in 1912.

Dr. Stefanski is a member of the Polish National Alliance, and the Polish Roman Catholic Union.

"To have what we want is riches.
To be able to do without is power."

Harold Swanberg was born at Philadelphia, Pa., on July 23, 1891. After graduating from the public schools, he attended the Central High School, St. Joseph's College and Temple University in the city of his birth. Prior to taking up the study of Medicine he spent four years investigating Sodnal Therapeutics and doing research work in Anatomy and Histology under Harris E. Santee, A. M., Ph. D., M. D., at the Anatomical Laboratory of the Chicago College of Medicine and Surgery.

Dr. Swanberg is a member of the American Association for the Advancement of Science, assistant in the Histological Laboratory; undergraduate College of Arts and Sciences, Loyola University; and author of "The Intervertebral Foramen," "The Intervertebral Foramen in Man," etc.

We wish him a future suitable for his scholarly inclined and ambitious mind, and success in his work.

"Great is the dignity of authorship."

Charles A. Swanson was the "new arrival" at Watertown, Ill., on Feb. 4, 1892. Charles received his grammar school education in his native town and later graduated from the Moline High School. The opportunity to study Medicine having offered itself he immediately availed himself to it and entered class '16. During the time spent with us we have found him to be an earnest, diligent and willing worker in his studies. He is very well liked and has the friendship of all his class associates.

"They can conquer who believe they can."

Harry T. Swanson was born in Chicago Aug. 8, 1889, and received his preliminary education in the schools of Chicago. He was attracted by the study of Medicine, matriculating with the class of 1912 and his studious nature has overcome those obstacles only known to medical students. Dr. Swanson although quiet by nature, has won for himself hosts of friends who all join in wishing him a hard earned success. Member Phi Delta Epsilon Fraternity.

"Force is of brutes but honor is of man."

Ernest P. Van Arsdall was born in Hymera, Ind., Sept. 6, 1887. He attended the public and high school there.

He was a telegraph operator for five years for various railroads of the middle west. He took up Optometry and following the profession for two years met with a desire to study medicine and entered Loyola as a freshman with the class of 1916 remaining with us the entire four years.

"He has done the work of a true man."

George M. Wells was ushered into this universe at Summer Shade, Ky., June 29, 1887. He graduated from the Summer Shade High School in 1905 and taught in the public schools until 1911, at which time he made his triumphant entry into the medical profession. Kentucky has produced many illustrious sons and many who will rise and do honor to her name. We are hoping that Dr. Wells may not be an exception to this rule.

"Our business in the field of fight,

Is not to question, but to prove our might."

Max Bernard Wolfson. Born in Chicago Jan. 18th, 1892. Received his early education in the Garfield School of this city, graduating in 1906, later graduating from the Medill High School. Dr. Wolfson matriculated in Bennett Medical College in 1909, later going to New York. In 1915 he returned to Chicago to finish his medical education in Loyola University Medical College. His friends join in wishing him an assured success.

"Success comes to those who work."

Everett Winfield Hodgkins, born Maine, 1886. Received early education primary schools of Maine and academic school. Studied medicine three years at the University of Vermont, Burlington, coming to Chicago and entering the senior class, February 1, 1916.

Member of Phi Chi fraternity.

Ph. G., Massachusetts College, Pharmacy, 1907.

"Think of glory but keep plugging."

William Carl Seale. Born at Philadelphia, Miss., Oct. 27, 1892. Spent his early days on the farm and in the County Schools, later spent three sessions in the University of Mississippi, the last one being the session of 1910 and 1911. In the fall of 1911 took up the study of Medicine and spent three successive sessions at Mississippi Medical College and University of Tennessee. After passing the Tennessee State Board of Health, the Junior year went out in Tennessee and practiced the profession for eighteen months at New Castle, Tenn., and now a student at Loyola University earning his M. D. degree.

"A wise physician skilled our wounds
to heal."

Is more than armies to the public weal."

Bessie Stokes was the cause of an excitement on a cold morning of December 17, 1893, at Jerico Springs, Mo. She obtained her early education in the public schools of Lawton, Okla., graduating from the Lawton High School in 1910. Her sympathies for suffering humanity lead her to choose Medicine for her profession and in 1912 she matriculated with the class of '16 at Loyola. Dr. Stokes served on the Social Committee during the Junior year. As a Senior she was in charge of the Dispensary Clinical Laboratory and during her last semester of the Senior year she was superintendent of the Dispensary.

Memorabilia of the Class of 1916

With unparalleled gratification, we, the Senior class of 1916, stand on the eve of our fourth year, and gazing back o'er the vista of trodden fields refreshed the reminiscences of past days by vividly recalling the pleasant associations with our worthy professors, our schoolmates and classmates, our athletic endeavors, our social successes, the political campaigns and last but not least, our intellectual attainments that thus far have marked the career of our class a decided success in our dear Alma Mater, Loyola University.

That these reminiscences may not be fleeting and transitory, we here present a memoir of our class that gives in a correlated manner a precise and accurate account marking the progress of our class in the sojourn of the past four years, dwelling lightly on minor and in detail on the more important events, so that in after years we may glance o'er these pages and find them a source for refreshing our memories of college days, and in marking the important milestones in the ascent to the higher fertile plains above.

Four years ago, the portals of Loyola opened wide beneath its colossal spires and turrets to welcome in the first model Freshman class that had ever crossed its threshold. Our number, which consisted of representatives from all quarters of the globe, was gifted by the refining influence of several students of the fairer type. There were men from the frozen North, from the sunny South, the far East and the golden West. Some that had ventured from other climes and lands. The majority, however, consisted of members from this and nearby states.

Each one of us was imbued with the requisite will power, as we had assembled here for a purpose, and we were filled with an ambition that superhuman forces alone could deviate from the pathway we had chosen and the profession that we contemplated making our life's work. No matter how dark loomed up the obstacles that obscured the goal and confronted us in our first year's work, we put our shoulders to the wheel and thus far, we have triumphantly conquered. This indomitable spirit not only prevailed in hours of study and research; it also manifested itself in hours devoted to other achievements, social, athletic and political.

The first few days were spent in making our acquaintances with the various departments. The anatomical department proved the most impressive as experienced through the optic and olfactory nerves. It was here that later we spent considerable time under the impressive lecturer and capable artist, Dr. Rankin, who also conducted the histological department. A keen interest was likewise displayed in the various other departments; for remember, had we not the silver-voiced orator of the physiological department, Dr. Horstman; the wizard of organic and inorganic chemistry, Dr. Huber; that genial smile and emphatic, "You've got to get it," Materia Medica man, Dr. Steiner. Here also might be mentioned that long list of professional assistants whose kindly aid was ever at our call, but by recalling a few, as Dr. McClurg, Dr. McClane and Dr. Elliot, recalls all the rest that we encountered in our first year's work.

Our acquaintance with the Sophomore class took place a few days later. Although our modesty would refrain, we must admit that we were defeated on account of the ambush and savage tactics employed by our antagonists in trapping us individually. We were not surprised that they should cover our fair countenances with the color symbolic of Springtime, but were astonished at the primeval instinct which seemed as yet so predominant in the class that considered themselves superior to us. We have since forgiven them for this formal introduction as we realized that at that period they were "only Sophomores."

After the war clouds had subsided, we were not long in calling a class meeting, for we realized that in union there was strength. The following class officers were elected: C. E. Galloway, president; R. A. Hennessy, vice-president; R. M. Kelly, secretary; N. V. Graves, treasurer; H. Kruse and A. W. Burke as sergeant-at-arms.

Being thus permanently organized and having a very capable set of officers, we were now "e pluribus unum." Our class soon became the most popular in school, but more than all, gained recognition as a class possessing qualities that characterized us as a model class, a distinction we have retained to the present day.

Our social affairs during this year were a tremendous success. The big event that rounded up the social activities of our class was the reception ball tendered the faculty and entire student body in compliment to the outgoing Seniors. This unique function took place in the beautiful Louis XVI ballroom of the Sherman Hotel, March 28, 1913. It was voted by all as the biggest and most pleasant social event ever given by a Freshman class, if not by the school.

Before we were aware of it, the Freshmen finals were due social and athletic activities were forgotten. Every spare moment was utilized in reviewing the year's course, and we were well rewarded by the high marks obtained.

Vacation days were now at hand. We were all glad to receive a little recreation, but it was with reluctance that we departed from our jolly friends and from the scenes of our happy Freshman days.

A few Summer months of recreation, and we found ourselves again at Loyola. Our number had considerably increased by the addition of new members from other colleges and those that had taken a year's rest after their Freshman year.

On account of the experience gained in our first year, we were not long in calling a class meeting and electing the following officers: R. H. George, president; M. W. K. Byrne, vice-president; H. C. Methany, secretary; C. O. Highsmith, treasurer; Dr. A. B. Rankin, as our honorary president.

After the election of our class officers, it was our duty to properly initiate our new arrivals. The customary practice of hazing the Freshman class was sharply censured by our dean, who appealed to our honor and implored us not to deface our fair record with deeds of barbarism as usually inflicted upon the incoming class. A more rational method was proposed, which was warmly endorsed by Father Spaulding. Namely, to invite the unsophisticated new beginners out to a free-for-all game of football and utterly defeat them, so as to curb their unsatiated importance around the institution. Being a broad-minded class, and realizing that perhaps the old customary method could be substantiated by a more rational one in making the Freshmen realize their place in a college, we acted accordingly, and on the following Saturday invited them out to a free-for-all football game. It must pain the Freshmen yet to recall how utterly they were defeated, and we refrain from further humiliation by withholding the score.

The depressed spirit of the class was evident for a week, after which they assumed so haughty a disposition and became so decorous in their manner that we were greatly perplexed as what to do with this state of affairs. Our patience as well as that of others, was finally exhausted, as conditions were daily growing worse, so that we decided to readopt the old method which had produced the desired effect in previous years—initiate the Freshmen in "ye olden style" so that they might realize their insignificance.

We therefore did unto others as others had done unto us. This wasn't quite in conformity with the old adage, but we saw no other resources. In order that all might benefit, and none escape, we cunningly trapped them as they strolled to school one morning, tied their hands and feet, and after all had been captured, some of our boys proved their ability and ingenuity as manipulators of the brush, by the artistic transfigurations wrought upon the countenances of our captives. A little leniency was displayed toward the fairer sex. Beautiful polka dots adorned their brows. The color was appropriate to remind them that it was their Springtime of a college career. After giving them all due display we invited them to a show in the afternoon, and since that time we have been the best of friends.

A good majority soon manifested a tendency to trip it on the light, fantastic toe, and early there was formed a club of the Terpsichorean order. Semi-monthly balls were given in the Garfield Park Refectory, and many were the hours pleasantly spent in gliding down the old ball room to music sweet and charming. It proved a great success, socially and otherwise.

The social events of our class during this year terminated in a dinner dance held at the Hotel La Salle, in the Grand Ball Room. It was the only affair of the kind that had ever been given, and it proved one of the most pleasing entertainments given under the auspices of a Sophomore class. We were entertained for a short time by our honorary president and worthy professors, who gave vent to their eloquence and witticism in good advice and story. We would have enjoyed a longer program, but our speakers realized that we were all anxious to demonstrate our Terpsichorean abilities

This brings us to the end of our second year, feeling well repaid for the time spent in study. In parting to spend a few months with our loved and loved ones at home, we regret to find two members missing from our midst. Their life's duty is at an end.

How fleeting is Time! Seems 'twas but yesterday that first we wove the band of friendship here. Today, we are approaching the eve of our departure. Alas! what changes Time has wrought. The Freshie's mischievous twinkle, the Sophomore's wise-fool look have disappeared and given way to a serious and grave demeanor. We are beginning to realize the expectancies that will be demanded of us as practitioners, and we have therefore abandoned our East wing paraphernalia and are now devoting our time to fulfil the rigid requirements of a Junior. We accordingly find ourselves established in the old wing of the college.

A few of the old members are missing from our list, but their absence is more than doubly compensated by the new arrivals from other institutions. It was not a little surprising, delightfully so to some, to find that the species which is more deadly than the male has increased one hundred per cent. The consequences, who knows?

OUR CLASS OFFICERS FOR THIS YEAR.

Alexander W. Burke.....	President
Irl S. Haney.....	Vice-President
R. R. Kirkpatrick.....	Secretary
J. M. McSparin.....	Treasurer

Our honorary president, Dr. L. F. MacDiarmid.

With these men at our helm, and one hundred forty to man the ship, we have every indication of swiftly sailing o'er the billowy sea of our Junior curriculum and entering the calm harbor of our final year.

The semi-final examinations shortly after the Christmas holidays verified to our honorable instructors that our criterion was still at its height.

During this year, most of us became members of the Sportsmen's Club of America. During the early part of the year, we all enjoyed a pleasant time at a ball given in our club hall.

Many new members were also initiated into the several fraternities during this year.

The big feature, however, upon which all spent considerable time, was the compiling of the Year Book, a task which it behooves the Junior class to accomplish. Thanks to the editor and his assistants and all those who kindly aided, the Year Book has excelled all other productions of previous years. Like all our other achievements, it is a credit to and a reflection of a class composed of quantity and quality.

The historian's field does not encroach upon the future, but one year hence shall terminate the history of our class, collectively. Individually, we will all endeavor to improve on that which is well done. Though hard the task may seem and long the journey, we shall proceed as we began.

Draw the waiting curtain over that last memorable year and when it again rises; behold us in that most coveted of havens, that most envied of positions, that most blissful of palaces, the sanctum sanctorum of all our student life—the Senior hall.

It was not until now, with but a few short weeks between us and the goal we sought that we realized how near we were to the beginning of the end. It was not until now that its full meaning flooding our minds and hearts like a golden sunbeam, dawned upon us, this entrance into the rank of the profession; to lessen human suffering and alleviate the ills of the unfortunate.

Early in the beginning of the year, a class meeting was called for the election of officers. If we believe the elections of preceding years had been headed, this last and final one broke all existing records, each candidate eager for the honor of an office during Senior Year. It was only after four hot, wild, tempestuous hours that the affair was terminated, the following officers being elected:

Carl E. Boyer.....	President
Maurice W. K. Byrne.....	First Vice-President
Alexander W. Burke.....	Valedictorian
Allen P. Milliken.....	Third Vice-President
Frank Heda.....	Recording Secretary
J. M. McSparin.....	Treasurer
L. J. Kan.....	Financial Secretary
J. A. Kehoe.....	Corresponding Secretary
N. M. Sullivan.....	Assistant Corresponding Secretary
M. J. Chiasson.....	Sergeant at Arms
C. C. Van Slyke.....	Sergeant-at-Arms
N. H. Nicholson.....	Class Prophet
F. X. Mock.....	Class Poet
C. W. Trowbridge.....	Class Will
I. S. Haney.....	Class Historian
R. R. Kirkpatrick.....	Salutatorian
C. M. Stoycoff.....	Class Editor
H. T. Little.....	Associate Editor
A. P. Milliken.....	Associate Editor
W. Wilson.....	Associate Editor
R. M. Kelly.....	General Committeeman

Within a very short time, the commencement exercises will have been over, and they are indeed well named, for essentially it is the commencement of our future career in this the noblest and most honorable of all professions, i. e., Medicine.

During our student career we have learned to love and honor our dear professors and each other, and although happy in the prospect of graduating and bringing to a glorious end our school days as "medics," yet the thought of parting, probably forever, with some of those who have become in the past four years so near and dear to us, causes a feeling of regret and sorrow, to cloud what otherwise would be a perfectly clear sky and a happy condition of mind and body.

Such, however, is the course of life and men, and although the parting will be painful, yet the pleasant memories of those happy days and years spent together will ever remain with us to cheer us on.

We wish to take this occasion to express our sincere and heartfelt appreciation of and high respect for our beloved faculty, the members of which, we feel, exerted their utmost efforts in order to implant in our minds the principles of the life-work before us, and who so ably, conscientiously and perseveringly stood by us during our many trying ordeals, in the trials and tribulations of this class, constantly and persistently urging us onward and inspiring us toward greater and better achievements. We shall take with us not only the knowledge that a most thorough scientific training in the medical and surgical arts can give, but also the inspiration towards higher ideals, and the determination that each of us shall be a leader in whatever particular field of the profession we may enter.

Certain it is that no member of this class will ever "wear his wishbone where his backbone ought to be," and in years to come, when name and fame shall be ours, we can look back with a happy heart to the pleasant years of our school life and to our dear Alma Mater with its corps of learned instructors.

Long may they live and prosper, and happiness and contentment be their lot. And may they continue to instill in the minds of those coming after us, the principles and teachings they so ably conveyed to us.

The Juniors, Sophomores and Freshmen we greet: Good luck and good cheer, and may your success be greater and greater with each succeeding year. Farewell.
IRL S. HANEY, '16.

Chas. B. Alexander. Born in Coopers-
town, Penn., March 24, 1895. He re-
ceived his preliminary education at Coop-
erstown and Franklin High Schools and
took some special work at Slippery Rock
State Normal School. He entered Loyola
University Medical College in September,
1913, where he is still plugging away.

He is a member of the Phi Delta Epsi-
lon Fraternity and the Scientific Research
Society of Loyola University.

Samuel Axeland was born in Folticen,
Roumania, July 16th, 1890. Was edu-
cated in New York and Chicago schools.
Matriculated at Loyola in 1913.

Member of Zeta Mu Phi Medical Fra-
ternity.

David Altman was born in Calvary,
Russia, June 15, 1885. He received his
early education in his home town, and,
later in New York, Valparaiso, Ind, and
Chicago, Ill.

John J. Belensky, born at Taylor, Pa. Received preliminary education in the public schools. Attended St. Thomas College, Scranton, Pa., and St. Crocopin's College, Lisle, Ill., respectively. Matriculated at Loyola Medical College with the class of '17. Member of baseball team. Member of Phi Delta Epsilon Fraternity.

Waldo F. Brinkman, born in Spencer Co., Lamar, Ind., on Jan. 30, 1887. Attended public school and high school at Buffaloville, Ind., also Evansville, Ind., completing the high school work at St. Ignatius College of Chicago, Ill.

Ramon Berrios Berdecia was born Oct. 1st, 1895, at Barranquitas, Porto Rico. He received his early training at the public schools of Porto Rico, later attending the English Preparatory School of New York City, graduating in 1911. This was followed by a course in pharmacy at the "Ohio Institute of Pharmacy"; received his Ph. G. in 1912. Entered Loyola in 1913.

Member of the L. U. Scientific Research Society.

Member of Year Book Committee.

Duncan D. Campbell. Born in Rochester, New York. Preliminary education, Rochester High School. He entered Loyola University School of Medicine in 1913. He was Vice-President of the Freshman class, and this year he is business manager of the Scrap Book. He has made everybody sit up and take notice. Moreover he is first, last and always a gentleman.

Member Phi Delta Epsilon Fraternity and Scientific Research Society.

Juan Lasta Charriez. Grand Master of the Kiten Gu No Fraternity; was born in Yabucoa, Porto Rico, where he received his common education. In 1910 graduated from the St. Bernardo College. Came to New York the same year where he attended the De Witt Clinton College and finished his studies. 1913 to 1914 studied his first year at Temple University, entered Sophomore class at Loyola in 1914. Class officer.

Earle K. Carmichael. Born at Timestone, Pa., August 3, 1887. Present Residence Trinidad, Colorado. Early education Trinidad High School. Graduated in 1905. Two years Liberal Art University of Colorado. First two years of Medicine at the same place. Member of the Phi Delta Fraternity.

J. B. Coppens was born at Lake Odessa, Michigan, July 18th, 1882. Graduated from Alto High School in 1900. Entered Ferris Institute of Pharmacy, Big Rapids, Mich.; passed Michigan Board of Pharmacy and has been engaged in the practice of pharmacy for 11 years. Entered Freshman class of 1913, Loyola University School of Medicine.

Charles H. Connor. Born at Holyoke, Mass., Dec. 15th, 1883. Received his preliminary education in the public and high schools of Holyoke. Entered the Hospital Corps of the U. S. Navy in 1905 and after sailing around the world decided to take up the study of medicine, so joined our ranks in October, 1913.

John Patrick Coughlin was born in 1890. He received his education in the Chicago Schools, St. Ignatius College and the Sacred Heart College in Watertown, Wisconsin. Matriculated in Loyola University School of Medicine in 1913.

Member of Tau Tau Mu Fraternity, 4th Degree Knight of Columbus. Class Editor Freshman year, President Junior year.

William Arthur Davidson was born at Selfville, Ala., Nov. 16, 1888. Attended school at Selfville, State Normal School at Florence, Ala., and Hainard College and Birmingham, Ala. Member of Phi Chi Fraternity.

Leslie Dwight Dougherty. Born in Illinois, Nov. 3, 1892; graduate Township High School, 1912. Entered Bennett Medical College in fall of 1913.

Charles H. Dickinson. Born April 25, 1878. Preliminary education, two years of high school in his home town at Atlantic Mine., Mich., and four years in Valparaiso University, Ind., coming to Loyola as Sophomore from Chicago College of Medicine and Surgery.

Alfred L. Fein, born in 1888 in Dinsburg. Received his early education in Europe and later in various schools in New York. Entered Bennett with the class of 1917. He is a member of the Aleph Yodh He Fraternity and of the Loyola Scientific Research Society.

Lewis Kent Eastman, born in Chicago June 24, 1895. Educated in the public schools of this city; member of the class of 1913, Mannsville Union High School, Mannsville, New York. Pioneer of the class of 1917. Active member of the Phi Delta Fraternity.

John V. Eterno, born 1886 in Biscari, Italy. Came to U. S. A. in 1904. Received his early education in Italy. Completed his preliminary studies in Chicago in 1912 and entered Loyola Medical College in 1913.

Joseph H. Freedman was born in Kansas City, Mo. in 1892. Finished his Grammar School and graduated from Manual Training High School, then attended Kansas City College of Pharmacy, graduating in 1910. After practicing Pharmacy for three years he entered Loyola University Medical School with the class of '17.

Morris Arthur Glatt was born in Odesa, Russia, on June 15, 1890. Received early education in Russia and completed his high school and commercial education in Chicago where he landed in his early youth. Matriculated in the Loyola University Medical School in 1913.

At present Secretary of Delta Chapter Zeta Mu Phi Fraternity and Secretary of Class of 1917.

Charles Anton Freund was born in Chicago on the twenty-third of December, 1894. Completing grammar and high school, he entered Loyola University Medical School with the class of '17. Charles is a Registered Assistant Pharmacist.

Fred H. Glasco was born in the County of Union, State of Illinois, Nov. 22, 1888. Educated in the public school and graduated of High School in 1906. Two years at the Southern Illinois Normal University, 3 years at the Valparaiso University, therefore an (Egyptian) by birth and education.

G. C. Haralson was born and reared in Vicksburg, Miss. After graduating from the High School at Vicksburg, he entered Mississippi College at Clinton, Miss. He attended this college two years. He is a registered pharmacist in Mississippi, Tennessee and Arkansas, and practiced pharmacy several years before entering Medical College. He attended the University of Tennessee, Department of Medicine, at Memphis, his first two years, entering Loyola University School of Medicine Sept., 1915.

Helen Eleanore Gorecki was born in Arlington Heights and graduated from the Arlington Heights High School in 1913. Being a girl of remarkable good judgment, she matriculated at Loyola in 1913. Having earned the good will and confidence of her classmates, she was elected Treasurer of the Junior class.

Roy W. Harrell, Ph. G., was born at Norris City, Ill., Sept. 16, 1891. Received preliminary education at Norris City High School and Norris Academy. Graduated from the University of Illinois School of Pharmacy in 1912. Entered Loyola University Medical School in Sept., 1914, Phi Delta Epsilon Fraternity.

David Louis Holland was born in Downers Grove, Ill., May 22, 1881, where he received his preliminary education, graduating from Downers Grove High School in 1900.

He received the degree of Ph. G. from University of Illinois in 1905, and has been engaged in the drug business up to his entering the Medical Department of Loyola University.

He is a member of Phi Delta Epsilon Fraternity.

Josa A. Hernandez was born at Jayuya, Porto Rico, March 19, 1893. He attended the public and high school of Ponce, P. R. This was followed by a course in agriculture at the University of Porto Rico. As his vocation was medicine he entered the Freshman class of Loyola University Medical School in 1913. He is a member of the Phi Chi Delta Fraternity and Loyola Scientific Research Society.

Lydia Heckman Holmes, Pekin, Illinois. Educated in the public schools of Manito and State Normal University of Normal, Ill.

Eladio Izquierdo was born in Barcelona, Spain. Holds degrees of B. A., Barcelona Institute, 1897, Bachelor in Theology, 1902; Assistant Professor of Philosophy, Valencia Seminary Institute, Spain. He later moved to Mexico and was Professor of Philosophy and Theology at the Caliseo Institute of Puebla. He entered Jefferson Medical College, Philadelphia, Pa., 1913. Transferred to Loyola, becoming a member of the class of 1917.

Dennis Herman Howell was born February 5, 1879, at Marion, Ill. After finishing the grammar school he entered the Southern Illinois Normal University, Carbondale, Ill. After leaving there he taught three years in grammar school. He has been connected with the U. S. Railway Postal Service for the past 10 years.

J. C. Johnstone, graduate of Windsor Collegiate Institute and in Canada and Toronto University. Department of Pharmacy. Later became Bacteriologist for the City of Chicago Department of Health. State Analyst and Chemist for the State of Illinois. Entered Loyola University Medical Department as a Sophomore in 1915.

Carl Johan Johannessen, born March 29, 1891. Attended the University of Copenhagen and received from there the examen artium (Corresponding to the degree B. A.) and the examen philosepticum (corresponding to the degree M. A.) in 1911. Attended the Military Academy and received a commission as Second Lieutenant in 1912. Came to Chicago and entered Loyola in the fall of 1913.

Mrs. Blichert Johnstone was born in Denmark where she received the education of her childhood and youth in a private school. Ten years ago she came to this country and after expiration of the required time promptly became a citizen. In 1913 she entered the Loyola School of Medicine.

Bernard F. Jusatus. Born May 20th, 1885, in Chicago. Received his preliminary education in Chicago. Attended with the class of 1903, Chicago College of Pharmacy, and graduate with the degree of P. H. G. in 1905, and engaged in the retail drug business for the past ten years. Member of Medical Research Society, Loyola University, and matriculated with class '17.

M. J. Kelly. Born in Chicago, June 1, 1888, attending public and parochial schools of this city. Graduating from St. Ignatius Academy. Student arts and science under Prof. McEachem of Valparaiso University. Entered Loyola Medical College year of 1912. Member of Phi Delta fraternity.

Robert A. Keeton was born at Scotts Hill, Tenn. After finishing grammar school he spent 4 years in the McFerrin State Methodist School and one year in Valparaiso University. Completed his Freshman year in the University of Tennessee School of Medicine, then transferred to Loyola where he hopes to complete his medical education.

Member of the Pi Mu Fraternity.

Victor N. La Marre was born in Montreal, Canada. He went through the classical course at St. Viator's College, Kankakee, Ill., where he received degree of Bachelor of Arts. He entered the U. S. Marine Corps in 1908 in time to make the trip around the world with the fleet. He is an active K. C. and a member of the Tau Tau Mu Fraternity.

Vernon L. Looney, born at Breckenridge, Mo., Sept. 29, 1888. He received his early education in the Public and High Schools of Breckenridge and entered the Class of '17 at Loyola Sept., 1913.

Henry Geo. Lescher was born in Chicago. His early education was received in the St. Philomena Parochial School and later at St. Ignatius High School. Later while attending Loyola Pharmacy School, he received the Phar. B. and in 1914 the Ph. G. Degrees. His desire to study medicine, however, could not be checked and he entered the Loyola Medical School.

Leo V. Malone. Born in 1893 in Toledo, Ohio. Received his preliminary education at St. John's University, Toledo. Entered Loyola University Medical School with the class of 1917. Chairman advertising committee of Scrap Book.

George W. McCrary, B. Sc., Ph. G. Born at Howe Texas, Dec. 13, 1887. Attended Spokane, Wash., grammar and high school. Entered Loyola University Medical School with the class of 1917. B. Sc. degree from Loyola in 1915. President of Sophomore class. Editor in chief of Scrap Book.

Charles William Matlock was born at Marion, Kansas, March 14, 1893. Received his preliminary education at Marion and after graduating from Marion High School entered Loyola University School of Medicine with the class of 1917. Treasurer of Sophomore class. Member of the Loyola University research Society.

William Herbert McCroskey was born near Lawrenceville, Illinois, March 20th, 1890. Later he moved to Lawrenceville where he attended the grammar school. Entered Lawrenceville High School in 1909 graduating with the class of 1913. In the fall of 1913 entered the Louisville Medical College completing his first year then transferred to Loyola University Medical Department where he is now a Junior.

Donat F. Monaco. Born in 1895 in New York City. Preliminary education in New York. Graduated from Englewood High School, Chicago, and then attended Loyola University one year. Entered Loyola University Medical School in 1913. Member of Phi Delta Epsilon fraternity.

Bronislaus Mix. Born in Chicago in 1895. Grammar education completed he was sent to St. Stanislaus College in 1910, where he attended until 1913. Matriculated at Loyola University that same year. He is a member of the Phi Delta Epsilon and Sigma Delta fraternities and eight other clubs and societies in the city.

Anthony A. Montvid was born in 1886 at Russia. Studied in Liban Nicholas Gymnasium for seven years and transferred to Curevich Gymnasium in St. Petersburg. At 15 years of age he began his literary career in Russian press under the name of Antonov and his real name. In 1907 left Russia "for his health" and came to America where he has edited several Lithuanian papers. Entered Loyola in the class of '17.

Richard J. O'Brien was born in Milwaukee, Wisconsin, in 1890. He is a graduate of Marquette Academy and attended the collegiate department of Marquette University of two years. He completed one and a half years in the Medical Department of Marquette University. He entered Loyola Medical School in the second semester of the Sophomore year.

Richard A. Nagle was born in Chicago, Ill., on the 15th day of February, 1893. He obtained his first two years of preliminary education at Armour Academy, and latter two years were completed at Association Institute. Member of the Phi Delta Fraternity.

John T. O'Connell was born in Chicago in 1894. He was educated in the public schools and the St. Ignatius College and matriculated with the class of '17, Loyola University Medical School. Was externe and anoesthatist St. Francis Hospital, Evanston, Ill., during 1915.

Andrew Otteraaen Born in Bergen, Norway Nov. 16, 1883. Graduated from the public school at that place and later graduated from Bergen's Tekniske Skole in 1901. Entered Loyola University Medical School with the class of '17. Corresponding secretary of Loyola University Research Society. Consul of the Phi Delta Epsilon Medical Fraternity.

Deno F. A. O'Connor was born in the town of Primrose, Wis., June 21, 1893. He graduated from the Verona High School in 1910; attended University of Wisconsin a year and a half. Entered Loyola Medical School February, 1913.

Thomas F. X. Phelan was born Oct. 27, 1885, in Brooklyn, N. Y. Attended Parochial schools after which he finished his high school work in the academic department of St. Johns Academy; finished his college work at the Niagara University in 1909. Entered Loyola University Medical School in 1913, and was Treasurer of the Freshman class. Member of K. C. and Phi Delta Fraternity.

R. Reich. Matriculated with the class of 1917 and has been with us since the organization of the class.

C. W. Halvor Rasmussen, born in Denmark, Europe. Educated in College, Copenhagen. Lived in Australia eight years. After a visit to the old country, came over here. He says, "America is the greatest of all countries." He will soon become a full-fledged American.

Antonio R. Reyes. Born Dec. 18, 1895, at San Pedro Macoris Dominican Republic. Came to Philadelphia in 1904 where he attended grammar school at Lady of Victoria School. In 1908 he returned to Porto Rico and attended high school until 1911. He again returned to Philadelphia, where he finished his high school work at Temple University. In 1913 he came to Chicago and entered Loyola.

Nathan Schwartz was born in old Constantine, Russia, in 1884. Educated in Russian schools. Came to England in 1898, and to the United States in 1899. Was in New York until 1901, then came to Chicago and studied pharmacy, in which business he was engaged until he entered Medical School.

Arthur Saul Sandler was born in Cleveland, Ohio, November 3, 1893. Having migrated to Chicago, his early education was obtained in the public schools of this city and later at the Murry F. Tuley High School. Sandler has been with the class of '17 since its beginning, and is considered by all to be a "good fellow student" and loyal friend. He is a member of the Zeta Mu Phi Fraternity.

Jaime Serra Chavarry, born in Barcelona, Spain, Jan. 17, 1893. Came to Porto Rico when six months old. Made his grammar school education in the Mayaguez Public Schools.

Served as school teacher under the Department of Education of Porto Rico for three years. In 1911 came to New York and entered the Engineering Preparatory School where he completed his high school work.

In 1913 came to Chicago and entered Loyola Medical College, Class of '17. Member of the Kiteu-Gu-No Fraternity.

Paul B. Sogolow. Born January 12, 1895. Attended Columbus Grammar School and graduated from Murray F. Tuley High School. Entered Loyola University Medical School in 1913 and has taken an active part in the class affairs.

Daniel E. Shea was born at Hartford, Conn., Jan. 18, 1893. His early education was received at St. Patrick's Parochial School of Hartford, St. John's College, Conn., Literary Institution and St. Bonaventure's College and Seminary. Entered Loyola with the class of '17. Secretary, Freshman year. Associate Editor of Year Book. Member of the Phi Delta Fraternity.

Herman M. Sondel, Ph. G. Born in Lake Geneva, Wis., May 7, 1891. Attended the public and high school at Plymouth, Wis. Completed his high school work at the North Division High School of Milwaukee, Wis. Then he entered the Marquette University at Milwaukee in 1908, from which school he received his degree in Pharmacy (Ph. G.). In 1913 he entered Loyola.

Circulating Mgr. of the Year Book.

George Ellsworth Turner was born at Austin, Minnesota, Nov. 13, 1882. Graduated from Macalester Classical Academy, St. Paul, 1904. Graduated from Northwestern University School of Pharmacy with degree of Ph. G. in 1906. He is registered as Pharmacist. Matriculated at Loyola in 1912.

R. Gillman Timms was born in Chicago in 1879 of Parents whose forebears helped to make Chicago's history in its pioneer days. He was educated in the Parochial and public schools of the city and completed a course in electrical engineering, two years in law, finally turning to medicine in 1912.

James J. Walsh was born in Chicago, Aug. 23, 1886. He received his early education in St. Patrick's Parochial School and the McKinley High School of this city. Mr. Walsh entered the class of '17 this year.

John Pete Weber was born in Scarborough, Alsace Lorain, Germany. Received his preliminary education in Brooklyn, N. Y. Entered high school at Des Moines, Iowa; graduated in 1908. Matriculated at Loyola in 1912.

Herman M. Sondel, Ph. G. Born in Lake Geneva, Wis., May 7, 1891. Attended the public and high school at Plymouth, Wis. Completed his high school work at the North Division High School of Milwaukee, Wis. Then he entered the Marquette University at Milwaukee in 1908, from which school he received his degree in Pharmacy (Ph. G.). In 1913 he entered Loyola.

Circulating Mgr. of the Year Book.

History of Class of '17

When called upon to write the history of our class, I was filled with joy, because of the possibilities in such a task.

Standing as Juniors; knowing what this eventful year means; we hallow the day we made the choice of our profession. September, three years ago when the sun was smiling, making all things bright and beautiful, we made our entry into the College of Medicine as a cosmopolitan mass of humanity. This mass, however, was soon reduced to half its original size, being weeded out until nothing but the very best remained and we are still here; having survived the draught of equational chemistry's infinitum; the ghastly nightmares of anatomy, the whirlwinds of physiology, the cyclones of *Materia Medica*, the tornadoes of bacteriology, the hurricanes of pathology.

Truly, we are the survivors of the fittest. This, however, is undoubtedly due to a very large extent, to the excellent character of our teachers, who in their respective capacities have filled their position admirably well, making it a pleasure for us to sit at their feet and learn.

As we call to mind Dr. Rankin with his colored chalk conveying his deep knowledge of anatomy and histology through the eye-gate, accompanied by elucidative articulations and with this mysterious something, that aroused our ambitions and elevated our aspirations, we feel very grateful to have been under such a distinguished and life-inspiring doctor's teaching.

In recalling Dr. Huber, to whom we owe much, because of his punctuality, his masterly way of patience and protracted presentation of the subject, which made it possible for us to grasp and to follow, we feel greatly favored to have sat for two years at his feet and learned from him.

Calling Dr. Horstman to mind we at once say, "I thank God for having known him." His fund of knowledge and readiness to explain, make clear and impart this knowledge of the finer forces in life, which seemed at times to glory in its own enigma; he was able to disperse the clouds and cause the light to shine.

To the great pathologist and bacteriologist, Dr. Herzog, we are indeed

indebted. We surely owe him our most earnest, sincere and studious efforts.

The energetic, earnest and gifted Dr. MacLane we esteem very highly. He surely is a teacher, an artist and quizmaster. We have to confess, his equal is not easily found, and our friend, father, teacher, Dr. McClurg we all love and admire, and to whom we feel grateful indeed. He will often, I am sure cause us to say like one of old, "I thank God upon every remembrance of you."

The logical and philosophical, but not argumentative anatomist, Dr. Elliott, whose keen eyes were able to detect the finest nerve, was always ready to give a short, concise and "to the point lecture," making it easy to grasp and to retain.

We had some successful games, socials and banquets, all successfully handled by the worthy staff of class officers: C. H. Connors, President; D. D. Campbell, Vice-President; D. E. Shea, Secretary; T. F. X. Phelan, Treasurer; James Madison, Sergeant-at-arms. Dr. McClurg was Honorary President.

Closing the year with a banquet held at the Great Northern Hotel where we, with our professors, had an excellent time, we dispersed for the summer vacation, but only to return again with renewed health, strength and vigor of mind and body for our Sophomore year.

To be Sophomores was something wonderful. Now has our time come, we thought. The work had greatly increased compared with our Freshman year, and our pride was subdued by strenuous studies. Still we found time to perform certain painful but needful duties, such as disciplining and civilizing the Freshman.

The class this year was reorganized, and the following officers elected: President, Geo. W. McCrary; Vice-President, E. G. Nylander; Secretary, C. B. Alexander; Treasurer, C. W. Matlock; Sergeant-at-arms, V. N. LaMarre and D. F. Monaco. Dr. Huber was unanimously elected Honorary President.

Getting down to business, we found ourselves amply repaid at the end of our Sophomore year, in that all passed. After having spent our summer vacation we returned all like one man with purposes unshakable, determined to complete another year. Ah! A year much more dignified and far superior to what had been our experience heretofore. With a stethoscope, thermometer and head-mirror in our pockets, we felt as if the life of the whole world depended on us. Its ebb and flow, yea! Its very breathing capacity seemed depended on our diagnosis, decision and prescription. The changing current of life's mediatorial stream seemed to be regulated by our knowledge in handling the case.

A happy announcement was made at this time—that our beloved College had come through its great tribulations and was now part of Loyola University.

How the blood flowed freely and forcefully in our veins when the President of Loyola University, Father Furry, confirmed it by his own presence and announced it with his own lips. The fatherly care and smile of Father Spalding encouraged our efforts and makes us always feel refreshed, ready to proceed further. Dr. Herzog in his pleasant and gallant way, exhorted us to do our best, and as Dean of our school, promised to do his best. This we know he is doing and we reciprocate by doing our best, so that when we reach the summit of our graduation there shall be such a happy and united cooperative field of work and earnest efforts to look back over, making the occasion the greatest in the history of our well beloved Alma Mater.

Our class officers for this year are: John Coughlin, President; J. B. Coppens, Vice-President; M. A. Glatt, Secretary; H. E. Gorecki, Treasurer; Charriez and V. N. Looney, Sergeant-at-arms; George W. McCrary, Editor-in-Chief; Duncan D. Campbell, Business Manager; Herman M. Sondel, Circulation Manager. Dr. Norden, our Honorary President.

Then came the important event in our elections, after careful consideration we unanimously elected Dr. Henry A. Norden as our honorary president and he honored us by accepting. As the holidays approached in our desire to express our appreciation of Dr. Nordens many services and timely advices, our president John P. Coughlin in a few well chosen words presented the doctor in behalf of the class with a solid gold fountain pen as a slight token of the high esteem in which we hold him.

With confidence and delight, we anticipatory look forward to the absolute realization of our dreams and ambitions.

C. W. HALVOR RASMUSSEN

The Freedom of the Will

In his everyday life man is subject to many influences, some hurrying him resistlessly in accordance with physical laws, others attracting him to something, because it is a good. In fact, the life of a rational being is nothing else than a persistent striving toward what is good. It is clear to every unprejudiced mind that to man a light has been given, to guide him on his way toward perfection. In this light we examine the motives that influence us; and in choosing among the various motives that life presents to us we are exercising our free-will. My freedom does not consist in acting without a motive, but in making my choice of the motives inciting me to action. It is in my power to submit to one or the other of the influences I find myself under at a given moment. And this power, among all the beings in the material universe, is possessed by man alone.

Matter changes its shape and size, undergoes chemical modifications, manifests various phenomena according to definite, fixed laws. Matter does not will the changes it undergoes; it is driven to those changes. In like manner, the animals struggle to preserve themselves, to propagate their kind, and so on, not because they so will, but because they are driven to this by the instincts they possess. Man, on the contrary, the rational being, chooses when and for what end to preserve himself, and has the power to decide whether he shall live or die, propagate the species or dedicate his life to the service of his fellow-men.

There is absolutely no evidence of will, of knowing what is good and bad, of choosing when and how to act, in the activity of the elements of nature. Irrespective of time and place, they always act in the same manner under like conditions. The same is true of animals. All attempts to show that animals have the power to discriminate and choose have failed. The hungry eagle catches the first sparrow that happens to cross its path, and is never touched by the agony of the prey in its claws. It is man only, the rational being, that has ideas of bad and good, concepts of wrong and right. Man only stops to deliberate whether he shall rob or starve, kill or sacrifice himself, act one way or the other, when motives soliciting his acts present themselves. Of all the beings that exist man alone manifests the power to act or to abstain from action when the conditions required to elicit a volition are present; man only is morally free—has a free will.

In admitting that as a rational being man is a free agent for good or evil, we are not alone. That mankind as a whole is with us may be seen from the universal ethical concepts. It is a striking historical truth that the people at large have never questioned that we are to be blamed for certain acts and deserve praise for others; that we are bound to observe moral laws, to pre-

serve and promote social order. History tells us that even four thousand years ago the Egyptians considered as wrong stealing, cheating, killing, offending in any way one's fellow-man, and had laws aiming at the prevention of disorders of every sort. Now of what use and meaning are all these notions of responsibility, if man's conduct has been predetermined, if man's acts have been foreordained? Denying man's moral freedom, how could we explain the moral consciousness of the human race? What would be the meaning of our life if we were mere puppets in the grasp of forces outside ourselves? These questions are so obtrusive that one is led to wonder how it has come to pass that some people today deny the freedom of the will.

With the great material progress of the last few centuries the nations of Western Europe found themselves in the midst of new and startling discoveries. New facts became known. New hopes were awakened. Some of the prejudices of the past became untenable. A revaluation of the old values became necessary. The faith in the past was shaken. During these times of transition not even the firmest, most general beliefs escaped question. Accordingly, led by the hasty generalizations of the rasher scientists, a school of philosophers arose who denied the freedom of the will. In the matter around them they saw no such freedom; and as, in their view, man was only matter, they denied his freedom too. Such was the origin of the theory of determinism—a system born of haste and rashness.

At the same time, with the advent of machinery, great economic and industrial changes took place in the civilized world. Social conditions were changed, and a readjustment of society became necessary. Bloody revolutions took place; but all attempts to settle the social order aright failed. People were temporarily at a loss; they felt that the foundations of their lives were shaken. Thus unsettled, and influenced by the teachings of the determinist philosophers, some even of the common people were led to doubt the freedom of their wills. Besides, determinism justified all wrong-doing. Thus it gained a considerable number of adherents.

But conscience never fails to assert itself. People could temporarily believe that right and wrong are only relative terms, that the moral principles of the great religious teachers that have guided the world for ages past were nothing but products of ignorant minds, that obligation, merit, responsibility, justice, all the concepts that go to make the moral consciousness of the human race were nothing but childish delusions. In the end, however, the evidence which has made men sure they were free, must prevail. People were unable to withstand the irresistible persuasion that they were free agents. And so determinism, for all its attractiveness, is today, and must always be, the doctrine of only a few philosophers.

Sophomore History

Freshman Year

When October, 1914, breezed around there was an unorganized solemn looking bewildered bunch of beings congregated in the room, known as the Freshman Lecture Room. Hearing of the dreadful things that might befall them, they soon became acquainted and decided to make of themselves one organized body. Before complete organization took place the much feared event took place as any other Freshman will always remember the sortie ended at the theatre, all parting good friends. Then class election took place, the following officers being elected:

B. F. Croutch, President
G. H. Copia, Vice-President
J. P. Hutchinson, Treasurer
F. M. Dry, Secretary
J. F. Ruzic, Sergeant-at-Arms
B. C. Rembe, Sergeant-at-Arms

Dr. McClurg was elected Honorary President.

We then held our banquet at the Banquet Room of the Great Northern Hotel on April 15, 1915. This being our most successful affair of the season. The talks given by members of the Faculty being very enjoyable. We then finished our year and wishing success and prosperity to the graduating class we retired to wait the fall opening.

Sophomore Year

Coming back from a four months sojourn in the fields and mountains and physically fit, we, the renowned class of '18, started into making life miserable for the embryo medico.

After having our upper class mates elucidate some of our secrets to them (most of which would put us in jail if known to the world) the much dreaded event came off. They walked into our trap like flies into a spider's web and the paint we applied showed very well. The event, although very interesting for them, was not up to our expectations from the hazardous viewpoint. Making them like it to our hearts content we finally ended the fes-

tivities with a matinee and all parted good friends. Each of the embryos vowing to uphold the honor of their Alma Mater with their lives. Next in order for us was the class elections. The following officers being elected for our second year:

G. H. Copia, President
 E. Wachlin, Vice-President
 J. F. Smith, Secretary
 F. M. Dry, Treasurer
 V. A. Szymkevics, Sergeant-at-Arms
 K. M. Beck, Sergeant-at-Arms
 O. J. Watry, Class Editor
 G. F. Tierney, Historian

Dr. Horstman was then elected Honorary President unanimously. Before adjournment of meeting, a few words from our last year's President, B. F. Grouch, and several others as to what we should and could accomplish in our Sophomore Year ended our first attempt at class organization for the coming year. All of the Old Guard are back, including the Co-eds and a few additions. There is a man in the class who has great faith in Aqua Regia as an official U. S. P. water Dose Q. S.

A young ladies' quiz class was organized and some of the "Shining Lights" of the class joined it. No names mentioned. A certain member of the faculty came into the class room one day and said, "Boys, I thought probably that you would never see me again." Silence reigned supreme for a few moments, when all of a sudden our humorist said in answer: "What's the matter, Doc, goin' to die?" That ended the class lecture.

There are two members of the class we could not do without—"The croatian twins." For these and all the rest we wish them success in meeting the hard road they still have to travel. The last affair of the year was our banquet, which was our crowning event of the year for us, all of the speeches by the faculty being beyond our expectations in wit, humor and common sense. Therefore, in conclusion, we wish each and every one of our Alma Mater success in his own branch of the science which he prefers to follow, or in mastering the profession as a practitioner being careful to follow his ethical obligations and the straight and narrow path.

Success and happiness awaits him.

G. F. TIERNEY, JR.

The second annual banquet of the class of 1918 was held on March 23rd, 1916.

The class and the Faculty assembled in the Fraternity Room of the Great Northern Hotel where a delightful dinner was served.

Dr. A. B. Rankin was introduced as toastmaster and presided throughout the evening.

The addresses surpassed our greatest expectations, the suggestions and advice were evenly balanced by the wit and humor.

The program was as follows:

1. Introduction of Toastmaster..... G. H. Copia, President
2. Opening Address..... A. B. Rankin, A. M., M. B.
3. Why is a Sophomore?..... F. M. Horstman, M. D., Ph. D.
4. Typical and Atypical Sophomore..... Prof. M. Herzog, M. D., LL. D.
5. How they do it in St. Louis..... C. B. McClurg, M. D.
6. Ideals..... H. S. Spalding, S. J.
7. The value of Pharmacology..... Prof. Secord, Ph. G. M. S.
8. Our Future..... O. C. Huber, M. D., B. Sc.
9. Building of a Medical School..... A. de Roulet, M. D., B. Sc.
10. How to study in the Junior and Senior years.....
F. L. Apfelbach, M. D., B. Sc.
11. Comments on a Chinese Wedding..... T. G. Gossard, M. D.
12. The laboratory of today..... G. M. Robinson, M. T. D.
13. Advantages offered by class organization.....
Geo. W. McCrary, B. Sc., Ph. G.
14. Benefit of Research..... C. C. McLane, D. C. M.
15. Closing Address..... A. B. Rankin, A. M., M. B.

YE SKULE LAMENT*

By

"TROY"

Loyola has a Medical School
 And I go there
 And I had to study
 Bacteriology and
 Other things
 That is I mean
 I ought to study
 Any-way last week
 Or before then or
 Some other time
 We had examinations
 About bacteriology
 Or some-thing
 And we had to be there
 When roll was called
 And if we wasn't
 We had to sit
 On a stool
 Up in front
 And any-way the stool
 Was full and I was
 Looking at the man
 On the stool
 And forgot to write
 And it was time
 To quit and I
 Hadn't written
 Any thing and
 Couldn't think

What to write
 And some one
 Jarred my arm
 And I spilled my ink
 On my paper
 And it made a blot
 And that was all
 And anyway I
 Got a 100*

I guess he thought
 It was a picture
 Of a bacteria
 And next time
 We have exams
 I'm going to a
 Picture show
 Or something
 And have
 A good time
 I thank you.

*On looking twice I found
 The Professor had forgot
 To put a "1"
 Before the "00."

 Member Zeta Mui Phi Fraternity.
 "A quiet boy and a good student."

Leon, H. G. Koono, Russia.
 Central Y. M. C. A. 1912.
 One year College Loyola University
 1914.
 Entered Medical Department Loyola
 University 1914.
 Member Zeta Mu Phi Medical Frater-
 nity.
 Editor, word speaks for itself.

Piotroski, L. J. Erie, Pa.
 Attend St. Stanislaus High School, Erie,
 Pa., 1909-11.
 St. Mary's College, Orchard Lake,
 Mich., 1911-14.
 Central Institute Cleveland, Ohio, 1915.
 Entered Medical Department Loyola
 University 1915.
 Has a great medical ambition.

Lowell, J. W.
 Graduated Evanston Academy of North-
 western University.
 Attended Northwestern University.
 Entered Medical Department Loyola
 University 1915.
 The fellow with the dough, Treasurer.

Palkovic, R. C. Binghamton, N. Y.
 Graduated St. Procopius College 1913.
 Two years College, St. Procopius Col-
 lege 1913-15.
 Entered Medical Department Loyola
 University 1915.
 Rather bashful but still there.

McCrary, J. G. Seattle, Wash.
 Spokane High School.
 One year Loyola University.
 Entered Medical Department Loyola
 University 1915.
 Does his various duties, in an expert
 way.

Sampolinski, A. S. Ozarow, Poland.
 Graduated Technical High School, Radom, Poland, 1909.
 Graduated Military College Odessa, Russia, 1911.
 One year Loyola University.
 Entered Medical Department Loyola University 1915.
 Working under a great handicap, and yet a good student.

Schreiner, O. W. Fifield, Wis.
 Graduated State Normal School, Stevens Point, Wis., 1913.
 Principal Ward School Chippewa Falls, Wis., 1913-13.
 Entered Medical Department Loyola University 1915.
 The reward is promised to the faithful.

Strand, J. F.
 Attended St. Procopius High School and graduated 1913.
 Attended St. Procopius College 1913-15.
 Entered Medical Department Loyola University 1915.
 A young fellow with a matured character.

Theriault, C. A. Regina, Canada.
 Graduated Trois Pistoles High School. Laval University 4 years.
 Entered Medical Department Loyola University 1915.
 The only representative of King George in the University.

Warshowsky, I. Chicago, Ill.
 Graduated McKinley High School 1914. Crane Technical College one year.
 Entered Medical Department Loyola University 1915.
 Member Zeta Mu Phi Medical Fraternity.
 The boy with the musical voice.

Freshmen History

On the morning of the 28th of September, 1915, the class of 1919 assembled in the Freshman room of the Loyola University Medical Department. The day was spent in meeting our future professors, and becoming acquainted with one another. On this day we were given our respective places in the different laboratories, where we were destined to make history in the performance of some new experiments in chemistry or the discovery of new ligaments which had escaped the eyes of "Gray" and other anatomists.

A few days later our peaceful voyage was disturbed by the Sophomores who, believed our Freshmen was wearing off, and therefore promptly decided to refreshen us. Some of us, however, were fleet of foot and were soon out of reach of the ferocious Sophomores.

A few days later the class election was held and the offices were filled with competent and distinguished men. The following officers were elected: President, C. A. Theriault; Vice-President, L. F. Chapman; Secretary, O. W. Schreiner; Treasurer, J. W. Lowell; Editor, H. C. Leon; Sergeant-at-arms, J. Dybalsky and I. M. Feinberg. Dr. C. B. McClurg was elected Honorary President.

The class, consisting of twenty (20) members, was the smallest Freshmen Class that ever entered the Medical Department. However, we have the honor of being the first class to enter under the new college requirement, so that what we lacked in numbers we well made up in quality.

The class represents all the sections of the United States, and some countries across the sea. A few of the boys come from the wheat fields of the Northwest, some from the East, while others are from far-off Poland.

The days rolled on until the Christmas vacation, which the class started with a private gathering of its members and respective professors. The holidays passed and January the 3rd found us united again preparing for the mid-year examinations.

The second semester was opened and the days passed by connected with little incidents which made them well worth remembering.

The annual class banquet was held at one of the leading hotels, and was attended by all of the class and its various professors. A jolly good time was had by all. The finals are started and before long our Freshman year will be history. May the coming year hold as much success, if not more than the last. With fond wishes to all, good-bye.

J. G. McCrary.

Hospitals

JEFFERSON PARK HOSPITAL

Jefferson Park Hospital

Jefferson Park Hospital was organized in the fall of 1905, being located on the northwest corner of Monroe and Loomis streets, a tract of land on which was the John Spry residence. This was remodeled for hospital purposes, and later an addition was made to the hospital for the surgical department. The rapidly increasing demand for space made it necessary to erect on the land adjoining it on the west, a modern five-story hospital structure, which was completed and opened in October, 1913. The old building was again remodeled, so that at the present time the entire structure has a capacity of ninety patients, with three fully equipped operating rooms, sun parlor and all other conveniences that are to be found in the modern hospital.

There is a training school for nurses in connection with the hospital, and Clinics are conducted daily for the Senior and Junior classes in the clinical amphitheater.

ST. BERNARD'S HOSPITAL

Wm. J. Hurley, M. D.

ST. BERNARD'S HOSPITAL

Although still in its infancy, being founded scarcely ten years ago by the Religious Hospitalers of St. Joseph, St. Bernard's Hospital is one of the leading institutions of its kind in the Middle West.

The hospital, constructed of the finest Georgia marble, was built at a cost of \$500,000, and possesses all modern conveniences. Accommodations may be had for over 300 patients, and last year over 3,000 patients were treated.

Notwithstanding that the institution receives neither state nor municipal financial aid, "The hand that helps" is extended to all unfortunates who are unable to pay, and this without regard to either creed or nationality. Dr. Hurley conducts amphitheatre and ward clinics for the Senior students of Loyola each Monday at this hospital.

LAKESIDE HOSPITAL

H. N. MacKechnie M. D.

The Lakeside Hospital

The Lakeside Hospital was established as a private institution in 1890, at 42nd and Lake Park Ave. and was moved to its present location at 35th and Rhodes in 1913.

The hospital has accommodation for 75 patients and is beautifully located on a large property in a quiet residence district of the South Side.

Dr. MacKechnie gives a surgical and diagnostic clinic every Wednesday morning for a section of the Senior Class.

THE COLUMBIA HOSPITAL

A. A. O'Neill, M. D.

THE COLUMBIA HOSPITAL

The Columbia Hospital and Training School, located at 4607 Champlain Avenue, was established in 1901 as a private hospital where Dr. O'Neill could carry out, without interference, his own ideas of treatment. The future large hospital must of necessity be a number of small units. Dr. A. A. O'Neill, assisted by his son, Dr. C. S. O'Neill, holds clinics for the Junior class of Loyola University Medical School.

Surgeon in Chief, A. Augustus O'Neill.

Junior Surgeon, C. S. O'Neill.

Junior Surgeon, J. H. Wilson.

Ophthalmologist, A. S. Cove.

Superintendent, Julia P. Kennedy, R. N.

MERCY HOSPITAL

Mercy Hospital

Mercy Hospital was established by the Sisters of Mercy in 1850, and in 1862 a large new building was erected at the corner of 26th and Calumet Ave. To this building extensive additions have been made at frequent intervals. Two years ago a splendid four-story nurses' home was completed, and this spring a larger wing is just completed.

Every department is conducted according to the highest modern standards and nothing is omitted which could in any way contribute to the comfort and welfare of the patients.

Mercy has always been a "teaching hospital" and for many years has been the home of the famous "Murphy clinic."

WASHINGTON PARK HOSPITAL

Thomas H. Kelley, M. D.

WASHINGTON PARK HOSPITAL

Washington Park Hospital was organized 12 years ago with Dr. C. O. Young as President of the Staff.

The Hospital is directly opposite Washington Park at 60th Street and Vernon Avenue.

This Hospital possesses all the modern equipment, including a strictly up-to-date Roentgen Laboratory, to which Mr. Lyons and son devote their entire time.

A Training School for nurses is run in conjunction with the Hospital.

This Hospital accommodates 125 patients, and the measure of its excellence seems to be indicated by a lack of empty beds.

Dr. Thomas H. Kelley has conducted clinics for the Seniors of Loyola University School of Medicine for the 1915-1916 term.

Zeta Mu Phi

Since the inception of the Delta Chapter of the Zeta Mu Phi Fraternity in 1913, it enjoyed a steadily progressive growth. The graduate members were at all times willing to sacrifice their interests to help along the organization of the Chapter and with the co-operation of the other local Chapters at the various schools, the social and educational activities of the Fraternity have flourished throughout the school year. From a modest beginning with six members three years ago the Delta Chapter now boasts of 24 active and 15 graduate members, which fact, considering the limited number of Jewish students available, gains added importance.

The noble purpose outlined by its founders will forever be in the minds of the members and the execution of the ideals laid down by our predecessors is incumbent upon every member. The broadening of the student's mental and spiritual scope, keeping abreast of medical progress, implanting into the heart of its members the true meaning of fraternalism: "Love thy neighbor as thyself," and promoting the welfare of its members, have forever been the aim of the organization and that these ideals have not been preached in vain, is evidenced by our successes. The fraternity meetings were not merely an exchange of gossip and school politics, and the reading and discussion of papers on scientific topics were always a prominent part, thus giving the undergraduate members more self-confidence, when discussing medical topics in the future.

That the social side of Fraternity life has not been neglected, is evident from the number of smokers and dances held throughout the year in conjunction with the other local Chapters. The annual banquet was held at the New Morrison Hotel, April 15th, 1916.

Being primarily a Fraternity of and for Jewish Medical Students, the membership is necessarily limited. However, we succeeded in gathering most of the available material into our folds, and the prospects for our future are extremely bright. We sincerely believe that the existence of our Fraternity is entirely justified and that the accusations of snobbishness customarily attributed to a college fraternity does not apply to the Aleph Yodh He Medical Fraternity.

The Society for Scientific Research

(MEDICAL DEPARTMENT LOYOLA UNIVERSITY)

Research is the trained, scientific investigation of the principles and facts of any subject based on original or first hand study. In the year 1914 the Society of Scientific Research was organized. The founders of the Society were members of the student body who were active assistants in the various laboratories. Each member is required to do some original research work independent of his regular studies. All research work will be under the direct supervision of the professor in that department. The student will then write a thesis on his subject, the same to be read before the society at one of its regular meetings. The thesis will embrace the following: object in view; apparatus used; his findings and results; resume of literature on the subject. The subject will then be criticized and debated, after which the board of censors will either accept or reject it.

Maximilian Herzog, M. D. LL.D., who was tendered a life membership in the society, honored us by accepting it. By the unanimous vote of the members the doctor was elected Honorary President, the expiration of the term to be optional on his part. Dr. Herzog has traveled a great deal, and with his scientific training we are confident we will receive great benefit from him.

The Board of Censors are deserving of mention for the interest they have manifested in our society. They are, respectively:

Cleveland C. MacLane, M. D. C., Chairman
 Henry F. Lewis, A. B., M. D.
 Otto C. Huber, Sc. B., M. D.
 Alfred de Roulet, M. S., M. D.
 Arthur B. Rankin, A. B., M. B.
 Maximilian Herzog, M. D., LL.D.
 Frank M. Horstman, Ph. G., Sc. B., M. D.
 Cyrus B. McClurg, M. D.
 George L. Apfelbach M. D.

Every member of this society donates his services at all times, and is prepared to make any sacrifice necessary for its success. When the purpose of an organization of this character is compared with the tendency of today, to commercialize all things, it is evident the only reward is something which cannot be purchased and is beyond price.

THE FUTURE HEAD OF THE ANATOMICAL DEPARTMENT

Social Events

Freshmen Smoker at "Nagle's."

No program. Just a good time and lots of it. Burns swam.

Freshman Banquet at the "Breevort."

Fine feed, music. Lots of fun.

Toast Master Prof. Huber. Chief wind jammer C. A. Theriault. Short speeches by Prof. McClurg, de Roulet and Horstman. Longer speeches by Drs. McCrary, Robinson, Kirkpatrick, Fein and Rouse.

Sophomore Banquet. Great Northern March 23, 1916.

Speeches by the class president Mr. Copia, the toast master Dr. Rankin and different members of the Faculty, among whom were Drs. Horstman, Herzog, McClurg, McCrary, Huber, de Roulet and Gossard.

Juniors:

Too busy with the year book to indulge in social frivolities.

Seniors:

The Seniors have worked hard all year with no diversion but class elections. The class is looking forward to their graduation banquet and dance at the La Salle Hotel May 27th. At this affair during the banquet the class history will be given, the class will probated, the class prophecy proclaimed and the class poem recited. This will be followed by oratorical outbursts by a few distinguished and eloquent members of the Alumni Association after which dancing will occupy the attention of the class until 2 G. M. Krause's famous Marine Band will furnish the music.

J.F. Smith

A Rousing Event

Wachlin was a lad, whose temptation to steal
Always grew more resistless when wanting a meal:
Once he entered a store, when no person was by,
Took a box of sardines and attempted to fly;
But although he could run when occasion required,
Like a stag to a stream, when the forest is fired.

The scoundrel was spotted and nabbed at the door,
By Officers Heinze, Sarpalius and Moore,
And away to jail midst a crowd you could see,
Went the thief, the sardines, and the officers three.
The next day came his hearing, and people were there
From all stations in life, on the prisoner to stare.

The judge ran his eyes the condemned man o'er,
From the crown of his head to his feet on the floor—
While Ed. seemed to study with critical care
The high honored "Court," with his thin crop of hair,
Then across on the lawyers and officers three,
He defiantly stared just as bold as could be.

The Judge tried a method to throw justice aside,
And appeal to Ed's manhood, his honor, his pride;
It is said, kindness conquers where knuckles will fail,
And a pardon may faster reform than the jail:
Who can tell but a change may regenerate you—
So we offer you mercy where none is your due.

In the future, whenever your stomach does feel,
Like digesting a fish, take a rod and a reel,
Some hooks, a fine line, and beetles a few,
And go catch your own fry, as all people do:
For you'll find it more wholesome to follow a creek,
And there angle for trout, seven days of the week.

—Oliver Joseph Watry, '18.

A Glimpse into the Future

It has been often noted that an American characteristic is the serene confidence that anybody is competent to do anything. In India a man whose forefathers were herdsmen must be a herdsman; if he is descended from a family of magicians he will be a magician; but we in our occidental conceit will take a man whose ancestors for centuries have tilled the soil or sailed the sea, and expect a State Board examination to make him a doctor. The public makes new and terrific demands on his strength and the result is that he meets only imperfectly the requirements of the service and breaks down under the strain. By the time he has become fairly adapted to his work, he is ready to retire or to be retired, and his children will revert to some other line of endeavor, such as salesmanship or quacking.

Before we can realize the maximum of efficiency in the medical profession we must invoke the science of eugenics and the law of adaptation to give us men congenitally fitted for the conditions under which they must work. We will make the position of M. D. hereditary and introduce a caste system, to segregate this class and interdict intermarriage with the ordinary genus homo. Artificial selection, in the form of an efficiency system could be counted on to weed out sporadic cases of atarism.

In a comparatively short time we could unquestionably develop a race of super-M. D.'s who, in addition to the alert mind and rugged physique requisite in their unique profession, would manifest certain highly specialized organic developments; such as small membranous sacs distributed over their anatomy, a la pocket-gopher, for pill-cases or a finger which would terminate in a tongue-depressor of the current type. The subconscious mind would become so capable that the diagnoses of infectious diseases would be comparatively easy; indeed it might become intuitive, like the new-born turtle's sense of direction. The super-M. D. will be able to go without sleep altogether. His stomach will become a sort of rock-crusher which will negotiate the all-night lunch counter doughnut with facility. He will assimilate knocks with composure and lawsuits with hilarious glee. As a child he will cry for his Dermatology.

He will have at least four hands—two for rolling pills and two for correcting mistakes made by non-eugenic M. D.'s. The nose will be a can-opener-like proboscis that will cut cat-gut and sharpen the proverbial pencil with alacrity.

The dreaded smash-up will leave him unscathed—simply lift the car off his neck and he will be back at his desk, sangfroid and all. An Automaton? Quite the reverse. The relegation of the many processes now conscious to the subsidiary ganglia will leave the subjective mind free to meditate upon the wonders of Nature or to develop personality which may even result in making the M. D. a wholly congenial person.

D. H. Howell, '17.

Only A Coin

Broke, gee whiz! No, here's a dime,
Well that's lucky; what's the date?
Eighteen eighty nine;
That sets me thinking, see how the coin's worn,
It came from the mint the year I was born.
'Twas started in life, like me, in May,
And just reached my hand, I'm twenty five to-day!

This coin most likely a murder has caused,
And with it a child in the toy shop has paused:
Been craved for by man both on sea and on land,
And perhaps for the student has bought "coffee and"
A family's starvation it may have relieved,
And over its loss a gambler has grieved;
Has bought for the suicide a potion of death,
Been blessed by the miser with his last earthly breath.
And now it's reached me and I needed it bad
Only a coin, and the last one I had.

Only a coin! but what potent power!
It buys men's souls and empires will lower
The babe in the cradle at the metal will clutch
In death it is nothing, in life, oh, how much!
"Well, man, what's the matter? Not eaten to-day,
Here take this money, go rejoicing away;
That I really need it, myself I could fool,
I would have had spent it for cigars or pool."
So then reflection comes quick to an end,
The coin, as you see, is an enemy or friend.

Rewritten by D. E. Shea '17.

Ode to the Nurse

One of the principal ends for which hospitals should be established is pedagogical; as in all education worthy the name, there should be a well-rounded training of soul and body—head, heart and hand. Your moral training should receive the greatest attention, for success in all professions as well as in all business stands on the foundation of morality. All moral obligation resolves itself into the obligation of conformity to the will of God, while the divorcement of morals and piety is characteristic of all pagan religions. Knoweth you that the true grandeur of humanity is in moral elevation, sustained, enlightened and decorated by the intellect of man.

Efficiency is to be the end sought in your training. To be strictly conscientious, gentle, energetic, sympathetic, unselfish and obedient are traits or qualities of a good nurse. These gifts, temperamental or acquired, render her trustworthy and lovable, but not efficient. To attain this superior skill in your profession you must have an **earnestness** of purpose, **fidelity** to instructions, **patience** in the details or routine work. Let us treat these three qualities separately.

Earnestness is the devotion of all the faculties. It is the cause of patience; gives endurance; overcomes pain; sustains hope; makes light of difficulties, and lessens the sense of weariness in overcoming them. There are important cases in which the difference between half a heart and a whole heart makes just the difference between signal defeat and a splendid victory. Without earnestness no man is ever great or does really great things. He may be the cleverest of men; he may be brilliant, entertaining, popular; but he will want weight. Bear in mind that earnestness is enthusiasm tempered by reason.

D. E. Shea, '17.

ACHIEVEMENT

The climb is hard the way is steep,
 The path is rough and hard to keep,
 The goal is far and foes deride
 The traveler on every side.
 Yet, day by day, and night by night,
 We nearer draw unto the height,
 Until at last the dawning sun,
 Shines on the prizes nobly won;
 And all the strife, and vain regret,
 By which the journey was beset,
 Forgotten lie amid the haze
 Of fast receding yesterdays.

Oliver J. Watry.

Carl Martin Neilsen's Dream

Time—1921.

Place—Minneapolis, Minnesota.

Scene—Dr. Neilsen's Office.

Dr. Neilsen, a graduate of the medical department of the Loyola U., 1916, and a successful practitioner, whose annual net proceeds are little better than 41,000 dollars.

He lives very comfortably in an aristocratic suburb of Minneapolis, with two motor cars at his disposal, one a Buick, the other a product of the late Henry Ford.

His office is located on the fourth floor of the First National Bank building, a suite of fourteen rooms, most elaborately equipped. From the hallway, four rooms bearing the name of the prominent physician and surgeon, with the word "private" below each, are seen. After passing the fourth door, the word "Entrance" seems to stand out quite prominently on the milked glass.

Below the glass, on a small wooden slab, a sign can be noticed which reads, "No beggars or canvassers allowed." It is not very large but little difficulty is needed to note its presence.

Upon entering the doctor's reception room, the first that takes the eye, is the oriental rug upon the floor, then the massive mahogany furniture, the works of noted artists, strung from the moulding around the wall, the splendor and value of which are beyond estimate. On the farthest side of the room is a tidy stenographer, who seems to be busy all the time, and who manages to find time to escort the patients to a seat, or question them in regards to seeing the doctor, all in a very courteous way.

One fine day during a summer month, a tall, slim shabbily dressed figure with exceptionally large feet and red hair, was seen entering the bank building. He trudged along to the directory on the main floor and after glancing over it for a few minutes, continued to the elevator. As the elevator ascended, the ragged creature yelled out in a husky voice, "FOUR!" At the fourth floor the operator opened the gates, and out scrambled the ragged hero.

He paused for a moment, and looked about the marble clad walls, with mahogany woodwork, after which he started down the hall, in search of Dr. Neilsen's suite, looking on either side of the hall. He managed to find the door which bore the insignia "Entrance," and was exceedingly surprised at

the number of rooms occupied by the doctor. Gradually the conspicuous creature approached the door, and with an undecided attitude he glanced around carefully. The small sign below the glass was noticed by him, which forbid beggars and canvassers from entering. At the impulse of the moment he was unnerved, and could not make up his mind to enter.

Feeling as he did, he stood off to one side, and watched the steady stream of patients entering and leaving the office. To him this was amazing. After thinking the matter over seriously, he decided that he would enter, the decision based upon the fact that he was once a good pal to the doctor, while they attended college, and he knew the doctor would not turn him down when a helping hand was needed.

He reached for the door knob, turned it gently, and entered the reception room. His tall stature was diminished at least one foot from sinking into the oriental rug, and his eyes were attracted to the floor. His eyes raised and were seemingly fixed upon the paintings on the wall.

In all the excitement, he failed to close the door, and stood motionless in the marks of his first steps in the room. The stenographer approached him in a courteous manner (far different than that he was used to) and asked him to be seated, after which he replied, "Thank you." The ragged hero was semi-dazed and could not realize the situation, but managed to keep himself busy. twisting his old threadbare cap into all sorts of contortions.

Up till this time he did not sit down, but after a little persuasion he did, and upon so doing found himself uncomfortably located in a large easy chair.

All eyes were fixed on the non-proportioned individual, as he seemed out of place. His eyes wandered from one side to the other, and the thoughts of remorse passed through his head like flashes of lightning.

The unfortunate was not seated long when the door leading from the doctor's office to the reception room opened, and out came the doctor himself to look over the patients that he might serve them in order. He glanced towards the shabby patient, but had to take a second look on account of noticing the red hair and large feet, which afterwards proved to be an old pal, "Russell Arthur Hennessey."

"Hello, Red," remarked the doctor, which was replied by, "Hello, Ole," from Red. "What brings you here?" asked the doctor, which almost brought tears to Red's eyes. The doctor noticed he had touched a weak spot, and invited him into privacy.

"No! No!" said Red. "You attend to your patients and let me wait. At this the doctor seemed to get peeved, and said, "Never mind the patients, they can wait, and if they don't want to wait they can go. They'll have to come back to me anyhow."

They went to the doctor's private office where a pathetic story was related by Red, and he asked for railroad fare to his home at Delavan, Wisconsin. The doctor, with a smile in his eye, and a light heart, thrust his hand into his pocket, submerging a roll of green and yellow backs. He removed the heavy rubber band from the bills, peeled off two twenties and said, "Here, Red, is this enough?" "Yes," replied Red with a smile that brought tears to his eyes.

"Well, then," said the doctor, "here is twenty more for good luck." "Thank you, Carl," said Red, "I'll mail this back to you when I get on my feet again.

As Red was about to leave, the doctor asked him to wait in the reception room until office hours were over, that they might dine together at his home. Red waited, and had dinner at the fashionable home of the doctor, after which Red boarded a train for Delavan. "Good-bye, Carl," yelled Red. "Good-bye," responded the Doc.

Carl was asleep on the couch in Red's basement, where they study every evening, Red was upstairs wrapping himself around a few sandwiches, when he received a phone call from the J. P. H. for an O. B. case. He immediately ran down to where Neilsen was sleeping.

He shook him a bit and cried out, "Carl, wake up, an O. B. case at the J. P. H. Hurry up or we'll miss it and Lewis will flunk us."

Carl gradually came to, and groaned "Your a hell of a fellow. I was just collecting five bills for a consultation fee." When he came to they hurried to the J. P. H. only to find they were 20 minutes late, the roll was already called, and the umbilicus was dressed.

Ivan Lewis Finkelberg.

A Tragedy in One Act

Entitled

TAKING THE JOY OUT OF LIFE

or

HITTING BELOW THE BELT

D. Herman Howell, Author

Dr. Alfred de Roulet, Censor

Time—P. X.—about 2 bells.

Place—Tenements near Fulton and Ada Streets

CAST OF CHARACTERS

The Great Clinician.....Mr. Kent Eastman
The Consultant.....Miss Helen Gorecki

Mr. Eastman invites Miss Gorecki to accompany him on a visit to one of his patients. After making his diagnosis, paying his respects to the parents of the sick child, giving instructions as to diet, temperature of the sick room, etc., it occurred to Mr. Eastman that a change of medicine might be in order. He felt for his pencil which he was unable to locate and turned appealingly to Miss Gorecki and this is the dialogue which the parents overheard:

Mr. Eastman—Miss Gorecki, will you please write a prescription for a dram of this and two ounces q. s. ad. of that and I will sign it.

Miss Gorecki—Why, Mr. Eastman, you cannot sign it because you are not a doctor.

Curtain.

LIFE'S JOURNEY

Now since Eternity is meant for us,
Let's take our time in living,
With eyes to see, walk through a world
Made fair by God's good giving.

With ears to hear His angels sing,
Where winds blow soft and sighing,
Let's learn the sacred things of life,
And lose our fear of dying.

—Oliver Joseph Watry, '18.

TO A YOUNG PHYSICIAN

The paths of pain are thine. Go forth
With healing and with hope;
The suffering of a sin-sick earth
Shall give thee ample scope.

In Taney County

Mary F. Nixon-Roulet

When I passed Taney creek the ford was dry as a bone, but over in the north I saw a black cloud which foretold bad weather, so I felt to see if my saddle bags were safe and put spurs to Dolly, hurrying along the hilly road at a quick pace.

That was by no means easy in Taney County, for the roads were the worst in the world, and, steep, gravelly and crumbly, in the best of weather they were difficult to travel, while in bad weather they were well-nigh impassible.

Down East we say "Providence permitting," when speaking of a doubtful enterprise, but in Southwest Missouri Providence is little known and less heeded. Here, however, there is one thing always to be counted upon, so the natives say, "We'll do so and so, if the creeks don't rise."

I was to reach shelter at Atkinson before night, "if the creeks didn't rise," and the cloud foretold rain enough to raise the Dead Sea.

My partner and I kept a country store at Rolandsville, in a more civilized region, and we had been out drumming up trade through the southwest. It was not long after the war and the country was full of rough characters, so that traveling was not the safest thing to do.

My partner had gotten a spell of ague several days back and had laid up for repairs at Atkinson. We were compelled to be back in Rolandsville by a certain date to meet some notes, and there was one more town to make before our return, so that I had determined to go alone.

Leaving our buggy and one of the team, I borrowed some capacious saddle-bags in which to pack my samples, and fortified by a revolver in my hip-pocket, I had safely made my trip and was returning, on Dolly, my sturdy mare. The knowledge that I had a thousand dollars in my belt, and that I could not, even by the best of riding, reach Atkinson before dark, did

I had four fords to make and by the time I reached the second, a slight courage about me like a cloak, hurrying on over the rocky paths.

I had four fords to make and by the time I reached the second, a slight rain fell and my horse was up to her ankles. I pulled out slicker and chaps, wriggled into them and gave Dolly her head, for she felt her oats and knew that her nose was pointed toward home.

We dashed along at a fine pace, the rain growing heavier and pricking my face like pine needles. Past hickory trees, their green leaves drooping under the weight of the big drops, over ruts and ridges, splashing through puddles, here jumping a tree trunk—fallen across the path—there swerving aside to avoid a huge stump, paying no heed to the picturesque landscape of this region called Switzerland, Dolly and I rushed on.

The third ford was reached about four o'clock and the waters were swirling and swishing along the broad channel. In went the plucky little mare, up to her knees and the current thought came. I had forgotten the landing! It was either above or below the forked scrub oak, but which? A cold perspiration broke out all over me. Had I come this far only to be drowned in a muddy Missouri creek? There was no way but to trust to Dolly, and horses so often have more sense than their masters that I hoped she would bring me out safely. So, as we neared the left bank I spoke encouragingly to the mare and threw the lines loose upon her neck, allowing her to take her own way.

She paused a moment, looked up and down, then, with a snort she refused the landing and floundered into deep water and swam down the stream. By this time the thunder was deafening and the flashes of lightning showed me that the horse was right, for the banks were washed away and landing impossible. I felt her growing tired and quivering beneath me and swung myself from the saddle, swimming beside her, with a hand on the bridle, easy enough since we were going with the current. Presently I felt the horse slow up, the water grew shallower, and Dolly guided me into a small cove where landing was easy.

Bedraggled and cold I wrung the water from my clothes as best I could. My hat was gone in the scramble, but with a word of praise to my good horse, I was up and away again. Whither? I tried to double on our tracks and reach the road by the ford again, but there seemed to be no way out of the hazel-nut thicket save by a narrow path straight ahead. "Well, my girl," I said to Dolly, "you've got me into this and I reckon you'll get me out. On it is," and I made for the path through the forest.

It was black as pitch. No ray of light was to be seen, except for an occasional flash which revealed the densest of thickets, scrub oaks, hickory and walnut trees, with underbrush as high as the horse's head.

Suddenly we came out into an open space, a clearing about a hut, and I called loudly as I saw that we had made a circuit and come back to the river side again.

"Hello! Hello, you there!" I shouted, seeing that there was a light in the hut and a man's figure stood at the window.

"You kin go on," he called out. "I can't ferry no man in this kinder weather."

His words took away any desire I might have had to tarry, for they called to mind the story of this fourth ford, for the ferryman was the famous wife-murderer tried but a fortnight before and not convicted. Everybody knew that he had killed the woman in the most blood-curdling of ways, yet no man would testify against him for fear that he would accuse them of some of their crimes, at which he had winked, if he had not actively assisted.

The soggy woods and my mare were far better company than this ferocious creature, and I tarried only to call out, "Which is the way to Atkinson?"

He shouted something like "take over the hill to the right," and Dolly and I proceeded to take over the hill as rapidly as possible.

The rain had ceased, but the rumbling of the heavens overhead gave us no assurance that the calm was permanent, and the hill we were climbing was of the stair-step variety. Literally so, for the rock was flat for a foot or two at a time and then was cut into regular steps, and the horse could mount only by leaping from ledge to ledge. Once at the top I paused to give her a breathing space and to search for the road to the right. There was a semblance of one, a path through the woods, but just as I turned into it Dolly reared and snorted, and I saw the figure of a man standing in the crotch of a snake fence, under a hickory tree.

"Hello!" I said. "Is this the way to Atkinson?" There was no answer and I reached quickly for my gun. The man did not stir and I got the drop on him, pointing the revolver at him I said again, "Hello, you! Can't you answer?" Still that silence, and I muttered impatiently something about a 'God-forsaken country where people wouldn't answer a civil question!

Still the man did not move and I began to be both scared and angry. There was something uncanny in the motionless figure and I began to suspect an ambush. Dolly shaking all over like she had an ague fit, I forced her up to the figure and took the man roughly by the arm. Then I nearly fell from my saddle, for the man was as cold as a stone and I knew he was dead.

How long he has been there I could not tell, but there he was, propped up in the fence corner with a bullet hole in his forehead. It was a horrid sight and I gave a shudder at the wickedness of a murderer who would not even let his victim rest on Mother Earth. I couldn't leave him like that, so I laid him down on the earth from whence he came, pulling leaves and branches over his body and marking the spot so I could send someone to bury him if the chance came.

Then I rode on again feeling that low in my mind that I wished I'd never come again. There seemed no end to that road. It grew dark and I was cold and wet, so tired I was ready to drop, and I knew Dolly could not hold out much longer. Then we came upon a steep hill with a shanty at the top and I made up my mind that these people should take me in, whether they wanted to or not. I could go no further. Stopping Dolly I shouted, "Hello!" No answer.

"Hello!" I shouted again, with a curse for the inhospitable ways of the country. As silence was all I received, I spurred Dolly up the hill and kicked with my boot on the door.

"What yer want?" demanded a man's voice from within.

"I want shelter, food and fire," was my angry response. "A place for my horse and a roof over my head if it's only your stable."

"Are you alone?" asked the half-angry, half-frightened voice.

"Of course I am, and nearly drowned. Come, tell me at least where I can feed my horse and let me lie down beside her if you won't let me in the house," I said pleadingly, for I was so worn out that rest was about the only thing I could think of.

A crack of the door opened and the muzzle of a revolver appeared. Now, courage is a very fine thing to talk about and I fancy I've got my share of it, but anyone who has ever looked down a revolver barrel at three feet knows how I felt, and anybody that hasn't needn't care for the experience.

"Young man," said the voice behind the barrel, "yer must excuse the coolness of my welcome, but there's been too many people shot down at their doors hereabouts to make us particular cordial about welcoming people after dark. From what I kin hear yer not a bad sort, an' ef yer a mind to do es I say, yer kin stop hyar. Turn yer horse round." The order came quick and sharp, and while I didn't care about turning my back on that gun it's surprising what a strong argument a revolver is when the other fellow's got the drop, and I obeyed.

"Walk the horse to thet shanty an' feed her. Then yer kin come back hyar," said my invisible friend.

I did so, finding hay and oats for Dolly and rubbing her down, made her as comfortable as I could.

When I returned to the door the man met me, admitting me to the kitchen, where he seemed reassured as to my intentions. This feeling I did not altogether reciprocate. He was an uncouth figure. Long hair lay matted and heavy upon his shoulders and a gray beard covered the greater part of his face, from which two black, beady eyes watched me furtively.

I grew more and more uneasy, almost wishing that I had risked a night in the woods rather than in such company as this.

He gave me some supper, cold corn bread and sorghum, and motioning me towards the loft, to which a ladder led through a trap-door, he said:

"Yer kin go up thar an' sleep."

I could not refuse the invitation, it was rather like a command, and went up the slippery rounds of the ladder with a certainty that this was my last night on earth. There was a rough, straw pallet on the floor and I threw myself down upon it. Sleep, there was none for me, and I lay there breathlessly awaiting the next step.

I knew that I was near the famous Bald Knobber region and that the inhabitants were celebrated for their desperate deeds. That an attempt to murder me would be made I had not the slightest doubt, and in a few moments a stealthy step met my ear. Then I heard a grating noise. Had my time come? The noise ceased and the steps moved slowly away. Then it dawned upon me that my host had taken away the ladder and that I was a prisoner. Doubtless he would now go and find some confederate; but if I could not get down, at any rate he could not get up without noise enough to give me warning. I determined to sell my life dearly, drew my revolver and waited.

All was still.

At last a muffled voice said:

"Say mister, air yer asleep?"

I made no answer and fancied I heard a faint sigh of relief. Then there came a muttered, "I'll do it!"

I braced myself for the worst. There was a moment's strain—silence, and then the voice said, "Oh, Lord!" and stopped.

Scarcely believing my ears I crawled to the opening in the floor and looked down. In the middle of the floor, where the firelight fell full upon him, the old corn-cracker kneeled, upright upon the bare boards. His bony hands were clasped and his eyes squeezed tight shut.

"Oh Lord," he began again, "I reckon yer knows everything, an' so yer knows that I ain't no hand at prayin'. I done forgot all the prayers my folks done tole me, but pears like I kin remember their sayin' that a pussen should call upon yer in the day uv trouble. Oh Lord, 'taint a day but I'm in trouble all right 'nuff. If it 'twas a wild cat or a bar I could fix him without botherin' yer, but it's a man an' he don't know that I ain't got a charge fur my gun. Tennyrate, he's et my salt an' I ain't got no call ter kill him, specially when he's asleep. He don't look vicious, but yer kin never tell by a man's looks, an' I seen a hump in his pant's pocket when he went up the ladder as meant a gun. I've done everything I kin think uv to keep him safe up that an' me safe down hyar, an now, Oh, Lord! it's yer turn. All I'm axin' is that ye'll put him ter sleep so ez I kin get some rest, fur I'm dead beat; I ain't really no call ter ax yer favors, Oh, Lord, but my uncle wuz a parson down in Tennessee. 'Men."

I crawled back to my straw, put up my gun and lay down. So swiftly did slumber steal upon me that I daresay in five minutes I was reassuring the old man below by the most vigorous snores.

Next morning he treated me to a hearty breakfast, and I told him of my ride, asking him to bury the poor fellow I had found in the woods below, which he promised to do, more than half suspicious that I was to blame for his death.

As I bade him good-bye, offering him pay for his hospitality, he said:

"No, I won't take nothin' thank ye. I don't keep no hotel.

Call again as yer passin'! Yer kin give me some charges fur my gun, if yer like. Say, Mister, somewhat sheepishly, "Do yer believe in what the campmeetin' folks calls 'answers to prayer?'"

"Oh, I don't know. I reckon they're often answered." I said, not much given to speculations on the subject, "Why, do you?"

He looked at me strangely for a moment and his beady eyes twinkled and then he said thoughtfully:

"Yesterday I wasn't thinkin' about it, but this mawnin' pears like I did."

A VISION

My Sweetheart's hair is soft and brown,
She has a fleeting little frown,
A sudden smile;
Her cheeks are carmine ting'd; her eyes
Fill'd with the light of summer skies
And free from guile.

Her hands are tiny, plump and tanned,
Her waist, when critically scanned
By manly gaze,
Seems not too plump for manly arm
To measure, in the witching charm,
Of moonlight haze.

"Ah! would this priceless gem were mine,
Within my lonely den to shine,"
Sadly I sigh
I long that lovely face to see,
To have that smile beam forth on me,
To see her nigh.

And would you know when first we met?
It lingers in my memory yet,
So sweet it seemed;
'Twas on a frosty winter night,
And by my lonely fireside's light
I only dreamed.

Mary F. Nixon-Roulet.

The Philosophy of Pain

Henry F. Lewis, M. D.

Many of us are prone to look upon all pain as an unmitigated evil, to be deplored and to be stopped at all costs. That some pain is useful and beneficent is just as true as that some pain is hopeless and unendurable.

At the very beginning of life pain begins its usefulness. The new born baby usually waits some little time before it begins to breathe, and then, with the first good breath, emits a lusty howl. It cries because it feels pain. The difficulties of birth, the disagreeable effect of the air of the cold world upon its wet body, or the necessary spanking which is sometimes administered to make it breathe, all are painful and all doubtless are factors in stimulating the essential process of breathing, the first necessary act of life.

Less immediately necessary is eating. The new born infant takes the breast and works for its meals because it is hungry; that is because it feels the pains of hunger referred to the region of the stomach. If not put to the breast when it is hungry it expresses its sense of pain by crying. If pain were suddenly abolished in the world all the higher animals except man would perish. One cause of this would be starvation on account of the lack of hunger. Man would escape only because his superior intelligence tells him that food is necessary.

The infant eats too much, gulps its food too greedily and swallows air with it; is given food which ferments and creates gases in the stomach and intestines. It then has pain in the abdomen—"stomach-ache," so-called—and it again raises its voice in a lusty wail. Its complaints bring the mother or the nurse, so that something may be done for its relief.

A badly placed pin, a binder too tight, too much heat from too much clothing, fatigue from lying too long in one position, irritation from wet clothing, or other cause of pain and discomfort, causes the baby to express its pain by the usual crying. All of these disagreeable things, if allowed to continue, would cause more or less harm to the child. The harm might arise from a sore on account of the pin, chafing from wet clothing, partial paralysis from pressure on an arm, skin eruptions from excessive heat, or at least evil effects from loss of sleep. From these the pain and consequent complaint save the infant.

Unfortunately, susceptibility to pain can be increased by cultivation. Therefore there is no sense in cultivating the sense of pain to a fine point. The nervous system, even of a little baby, can be brought to too fine an edge by too much attention to its little pains. It can also be overcultivated by too much attention, too much showing off, too much coddling and baby talk.

Many children, especially the first born, get more attention than is good for them, and their susceptibility is stimulated. They cry because of small discomfort, even because they miss the coddling and nerve-racking attention which fond parents have given them. A healthy child, clean, dry, unpinched, unpricked, not hungry and not thirsty, will lie quiet and soon go to sleep. If it continues to cry it is not healthy, in which case it needs medical care, or it has acquired the crying habit because it has been taught to magnify its little disagreeable feelings by cultivation of its nervousness. In the latter case it should be treated by discipline. If allowed to cry a few times without further attention it will soon learn to stop.

Above everything, medicines intended merely to stop pain should be avoided. They cover up the cause which should be known in order to be removed. They derange digestion, injure the nervous system, and, worst of all, start a habit from which it is hard to wean the child. In fact no medicine of any kind should be given to a baby unless by the order of a physician, after he has made a careful examination of the child. Most of the anodynes, that is drugs, intended to stop pain are especially poisonous to infants.

ILL TRY

When difficulties line his way,
I like to hear a fellow say:
I'll try!
Confronted by a task that's new,
Perhaps a dangerous mission, too,
Wherein success may be in doubt,
I like to see him think it out,
Sum up his chances and reply:
I'll try!

There's something in the boy or man
Who rules himself upon this plan:
I'll try!
Too many say: "I can't" before
They've ever looked a problem o'er;
Responsibility they shirk,
And seem to fear unusual work,
This is the phrase of do or die:
I'll try!

Would there were more young men today
When Duty calls to them, who'd say
I'll try!
Would fear had not so strong a hold
On mortals, and that more were bold;
Bold in their willingness to face
The tasks that are not commonplace—
To answer Doubt with this reply:
I'll try!

—Edgar A. Guest.

Seasonable Oblations

By Mazie V. Caruthers

After each meal, our family
 (Three blessed times per day),
 Teaspoon or measuring-glass in hand,
 Lines up at the buffet.

And then and there we serve ourselves
 The last (and liquid) course.
 Poor little Tom's had whooping-cough,
 And barked till he is hoarse;

So soothing sirup is his dose.
 And two small, light-brown pills
 Is father's; while the mater aids
 Her various aches and ills

By taking salts, discreetly mixed.
 An herb concoction's mine,
 And sister's pet prescription seems
 To'be an egg and wine.

'Tis thus, although the vernal months
 Tired feeling sure will bring,
 We ward them off by drinking these
 Oblations to the Spring!

A SPORTING CHANCE

By Mary Kalor Hutchinson

As I was walking down a street
 In Boston recently,
 A black-eyed youth I chanced to meet
 Who chanted merrily:
 "Banana! Ten-ah-do!" he cried,
 And: "Ten-ah-do!" again.
 "I betcha ten he don't," replied
 A group of sporting men

Faculty Sayings

"Well, who der Tueffel can a gut speech on Wasser gemacht?"—Dean Herzog.

"I turned all that over to Dr. de Roulet."—Father Spalding.

"I think some of this class deserves an encore—say about one semester."—Prof. Horstman.

"Britannia rules the waves but, by heck, I am running this lab."—Robinson.

"You're all right as far as you go, but you're not much of a Pedestrian."—Prof. Huber.

"I think he's a very good student if you don't care what you say."—Prof. McClurg.

"Doctor, this is Doctor McCrary. Do you think you could let me have about six dollars for the year book?"—McCrary.

"Embryology is all right, but I don't like it in a sandwich."—Kirkpatrick.

"Do the best you can with the books you have, the real one will be out in June."—Prof. Lewis.

"Quiet, gentlemen, quiet, I want to keep you out of the penitentiary."—Prof. Wade.

"Each and every one of you must call me Doctor."—Fein.

"Gentlemen, I have written a book."—MacLane.

"No smoking, I will walk out if you do."—Prof. Pollock.

"Follow my outline for feeding in fever—always."—Prof. Graves.

"What's the matter with him, sir. What's the matter with him."—Fine!
Just one hundred per cent wrong!"—Prof. J. B. Murphy.

"We have got to have order here, we hold the reins."—Dr. Lavieri.

"In my thirteen years with Dr. Murphy."—Dr. Golden.

"On the other hand, gentlemen, you have got to know your anatomy."—Prof. Hurley.

"They say that I don't give the Jews a square deal, but they had better be glad I don't give them what's coming to them."—Prof. Norden.

"This is the way they do at Rush."—Prof. Marcusson.

"All right! Shoot!"—Prof. MacDiarmid.

"Use your head, Doctor, use your head."—Dr. Hartigan.

"And now, on the other hand, as I have said before."—Prof. Hurley.

"Who's got a book on medicine?"—Dr. Apostolides.

"There's more than peemples in dermatology."—Prof. Zurawski.

"Why should I lecture!"—Prof. Kreissl.

"Yes, yes; that's all right, draw that."—Dr. Gossard.

"You're going to be a lost bird."—Dr. McClurg.

"I'm going to get married soon."—Dr. Apfelbach.

"You gotta know, that's all they are to it."—Dr. Huber.

"We've just got another hospital."—Dr. de Roulet.

"Now, doctor, my little book says—"—Prof. Reading.

"Kindly articulate more clearly."—Dr. Weiss.

"And now so on and so forth."—Prof. Holmboe.

"Bichloride made me famous."—Dr. Carter.

"His nibs says you gotta come across before you can take your exams"—
Miss Sherwood.

"This morning, gentlemen, we will do a tonsilectomy."—Prof. Grim.

"Let Son do it."—Prof. Burkholder.

"When I taught in normal school."—Dr. Pollock.

"Just an ounce of ether, gentlemen, as a finishing touch."—Prof. de
Tarnowski.

"As we used to do it in Europe—before the war."—Prof. Heeberlin.

"Will the class be there? Well, hold them till I come."—Prof. Gam-
mage.

"At the Northwestern, DeLee and me did things this way."—Dr. Elliott.

"The old drug therapy is shot to pieces."—Dr. Whalen.

"I may not get to heaven, but I can go back to Sturgeon Bay."—Prof.
Norden.

"It's a wise owl that stays sober—any damphool can get stewed."—Dr.
de Roulet.

"Say, Doctor, why can't I have a skeleton on Thursdays."—Dr. Holmboe.

"Medicine is 90 per cent common sense and 10 per cent waiting."—Prof.
MacDiarmid.

"In appendicitis symptoms develop this way and no other, see that you
get them straight."—Prof. MacKechnie.

"I have observed that it is unlucky for a medical student to associate
with ponies in January and May and it is not entirely safe in September."—
Prof. Lewis.

"Got any money?"—Miss Leahy.

"Where's Dad?"—Dr. C. A. Burkholder.

"Oh! Jake!"—The entire faculty.

Heard In the Office

Miss Leahy: Say, Berdecia, how do you say 'good morning' in Spanish?"

Berdecia: "Yo t'amo."

Five minutes later:

Miss Leahy: "Yo t'amo, Senor Herzog."

Prof. Herzog: "Mein Gott in Himmel!"

Positives and Negatives

The average man is a slave to his thoughts, ideas, and feelings. He is governed by inherited tendencies, and the suggestions of other minds. He allows his feelings to run away with him, and does not realize that he may regulate and govern them, changing and inhibiting them at will. He thinks that he is what he seems to be, and fails to understand that he may make himself that which he wishes. The average person is a mere puppet of environment and outside influences. He is swept from his feet by waves of feeling that he is utterly unable to repress or control, and is a creature of his own feeling and moods. He does not realize what Self-Mastery is—the words convey no meaning to him, for he does not recognize the Self. The men who have risen from the ranks, and who stand head and shoulders above their fellows in mental achievements have invariably realized this although they may never have reasoned it out consciously—their recognition may have been intuitive. This mastery by the "I" opens up an entirely new world of thought, feeling, and activity to the individual. To be able to make of oneself what one will is truly a wonderful thing. To think what one wants to think, feel what one wants to feel, do what one wants to do—surely this is an achievement worthy of a master. And it is possible to those who will take the time and trouble to acquire the act of Self-Mastery and Self-Expression.

The problem, then, before a man is first to find out how some of his longings may be changed and then to see how those which he cannot or does not intend to change can be most completely satisfied.

The problem before any society is to find out how its own essential requirements can be fulfilled, how its future prosperity can be ensured, and at the same time how far it can safely allow its individual members to seek their own satisfaction by their own special methods.

W. H. FREUND.

“Heard at Our Banquets”

Here's to Woman, present and past,
 And those who come hereafter;
 But if one comes here after us,
 We'll have no cause for laughter.

Here's to the ships of the ocean,
 Here's to the women of the land;
 May the former be well rigged,
 And the latter be well manned.

There was a young man who said, "Honey,
 I know that you think it is funny
 When you see how I keep
 Up so long without sleep;
 But I can't go to bed; I've got money."

Here's to the Press, the Pulpit,
 And the Petticoat, the three ruling powers
 of the day. The first spreads knowledge;
 the second spreads morals; and the third
 spreads considerably.

May the hinges of friendship never grow
 rusty.

May your joy be as deep as the ocean;
 Your troubles as light as its foam.

Here's to Home, the place where you are
 treated best and grumble most.

1916

1912—PHYSIOLOGICAL EVOLUTION—1916

Way Ahead

First Father—I hear your son is pursuing his studies in the University.

Second Father—Yes, but I think he's losing ground.

Judging From the Specimen

Malone—A dancer reminds me of a tug boat.

Shea—How so?

Malone—Lives by her tows.

Rather Irritating

Glasco—Why do you gnash your teeth?

Doughester—I missed a book and, when I asked for a second-hand one at Doughester, they handed me out my old one.

HIC JACET

Dr. Norden: "How would you measure lung excursion?"

Rasmussen: "I would have the patient first respire and then expire."

The rain it falleth on the just,

And also on the unjust feller,

But mostly on the just, because,

The unjust has the just's umbreller.

—Scimitar.

Necessary

"I hear they buried the janitor last week."

"Yes, they had to, he died."

Cash

A physician attending an obstetrical case where pay is not good, when asked, "Doctor, is the child marked in any way," answered:

"It has only one little mark about it, but you can easily remove it."

"What is it, Doctor?"

"It is marked 'C. O. D.'"

What He Had Learned

Father, when Willie had returned from his first day at school—What did you learn at school today?

Willie—I learned to say "Yes, sir," and "Yes, Ma'am," and "No, ma'am."

Father—You did?

Willie—Yep.

Intelligent Bovine

A former one-cow dairyman was notified by the Board of Health that his license had expired. He sat down and answered:

"Dear sir:—The cow beat you to it; she expired first."

Rattled

It was Smith's first Sunday as usher in church, and he was a bit flustered.

Turning to a lady who entered, he said: "This way, madam, and I will sew you into a sheet."

Time for Kindness

There is always time to find
Ways of being sweet and kind;
There is always time to share
Smiles and kindness everywhere.
Time to send the frowns away,
Time a gentle word to say,
Time for helpfulness, and time
To assist the weak to climb.
Time to give a little flower,
Time for friendship any hour,
But there is no time to spare,
For unkindness anywhere.

A Profitable Venture

"Della studied medicine, you know, and I've taken a cooking school course."

"Well?"

"We're going to start a magazine called 'What to Eat and How to Get Over It.'"

Perhaps He Really Did It

She—Will fasting make you thin?

He—I don't think so. I lived on water for five days last summer and didn't lose a pound.

She—You did?

He—Yes, from New York to Liverpool.

A General Application

"The world is getting too blamed hurried," said the thin man. "The other day I had occasion to write on business to the proprietor of this cafe and rubber-stamped my letter, 'Dictated but not read.'"

"Well?" asked the fat man, "go on."

"At dinner last night, my soup came in with a card on the side: 'Cooked but not tasted.'"

Mother—Tommy, stop using such dreadful language.

Tommy—Well, mother, Shakespeare uses it.

Mother—Then don't play with him, he's no fit companion for you

Boy (reading)—She threw herself into the river. Her husband, horror stricken, rushed to the bank.

Teacher—Why did he rush to the bank?

Boy—To get the life insurance money, of course.

Oh! But!

Father (caressing his right shoe)—You will get over it! It was only Puppy Love!

Della (sobbing)—B-B-But he was such a nice puppy!

A Natural Feeling

Patient—Doctor, what ails me? I feel as if I should fly.

Physician—Perhaps you should. What have you been doing?

If you think these jokes are old,
And should be laid upon the shelf,
Just come around, a few of you,
And hand some in yourself.

Why He Knew He Was Alive

A certain young man's friend thought he was dead, but he was only in a state of coma. When, in ample time to avoid being buried, he showed signs of life, he was asked how it seemed to be dead.

"Dead?" he exclaimed, "I wasn't dead. I knew all that was going on. And I knew I wasn't dead, too, because my feet were cold and I was hungry."

"But how did that fact make you think you were still alive?" asked one of the curious.

"Well, this way: I knew that if I were in heaven I wouldn't be hungry. And if I were in the other place my feet wouldn't be cold."

Mr. But this stuff is by a friend of mine and he'll take two boots

Flanan—Oh, lo k at that man. He's only got one arm.

Chiasson—Hush! He'll hear you.

Flan.—Why, doesn't he know it.

Vein Art.

She had a vast amount of money but it had come to her quite recently. One day an acquaintance asked her if she was fond of Art.

"Fond of Art!" she exclaimed. Well, I should say I was. If I'm ever in a city where others are Artery I never fall to visit it.

She—Before we were married you told me you were well off.

He—Well, I was.

Wolfson—Cigar, old man?

Omens—Thanks (puff, puff), this a dandy. Aren't you going to smoke too?

Wolfson (Examines remaining one)—No, I think not.

Omens—What's the matter, did you give me the good one?

Burns—I want you to know I am a self-made man.

Chapman—That certainly takes a great responsibility off of God.

Dr. McClurg—Place your hand on the pectoralis major muscle.

Theriahult (remains standing with hands in his pocket). (Much laughter.)

Dr. McClurg—That's all right, boys, things will get misplaced once in a while.

Freshman—How long can one live without brains?

Dr. Rankir.—How old are you?

Dr. Huber—How was iron first discovered?

Fortney—They smelt it.

Troy—I am indebted to you for all I know.

Dr. Horstman—Don't mention it, it is a mere trifle.

BUSINESS TOPICS

The X-ray machine is a rational device in any physician's office if he desires to become a "specialist" and a "professor." Those who cannot afford to buy one, may substitute it by an old printing press or a washing machine. There are no objections from the patients as long as they are assured that the physician sees every little particle in their body.

Some of the X-ray machine possessors are unable to operate it or operate at such times when it is out of commission; nevertheless, they succeed. Therefore I don't see any reason why any kind of box or machinery put into a physician's office and named "X-ray machine," could not bring a similar success.

A. Montvid.

Editor THE REJECTION OF A CONTRIBUTION DOES NOT NECESSARILY IMPLY
LACK OF MERIT, ETC.

Dr. Weiss to New Junior: "Percuss lighter, much lighter! ten times lighter! ten thousand times lighter!!!
Business of shivering by N. J.

Dr. Gray: "Give the subjective signs of the first trimester."

Altman: "The woman hates the sight of her husband."

Dr. Lewis: Describe your treatment for asphyxia neonatorium."

Eastman: "Start artificial respiration and keep it up till patient is absolutely dead."

Donald: "I'm tryin' feesh, Sandy. It's an excellent brain food, ye ken."

Sandy: "Fine! But, man, it seems a pity to waste the feesh."

During the fighting a Highlander had the misfortune to get his head blown off.

A comrade communicated the sad news to another gallant Scot, who asked, anxiously:

"Where's his head? He was smoking ma pipe."

"I can't imagine what's the matter with me, doctor. I'm continually thinking about myself!"

"Tut, tut! You must stop worrying over trifles!"

Sheriff to prisoner condemned to hang: "Say, George, would you like some exercise, say a walk in the yard?"

Prisoner: "If you please, Mr. Sheriff, I would like to skip the rope."

Convict 1103: "The doc just told me if I did not quit smoking I'd croak within two years."

Convict 1104: "Going to quit?"

Convict 1103: "Nope; the joke's on the doc; I'm going to be hung next month."

PREPARATION

In a prosperous rural community the village doctor was also the superintendent of the Sunday School. Incidentally he taught a class of small boys. "Willie," impressively remarked the doctor one Sunday afternoon, to a bright-faced youngster, "can you tell me what must we do in order to get to heaven?" "Yes, sir," was the prompt response of Willie, "we must die." "That is very true," said the doctor encouragingly, "but can't you tell me what we must do before we die?" "Yes, sir," was the startling rejoinder of Willie, "we must send for you."

EXPLAINED

Captain Turner of the ill-fated Lusitania had a story about the ravages of seasickness that he often told in the saloon.

"A passenger," he would begin "approached another passenger and said:

"We're getting up a tug-of-war between a team of married men and a team of single men. You're married, aren't you?"

"No," the other answered, "I'm seasick; that's what makes me look like this."

HIS PRECAUTIONS

Shea: "Tell me, what precautions do you take against water infected with microbes?"

Campbell: "First I boil it, and then I filter it."

Shea: "Excellent! And then?"

Campbell: "Then I drink beer!"

A BIT RUSTY

J. I. lies seriously ill at his home with no chance of recovery. His ailment is corrosion of the liver.

TRANSLATION

McCrosky: "What is pancreatitis?"

Davidson: "Inflammation of all creation."

THE RETREAT FROM ALSACE

Loquacious visitor: "So you were wounded at the front, my good man?"

Irishman: "No, begorry. I was wounded in the rear."

Dry: "How can I keep my toes from going to sleep?"

Crouch: "Don't let them turn in."

"Oh, mother," sobbed the young wife,
"John doesn't trust me."

"Why, my child, what has he done?"

"Well, you know, I cooked my first dinner for him today, and he invited a friend to dine with him." The sobs broke afresh.
"And oh, mother, the man was a doctor!"

THE EUGENIST TO HIS LOVE

Away! away! for I must break with thee!

Not that I love thee less than heretofore;

But, by the eugenistic theory,

We dare not coo nor cuddle any more.

Tempt me no more thy luscious lips to taste;

I love thee madly and I might give in.

Ah, love, wert thou but larger in the waist,

But as it is, the book says thou'rt too thin.

Tempt me no more to rest within thy arms!

My breaking heart might yield to love so tender.

Shut, shut thy pleading eyes! Veil all thy charms!

I love thee!—but alas! thou art too slender.

Farewell farewell! mine angel that thou art!

Mine cheek grows cold; mine eyes with tears are dim.

A word, a glance—I'd crush thee to my heart!

O speak not! look not! for thou art too slim.

Away! away yet leave the hope with me

That years increasing yield thee some increase.

Leave yet the hope that some day I shall see

My love, my life, a little more obese.

—Henry Sticker.

GIVING THE DOCTOR THE CREDIT

Dr. Chapman: "You have only a few moments left to live. Have you anything to say?"

Patient: "Only dis, doctah—dat yo've made an a'mighty quick job ob it."

Dr. Malloy "How do you feel, Colonel, when you have actually killed a man?"

Colonel: "Oh, not so bad. How do you?"—Punch.

STRANGE ANATOMY

"It is wrong to write jokes about the French soldiers' pants," said a sympathetic young lady. "They are red and flamboyant, but they cover as brave and tender hearts as ever beat."

COMPLICATIONS

Dr. Wade: What are the two worst diseases with which a patient may be simultaneously affected?

Glascó: Rheumatism and St. Vitus' Dance.

MUTUAL ATTRACTION

"So the telephone operator in the hospital is going to marry the surgeon?"

"So I hear."

"Affinity of tastes, I suppose. She cuts people off and he cuts 'em up."

AT THE COUNTY HOSPITAL

The New Nurse: "Have you seen Ethel Barrymore in 'A Country Mouse'?"

Veteran Nurse: "Yes, but she isn't so good as Ethyl Chloride in Local Anesthesia."

New Nurse: "Oh, is she good? I must see her."

HE WOULD RECOVER

Mrs. Gayburdd (whose husband is ill from drink): "Well, doctor—tell me the worst."

Doctor Fein "Well, madam—he will recover."

She was a careless girl to put the subscriber on the wrong number. Being in a hurry, the subscriber promptly asked for a box for two.

"But we don't have boxes for two," said a startled voice at the other end of the line.

"Why, isn't that the theatre?" he inquired.

"No," was the reply, "this is ——'s, the undertaker."

"You haven't any serious or organic trouble," said the young physician, cheerfully. "You're a little nervous and run down, that's all. Take more exercise, eat less, and forget your troubles." The hypochondriac snorted. "Young man," he demanded, his voice shaking, "how long have you been a doctor?" "I took my degree three years ago," answered the medico. "And I am an invalid of 25 years' experience. Who are you, to disagree with me?"

Dr. Elliot: "How would you treat severe post-operative hemorrhage?"

Junior: "Why, hygienically and dietically."

An old physician was noted for his brusque manner and old-fashioned methods. A lady called him in to treat her baby, who was slightly ailing. The doctor prescribed castor oil.

"But, doctor," protested the young mother, "Castor oil is such an old-fashioned remedy."

"Madam, replied the doctor, "babies are old-fashioned things."

First Widow: "Yes, Cassidy met with a violent death. He took a dose of morphine, went to sleep and never woke up."

Second Widow: "Do you call that violent?"

First Widow: "Yes. They pounded the life out of the poor fellow trying to make him wake."

The jokes that a fellow
Remembers are yellow
With age—really century pets;
But the true bull's-eye hitters,
The dandy side-splitters,
Are those that he always forgets.

D. H. Howell, '17.

Professor: "And then, Mr. Belensky what happened after Alexander the Great died?"

Belensky: (solemnly): "He was buried."

"What's your time?" asked the pre-freshman of the brisk salesman.

"Twenty minutes after five. What can I do for you?"

"I want them pants," said the pre-freshman, leading the way to the window and pointing at a ticket marked—"Given away at 5.20."

Stern Parent: "I should never have thought that studying would have cost so much money."

Monaco. "Yes, father, and if you only knew how little I have studied."

Keeper: "I do not know what to do with 1223."

Assistant: "What's the trouble?"

Keeper: "He is too far gone to run around here and not crazy enough to send to the City Hall."

Matlock: "That man who slept two weeks was arrested yesterday."

Keeton: "What was the charge against him?"

Matlock: "Impersonating a Sophomore."

HONK! HONK!

Little: Do you think nervousness can be cured by auto-suggestion?"

Provost: "No, but I think many cases could be cured by auto-suppression."

Boarder: "How much milk does that cow give?"

Farmer: "She doesn't give any; what yer git, yer got to work for."

First Doctor: "Do you consider the operation absolutely necessary?"

Second Doctor: "Surely! The only way we can possibly find out what ails him is to do a postmortem."

Timms: "Do you live here, little girl?"

She "No,—I am from Providence."

Timms: "Oh, are you?"

She: "Oh no,—R. I."

THE TEMPTATION OF ST. VITUS

Hairless Student: "Can you suggest anything to nourish my hair?"

Doctor: "Develop your brains a bit and the roots will have something to feed on."

"I am sorry, my dear sir; but I neglected to bring my surgical instruments with me."

"That will be all right, doctor. The plumber who has been working in the cellar has left his tools here."

Lawyer (examining doctor): "Do you understand the difference between character and reputation?"

Doctor: "Reputation is the name your patients give you; character is the one they take from you."

The mustard in the hamlet of Spiici is indeed strong. A man made a plaster of it, put it on his back, and that night it drew his diamond stud into his body. Up to the time of going to press the doctors are still probing for it.

Freshman at the Unique: "That isn't a very good-looking piece of meat."

Waiter: "Well, you ordered a plain steak."

Corkscrews have sunk more people than cork jackets will save.

The sluggard is referred to the ant but he usually goes to his uncle.

Pawnbrokers prefer students with no redeeming qualities.

Have you a wart? Have you a receding chin? Have you a bunion? Have you ingrown toe-nails? Have you any money? Come to us; we will take it away from you. Dr. Bunkem, adv.

Doctor: "Are you truthful?"

Young girl applicant: "Yep; but I ain't so truthful as to spoil business."

Mrs. Henpeck: "Henry, listen to those wedding bells."

Mr. Henpeck: "Wedding bells, you mean lemon peals."

ODE TO A SIYE

Twinkle, twinkle little stye,
On my pretty patient's eye;
To my office you must come
Dangerous hordeolum.

PREREQUISITES

"Tommy," said the Sunday School teacher, who had been giving a lesson on the baptismal covenant, "can you tell me the two things necessary to baptism?"

"Yes'm," said Tommy; "water and a baby."

THE MAIN QUESTION

Victim: "What has hapened? Where am I?"

Doctor: "You have been seriously injured in a trolley accident. But cheer up—you will recover."

Victim: "How much?"

BELLIGERENT OMEN

She: "An apple a day keeps the doctors away."

He: "Don't stop there; an onion a day keeps everybody away."

AS UNDERSTOOD

"Madam, you are a little run down. You need frequent baths and plenty of fresh air, and I advise you to dress in the coolest, most comfortable clothes; nothing stiff or formal."

When the lady got home, this is how she rendered to her husband the advice given to her by the doctor:

"He says I must go to the seashore, do plenty of motoring and get some new summer gowns."

CONGESTED MILK

Dr. Knott, who was sent to the Jefferson home following the death of the child, reported that it probably died from strangulation, due to a congestion of milk in its throat.

THE SPIRIT WITHIN HER

"So you're going to get a new family doctor in place of your old medical adviser, Mina, dear?"

"Oh, yes, he is too absent-minded for me. The other day he was examining me with the stethoscope, and while he was listening he suddenly called out, "Hello, who's this speaking?"

Old Doctor: "Now when your patient asks you for a tonic, what are you going to do about it?"

Young Doctor: "Find what she really needs and prescribe it."

Old Doctor: "Wrong! No success in that method. Whenever your patient has diagnosed her own case and tells you she needs a tonic, you prescribe a tonic every time!"

Young Doctor: "Why?"

Old Doctor: "Don't you guess why? Because she will then have to see that you know almost if not quite as much about medicine as she does!"

PRACTICE REQUIRED

"What are you studying now?" asked Mrs. Johnson.

"We have taken up the subject of molecules," answered her son.

"I hope you will be very attentive and practice constantly," said the mother. "I tried to get your father to wear one, but he could not keep it in his eye."

THE POINT OF VIEW

Mrs. Hen: "Willie has a bad cold. I believe he got his feet wet."

Dr. Drake: "H'm. Nonsense. He may have kept them too warm and dry."

CAPTIOUS CRITICISM

"Pardon me," said the budding poet to the crabbed editor, "May I inquire why you do not wish to accept my poems? Are the feet wrong?"

"The feet are passable," replied the crabbed editor, with some acerbity, "but the poems are bow-legged."

Mother: "Where do you feel sick?"

Son: "On my way to school."

Stout Party: "Say, young fellow, do you know where I could get a hair-cut?"

Urchin: "Sure, gov'nor—on yer head."

BEHIND THE TIMES.

First Little Girl: "Have you been operated on yet?"

Second Little Girl: "No. Mother says I am very backward for my age."

GOT WHAT HE COULD

The great specialist's patient, after many weeks of treatment, had at last been declared cured of an "incurable" disease and with a grateful feeling he asked the physician the amount of his bill.

"That depends, my dear sir," said the specialist. "Whenever I treat a man I always make it a point to determine his occupation and how large a family he has to support. Then I make out my bill accordingly. May I ask what you do for a living?"

"I am a poet," replied the patient, soulfully.

"In that case," said the physician, "if you will give me the money in cash now, it'll be a dollar and a half."

Patient: "Do you consider an operation necessary?"

Honest Surgeon: "Well, not exactly necessary, but customary."

Dr. MacDiarmid: "How would you treat spinal meningitis?"

Rasmussen: "I would let the symptoms arise and then use anaphylaxis."

A MEDICAL STUDENT'S LETTER TO HIS FATHER

Dear Dad:

I have removed the conditions in gross and microscopic anatomy, also in clinical pathology and physical diagnosis. In this year's curriculum are included such subjects as obstetrics, pediatrics, gynecology, et-ce-tera. I need \$80 for text books and \$56 for a ronchial plexus.

Dear Father, I have a very marked coryza and dysponea, due to cardiac or pulmonary lesions. There is dullness over second costal interspace on right side, close to sternum and manubrium. I succeeded in sputum examination, which is negative and therefore prognosis of my condition is favorable.

The landlady excoriates me very much and I need money to pay my rent.

Your son,
"Medical Student."

FATHER'S REPLY

Dear Son:

From your letter I understood that you are gaining and there is something between you and your landlady, but anyhow, please tell me what dictionary or encyclopaedia I have to buy in order to translate your letter into English. Nobody in the town could help me in reading it, and all of us are in fear that you will forget English. Anyhow, tell me what language is in ordinary use in your city.

Father of a medical student,
"A Montvid."

HE SPOKE CARELESSLY

Patient: "Sorry to bring you all the way out here, doctor."

Doctor: "Oh, don't worry about that. I can see another patient and kill two birds with one stone."

"GOOD BYE GIRLS I'M THROUGH
I GOTTA HOSPITAL!"

The End

CHICAGO

THE Rookwood and German Rooms where we started the 75-cent luncheon idea are crowded beyond capacity.

In response to many requests we are now serving the La Salle Special 75-cent luncheon in the beautiful Louis XVI Room from 11:30 a. m. to 2:30 p. m. daily.

Newly decorated, the surroundings are more inviting than ever, and there is just enough of entertainment to make the mid-day meal a delightful break in the day.
